**PHYTOCHEMICAL STUDIES ON CERTAIN
HYOSCYAMUS SPECIES**

THESIS

Under Supervision

Prof. Dr. Sayed Farag Khalifa.

S. F. Khalifa

Prof. Dr. Fayza Mohamed Hammouda.

F. M. Hammouda

Prof. Dr. Shams El-Din Imbaby Ismail

Shams D. Ismail

Prof. Dr. Salah Sayed Ahmed

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

وَقُلْ رَزَوْنِي عِلْمًا

صدق الله العظيم

DEDICATION

**TO WHO GIVES ME EVERY
THING AND TAKES
NOTHING,**

MY DEAREST FATHER

ACKNOWLEDGMENT

ACKNOWLEDGMENTS

I would like to express my sincere gratitude to Prof. Dr. Sayed Farag Khalife, Professour of Plant Taxonomy, Faculty of Science, Ain-Shams University; Prof. Dr. Fayza Hammouda and Prof. Dr. Shams El-Din Imbaby Ismail, Pharmaceutical Science Department, National Research Center, Cairo, Egypt for their supervision, support, advices during the work and their great help in the preparation of the thesis.

My acknowledgment is due to Prof. Dr. Salah Sayed Ahmed, Pharmaceutical Science Department, National Research Center, Cairo, Egypt for his kind indispensable help and his constant assistance to allow this work to be done.

I owe much gratitude to Dr. Elsayed Abou Elfotowh Omer, Pharmaceutical Science Department, National Research Center, Cairo, Egypt for his continuous patience during the work and preparation of the cultivation part of the thesis.

Grateful acknowledgment is expressed to the staff of the Chemistry of Medicinal Plants Laboratory, Pharmaceutical Science Department, National Research Center, Cairo, Egypt especially Adel Kamal Zaki and Nahla Abedel-Azim for their useful cooperation and helpful advice all the time through out the entire work.

The author would like to express his deepest thanks to the National Research Center, Cairo, Egypt for all facilities given and finicial support which made this work possible

SUMMARY	1
INTRODUCTION	3
PART I	
I.STUDIES ON WILD <i>HYOSCYMUS MUTICUS</i>	6
1 Taxonomy	7
2. Phenology	8
2.1. Gross Morphology	8
2.2. Floral Morphology	8
2.3. Life Form	11
2.4. Habitat	11
2.5. Plant Community	11
3. Geographical Distribution	12
4. Discription of Studied Spots	12
5. Soil Analysis	17
PART II	
II.STUDIES ON CULTIVATED <i>HYOSCYAMUS MUTICUS</i>	20
1. Ecophysiological Studies	21
1.1. Soil Analysis	21
1.2. Methods	21
1.2.1. Physical Analysis	21
1.2.2. Chemical Analysis	21
1.2.2.1. Soil Reaction (pH)	21
1.2.2.2. Total Soluble Salts (T.S.S.)	21
1.2.2.3. Anion	21

1.2.2.3.1. Bicarbonates	22
1.2.2.3.2. Sulphates	22
1.2.2.4. Cations	22
1.2.2.5. Organic Carbon Content	22
1.2.2.6. Calcium Carbonate	22
1.3. Results and Discussion	25
2. Seed Germination	26
2.1. Introduction	26
2.2. Materials	28
2.3. Methods	28
2.4. Results and Discussion	30
3. Alleopathic Effect of Seeds and Roots of <i>H. muticus</i>	31
3.1 Introduction	31
3.2 Materials	33
3.3. Methods	33
3.3.1 Seed Extract	33
3.3.2. Root Extract	34
3.4. Results and Discussion	39
3.4.1. Seed Extract	39
3.4.2. Root Extract	39
3.4.2.1. Effect on Seed Germination of Tested Plant	39
3.4.2.2. Effect on Root and Shoot Length of Tested Plant	40
4. Cultivation	41
4.1. Introduction	41
4.2. Methods	46

4.2.1. Experiment One	46
4.2.2. Results and Discussion	50
4.2.3. Experiment Two	50
4.2.4. Results and Discussion	54
 PART III	
III. PHYTOCHEMICAL STUDIES ON <i>HYOSCYAMUS MUTICUS</i>	55
1. Introduction	56
1.1 Major Tropane Alkaloid of Family Solanaceae	56
1.1.1. Atropine	56
1.1.1.1. Preparation	57
1.1.1.2. Properties	58
1.1.2. Hyoscyamine	59
1.1.2.1. Properties	59
1.1.3. Scopolamine	60
1.2. Tropane Alkaloids of <i>Hyoscyamus Species</i>	62
1.2.1. Effect of Heating and Drying	65
1.3. Determination of Tropane Alkaloids Using Chromatographic Method	66
1.3.1. Thin Layer and Column Chromatography	66
1.3.2. Paper Chromatography	69
1.3.3. Ion Exchange Chromatography	73
1.3.4. High Performance Liquid Chromatography	73
2. Quantitative Determination of Total Alkaloidal Content of <i>H. muticus</i> leaves	76
2.1. Materials	76
2.2. Procedure	76
2.3. Titrimetric Method	77

2.3.1. Calculations	78
2.3.2. Results and Discussion	85
2.4. Evaluation of Scopolamine and Hyoscyamine In <i>H. muticus</i>	86
2.4.1. Materials	86
2.4.2. Methods	87
2.4.3. Calculations	88
2.4.4. Results and Discussion	102
3. Methods of Extraction and Fractionation of Tropane Alkaloids	103
3.1. Materials	103
3.2. Method I (Ion Exchange Chromatography)	103
3.2.1. Investigation of The Total Alkaloids Using TLC	104
3.2.2. Results and Discussion	107
3.3. Method II (Adsorption on Charcoal)	108
3.3.1. Results and Discussion	112
3.4. Method III (Partition at Different pH's)	113
3.4.1 Results and Discussion	116
3.5. Method IV (Improvement of Method III)	117
3.5.1. Results and Discussion	120
4. Preparation of Total Alkaloids of <i>H. Muticus</i> In Different Dry Forms	121
4.1. Spray Drying	121
4.2. Drying Under Reduced Pressure	125
4.3. Results and Discussion	127
 DISCUSSION	 128
