TO

CHEMISTRY DEPARTMENT
FACULTY OF SCIENCE
AIN SHAMS UNIVERSITY

46957

In partial fulfilment of the requirements for the degree

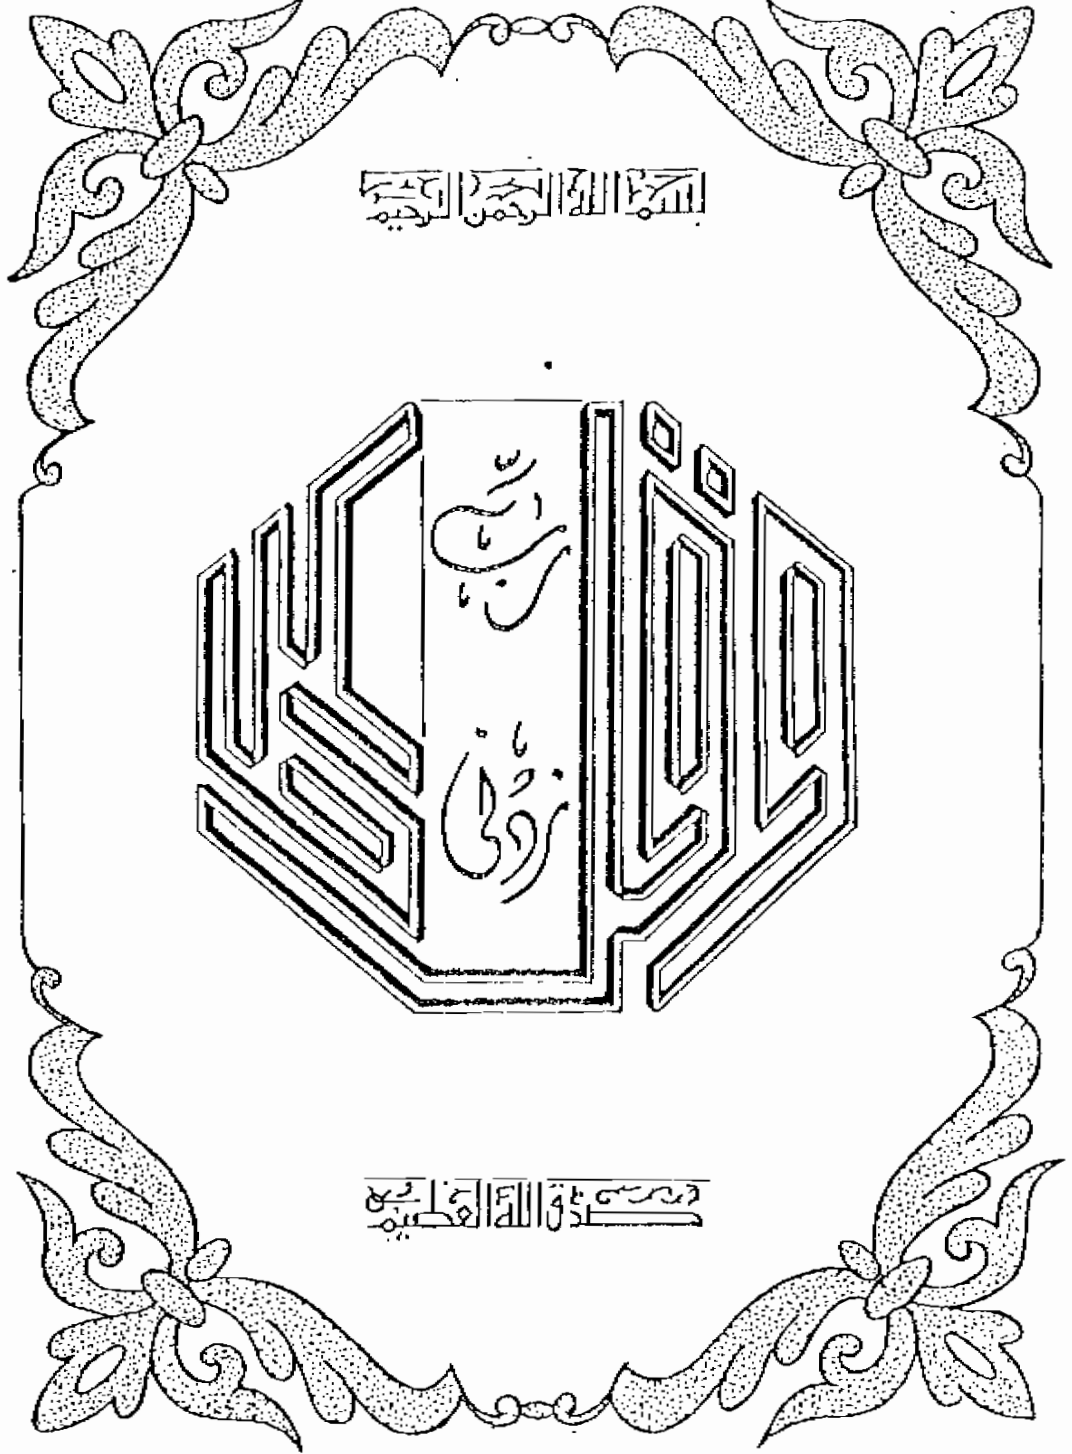

of

Master of Science

CHEMISTRY

1993

PROF. Dr. MOHAMED FATHY EL-SHAHAT

El-Shahat

Professor of Analytical and Inorganic Chemistry

Faculty of Science

Ain Shams University

PROF. Dr. HISHAM FOUAD ALY

Hisham Aly

Professor of Nuclear Chemistry

Vice Chairman of Atomic Energy Authority

PROF. Dr. SALAH MOHAMED KHALIFA

S.M. Khalifa

Professor of Radioinorganic Chemistry

Head of Nuclear Chemistry Department of Burnt Fuel.

Hot Laboratories Centre

Atomic Energy Authority.

Prof. Dr. Abd El-Gawad. M. Rabie.

Head of Chemistry Department

1.3.4.1. Oxidation State.	33
1.3.4.2. Disproportionation.	35
1.3.4.3. Solution (electronic transition) absorption spectra.	36
1.3.4.4 .Thermodynamic functions.	37
1.4. Some Aspects on the Radiochemistry of Europium.	37
1.4.1. Nuclear Properties of Eu-Radioisotopes	37
1.4.2. General Properties of Lanthanide Elements	38
1.4.3. Oxidation States and Oxidation Potentials of Lanthanides.	42
1.4.4. Atomic and Ionic Radii-Lanthanide Contraction.	46
1.4.5. Complex Formation of Lanthanide Elements.	48
1.5. Liquid-Liquid Extraction Kinetics.	50
1.5.1. Criteria Used to Identify the Extraction Regime.	53
1.6. Literature Survey	57
1.6.1. Solvent Extraction of Eu(III) and Am(III).	57
1.6.2. Kinetics of Separation	66

CHAPTER.2. EXPERIMENTAL

2.1. Chemicals and Reagents.	70
2.2. Radioactive Tracers.	70
2.2.1. Radioactive Europium (152+154)	71
2.2.2. Radioactive Americium (241).	72
2.3. Preparation of Solutions.	72
2.3.1. Aqueous Solutions	72
2.3.2. Organic Solutions	75

2.4.1. PH-Meter	76
2.4.2. Multichannal Analyzer.	77
2.4.3. Variable Speed Stirrer.	77
2.4.4. Double-Jacket Lewis Cell.	77
2.5. General Procedure.	78
2.5.1. Partition Investigations.	78
2.5.2. Kinetic Investigations.	78
2.6. Reproducibility.	81

CHAPTER 3. RESULTS AND DISCUSSION

3.1. Equilibrium Treatment	89
3.2. Equilibrium Investigations.	93
3.2.1. Extraction from Perchlorate Medium	93
3.2.1.1. Chelate extraction	93
3.2.1.2. Extraction by mixed ligands	94
3.2.1.2.1. Test of synergism	95
3.2.1.2.2. Effect of hydrogen ion concentration	95
3.2.1.2.3. Effect of extractants concentration	97
3.2.1.2.3.1. Effect of HTTA concentration	99
3.2.1.2.3.2. Effect of neutral donor ligand concentration.	99
3.2.2. Extraction From Nitrate Medium	108
3.2.2.1. Chelate extraction	108
3.2.2.1.1. Effect of hydrogen ion concentration	108
3.2.2.1.2. Effect of extractants concentration	109
3.2.2.1.2.1. Effect of HTTA concentration	111
3.2.2.1.3. Effect of nitrate concentration	113

3.2.2.2.1. Test of synergism.	117
3.2.2.2.2. Effect of hydrogen ion concentration	119
3.2.2.2.3. Effect of extractants concentration	121
3.2.2.2.3.1. Effect of Ph_3AsO concentration	122
3.2.2.2.3.2. Effect of HTTA concentration	122
3.2.2.2.4. Effect of nitrate concentration.	124
3.2.3. Separation feasibility	132
3.3. Kinetic Investigations	137
3.3.1. Perchlorate Medium.	137
3.3.1.1. Effect of stirring rate.	137
3.3.1.2. Effect of extractants concentration	142
3.3.1.2.1. Effect of HTTA concentration	142
3.3.1.2.2. Effect of Ph_3AsO concentration	145
3.3.1.3. Effect of hydrogen ion concentration	151
3.3.1.4. Effect of temperature	163
3.3.2. Nitrate Medium	173
3.3.2.1. Effect of stirring rate	174
3.3.2.2. Effect of extractants concentration	175
3.3.2.2.1. Effect of HTTA concentration	175
3.3.2.2.2. Effect of Ph_3AsO concentration	178
3.3.2.3. Effect of hydrogen ion concentration	188
3.3.2.4. Effect of nitrate concentration	192
3.3.2.5. Effect of temperature.	204

ARABIC SUMMARY	

I am deeply thankful to God , by the grace of whom the progress and success of this work was possible.

The author wishes to express his deep gratitude and appreciation to the thesis committee members professors: Prof.Dr. Mohamed Fathy El-Shahat, Prof.Dr. Hisham Fouad Aly, and Prof.Dr. Salah Mohamed Khalifa for their guidance and constructive comments.

Appreciation is expressed to Prof.Dr. M.F.El-Shahat, Professor of Analytical and Inorganic Chemistry, Faculty of Science, Ain Shams University, for sponsoring this thesis and his sincere help, encouragement during the course of study.

The author is obliged to Prof.Dr. H.F.Aly, Prof. of nuclear chemistry,Vice chairman of Atomic Energy Authority for suggesting the topic of study, plan of work and guidance throughout the whole investigations.

Thanks are expressed to Professor Dr. S.M.Khalifa chairman of Nuclear Chemistry Department of burnt fuel, Hot Labs. Centre, Atomic Energy Authority for supervising the experimental work, guidance and his careful review of the manuscript.

The author wishes to express his thanks and appreciation to Dr. Jacqueline Abdel Messih Daoud, Assistant

Authority (A.E.A.) for her unlimited help and co-supervision of all the experimental work and discussions presented in the thesis. Her careful review of the manuscript is highly appreciated.

The author would like also to thank all the staff members, his colleges of the Hot Labs. Centre, A.E.A. for their fine sympathy.

Table (1):Elemental constituents in a uranium fuel discharged from a PWR.....	7
Table (2):Composition of 1 t spent uranium fuel, originally enriched to 3.3% in ^{235}U after 33,000 MWd/t U burn -up at a flux of $3 \times 10^{13} \text{ n cm}^{-2} \text{ s}^{-1}$ (30MW/t U) at a cooling time of 10y	10
Table (3):Some nuclear properties of americium isotopes.....	32
Table (4):Some nuclear properties of europium radioisotopes.....	39
Table (5):The main chemical reagents and extractants used.....	70
Table (6):Standard Deviation Data for Each Single deviation (D) and the Standard Deviation for the Average (D')for the System :Am(III)\HTTA-Ph ₃ AsO\CHCl ₃ \ClO ₄ ⁻	83
Table (7):Standard Deviation Data for Each Single deviation (D) and the Standard Deviation for the Average (D')for the System :Eu(III)\HTTA-Ph ₃ AsO\CHCl ₃ \NO ₃ ⁻	84
Table (8):Standard Deviation Data for Each Single deviation (D) and the Standard Deviation for the Average (D')for the System :Am(III)\HTTA-Ph ₃ AsO\CHCl ₃ \NO ₃ ⁻	85
Table (9):Standard Deviation Data for Each Single deviation (D) and the Standard Deviation for the Average (D')for the System :Am(III)\HTTA-Ph ₃ AsO\CHCl ₃ \ClO ₄ ⁻	86
