الرَّحِيمِ**

TO MY WIFE

ACKNOWLEDGEMENT

Acknowledgement

I am deeply grateful for the support and constructive guidance of many people, whose valuable assistance made this study possible.

First and foremost, I wish to express my thanks and profound gratitude to ***Professor Ahmed Okasha, Professor of Psychiatry at Ain Shams University***. The original suggestion for the subject came from ***Professor Ahmed Okasha***, to whom I am deeply indebted for encouraging me to develop this subject, and for all the inspiring guidance, valuable supervision and help, he has given me since I started this project. Thanks are also due to him for providing me with the most up to date references related to my topic. It was through his efforts that I was able to obtain a wide variety of reviews for the dissertation.

I am deeply indebted to ***Professor Adel Sadek, Professor of Psychiatry at Ain Shams University***, for his valuable instruction, rich guidance and support throughout my period of study. I am grateful to ***Professor Adel Sadek*** who early on saw the importance of this subject and provided sympathetic critical input at intervals throughout.

I am eternally grateful to ***Professor Farouk Lotief, Professor of Psychiatry at Ain Shams University***, for his scrutiny, his valuable comments and suggestions, and his deep interest in the subject. I appreciate very much his scholarship, wisdom, understanding and most valuable suggestions. He has always been a real father figure.

I wish to express my great gratitude and ultimate thanks to ***Professor Afaf Hamed, professor of Psychiatry at Ain Shams University***, who has patiently gone through a series of revisions, aiming for the highest degree of lucidity. I am really indebted to her for her willingness to work long and irregular hours in order to expedite the timely completion of this work. She has shared the vision of this subject with me and contributed in many ways to the final version. Without her creative ideas and motherly support this work could not have seen daylight.

I sincerely appreciate all the encouragement and support given by ***Professor Mohamed Refaat El Fiky, Professor of Psychiatry at Ain Shams University***. He has generously provided me with continuous, all round research assistance and advice. I am really obliged to him because he has willingly dispersed much of his valuable time trying to clarify any gloomy aspects facing the work. His cooperation, creative ideas and meticulous revision were tremendous, that without which the study would have not been completed.

Acknowledgement is also made for the encouragement and support given by ***Professor Mona Raafat, Professor of Neurology, at Ain Shams University***. She has provided me with many helpful suggestions and comments. I wish also to express my sincere appreciation to ***Dr. Tarek Okasha, Lecturer of Psychiatry at Ain Shams University*** for his sincere help and encouragement. Thanks are also due to ***Dr. Amany Haroun El Rasheed, Lecturer of***

Psychiatry at Ain Shams University for her support and assistance. I must acknowledge the many contributions of **Dr. Suzan El Kholi, Consultant of Clinical Psychology at Ain Shams University**. Her encouragement and valuable suggestions are greatly appreciated.

Great many individuals have contributed to the creation and the final “sharpening” of this dissertation. I wish to express particular gratitude to my outstanding Professors and colleagues who have provided me with an opportunity to review what I have written in an agreeable and stimulating environment.

I cannot also miss those who carried out all the statistical work representing a vital part in the research results. So I wish to express my gratitude to **Professor Feisal Younis, Professor of Psychology at Cairo University** for his great help and support regarding the statistics of the research. Thanks are also due to **Mr. Fouad Abou El Makarem, Assistant Lecturer of Psychology at Cairo University** for his assistance in the statistical work. I am indebted for the word processing and editorial skills of **Mrs. Hanan Abd El Rahman**.

Last but not least, I wish to extend my genuine thanks and deep admiration and gratitude to my dear parents and in-laws for their encouragement, love and support. Special thanks go to my beloved sister **Nevine** for her unfailing assistance help and patience.
