EFFECT OF REACTIVE MAGNESIUM OXIDE ON THE PHYSICO-MECHANICAL PROPERTIES AND DURABILITY OF CEMENT MORTAR

A Thesis

Submitted to the Chemistry Department,
Faculty of science, Ain Shams University.
For the PhD. Degree in Chemistry.

Presented by
Ibrahim Mohamed Hamza El-Kattan

(M.Sc., 2013)

Supervised by
Prof. Dr. Salah Abd-Elghany Abo-El-Enein

Prof. of physical chemistry and Building Materials–Faculty of science, Ain
Shams University.

Prof. Dr. Osama Abd-El-Gafor Hodhod

Prof. of Engineering Materials – Faculty of Engineering, Cairo University.

Dr. Hamdy Abdel-Aziz Ahmed Abdel-Gawwad

Researcher of Physical Chemistry and Building Materials – Housing and
Building National Research Center

(2016)

**" EFFECT OF REACTIVE MAGNESIUM OXIDE ON THE
PHYSICO-MECHANICAL PROPERTIES AND
DURABILITY OF CEMENT MORTAR"**

THESIS ADVISORS

APPROVED

Prof. Dr. Salah Abd-Elghany Abo-El-Enein

Prof. of physical chemistry,

Faculty of science, Ain Shams University.

Prof. Dr. Osama Abd-El-Gafor Hodhod

Prof. of Engineering Materials,

Faculty of Engineering, Cairo University.

Dr. Hamdy Abdel-Aziz Ahmed Abdel-Gawwad

Researcher of Physical Chemistry and Building Materials

Housing and Building National Research Center.

Head of Chemistry Department

Ain Shams University
Faculty of science

Student Name: Ibrahim Mohamed Hamza El-Kattan

Scientific Degree: M. Sc. (Chemistry)

Department: Chemistry

Faculty: Faculty of Science

University: Banha University

M. Sc. Graduation Date: 2013

ACKNOWLEDGMENT

Firstly, and foremost, my deep gratefulness, thankful and indebtedness as to merciful “**ALLAH**”, who give me everything I have in the ability and patience for accomplishing this work.

Foremost, I would like to express my deep and sincere thanking to **Prof. Dr. Salah Abd-Elghany Abo-El-Enein**, Professor of Physical Chemistry and Building Materials, Faculty of science, Ain Shams University, for suggesting the subject of this study, useful guidance, continuous supervision and his great help in the interpretation of the results.

Special thanks and appreciation are extended to **Prof. Dr. Osama Abd-El-Gafor Hodhod**, Prof. of Engineering Materials, Faculty of Engineering, Cairo University for supported me by help, guidance and expert.

Also, I would like to thanks **Dr. Hamdy Abdel-Aziz Ahmed Abdel-Gawwad**, Researcher of physical Chemistry and Building Materials, Housing and Building National Research Center for his kind, help, guidance and continuous supervision during course of this investigation.

I send special thanks and dedicate this work to my parents, my family for the gift of years of support, tolerance and patience; so I ask my God to aid me to restore even some of them efforts.

Ibrahim.M.H.El-kattan

CONTENTS

1. INTRODUCTION AND LITERATURE REVIEW	1
1.1 Introduction	1
1.2 Literature Review	2
1.2.1 Effect of supplementary cementitious materials (SCM _s) on the mechanical properties and durability of cement mortar and concrete.....	3
1.2.2 Effect of nano-SiO ₂ on the mechanical properties and durability of cement paste, mortar and concrete.....	5
1.2.3 Effect of carbonation on the mechanical properties of cement mortar and concrete.....	9
1.2.4 Firing resistivity of cement paste, mortar and concrete.....	13
1.2.5 MgO concrete	18
1.3 Objective of the work	19
2. EXPERIMENTAL	20
2.1 Materials	20
2.2 Procedures	21
2.2.1 Preparation of reactive MgO	21
2.2.2 Acetic acid neutralization test	23
2.2.3 Preparation of dry Mixtures	23
2.2.4 Preparation and curing of cement mortars	24
2.3 Methods of investigation	27
2.3.1 Stopping of hydration.....	27

2.3.2	Water absorption	28
2.3.3	Compressive strength measurements	28
2.3.4	Expansion test	29
2.4	Instrumental Techniques	29
2.4.1	X-Ray diffraction (XRD).....	29
2.4.2	Thermogravimetric analysis and derivatives (TGA/DTG).....	30
2.4.3	Infra-red spectroscopic analysis (FTIR)	30
2.4.4	Scanning electron microscopy (SEM).....	30
3.	RESULTS AND DISCUSSION.....	32
3.1	Determination of MgO Reactivity Using Acetic Acid Neutralization Test	32
3.1.1	Determination of MgO reactivity using XRD analysis	33
3.2	Physico-Mechanical Properties of Cement Mortar (CM) Containing Mgo550 (as Addition)	34
3.2.1	X-Ray diffraction (XRD).....	35
3.2.2	TG/DTG-thermograms	38
3.2.3	Linear expansion.....	43
3.2.4	Water absorption	44
3.2.5	Compressive strength	46
3.2.6	SEM analysis	47
3.3	Physico-Mechanical Properties of Cement Mortar Containing Mgo₁₂₅₀ (as Addition)	49
3.3.1	X-Ray diffraction (XRD).....	50
3.3.2	TG/DTG-thermograms	52
3.3.3	Linear expansion.....	55
3.3.4	Water absorption	57
3.3.5	Compressive strength	58
3.3.6	SEM-analysis	60

3.4	Physico-Mechanical Properties of Cement Mortar Containing MgO₅₅₀ or MgO₁₂₅₀ (as addition)	63
3.4.1	X-Ray diffraction (XRD).....	63
3.4.2	TG/DTG-thermograms	65
3.4.3	Linear expansion.....	67
3.4.4	Compressive strength	68
3.4.5	SEM-analysis	71
3.5	Physico-Mechanical Properties of Cement Mortar Replaced by MgO₅₅₀	73
3.5.1	X-Ray diffraction (XRD).....	73
3.5.2	TG/DTG-thermograms	73
3.5.3	Linear expansion	74
3.5.4	Water absorption	75
3.5.5	Compressive strength	78
3.5.6	SEM-analysis.....	81
3.6	Physico-Mechanical Properties of Cement Mortar Replaced by MgO₁₂₅₀	82
3.6.1	X-Ray diffraction (XRD).....	83
3.6.2	TG/DTG-thermograms	84
3.6.3	Linear expansion.....	84
3.6.4	Water absorption	87
3.6.5	Compressive strength	89
3.6.6	SEM-analysis	91
3.7	Physico-Mechanical Properties of Cement Mortar Replaced by MgO₅₅₀ As Well As MgO₁₂₅₀	92
3.7.1	X-Ray diffraction (XRD).....	92
3.7.2	TG/DTG-thermograms	93
3.7.3	Linear expansion.....	94
3.7.4	Compressive strength	97
3.7.5	SEM-analysis	98
