CHEMICAL STUDIES OF SOME COMPOSITAE PLANTS

ADVISOR

1. Prof. Dr. A.M. Sammour
2. Prof. Dr. F.M. Hammouda
3. Prof. Dr. S.I. Ismail

APPROVAL

.....

.....F. Hammouda.....

.....S. I. Ismail.....

Chairman of Chemistry Dept.,
Faculty of Science,
Ain Shams University.

ACKNOWLEDGEMENT

The author would like to express his sincere gratitude to Prof. Dr. Abdel Maged Sammour, Professor of Organic Chemistry, Faculty of Science, Ain Shams University, for his constant supervision and guidance throughout the work.

I am deeply indebted and grateful to Prof. Dr. Faiza M. Hamouda; Prof. Dr. Abdel Fattah M. Rizk and Prof. Dr. Shams I. Ismail, of the Pharmaceutical Sciences Department, National Research Centre, for their supervision, encouragement, advice, and for supplying all the facilities during the whole work, and for the great help in the preparation of the thesis.

I owe a great debt to Prof. Dr. Medhat M. Sief-El-Nasr, Dr. N.M. Hassan, Dr. S.A. Anzom and also Mr. Alaa S. Kamel of the Pharmaceutical Sciences Department, National Research Centre, for their useful advice and great help throughout this work.

I would further like to express my grateful gratitude for all my colleagues at the Pharmaceutical Sciences Department, National Research Centre, for their kind co-operation, and encouragement.

Grateful acknowledgement is expressed to the National Research Centre, Cairo, Egypt for the facilities given and financial support which made this work possible.

C O N T E N T S

SUMMARY	1
INTRODUCTION	4
REVIEW OF LITERATURE	
1. <i>Cotula</i> spp.	6
2. <i>Francoeuria</i> spp.	11
FLAVONOIDS	
A) Occurrence and Distribution of the Flavonoids in the Family <i>Compositae</i>	19
B) Isolation and Purification of Flavonoids	35
- Column chromatography	35
- Paper chromatography	37
- Thin-layer chromatography	37
C) Recent Techniques for the Isolation and Purification	39
- Centrifugal thin-layer chromatography (Chromatotron)	39
- Droplet counter-current chromatography DCCC	40
- Rotation locular counter-current chromatography (RLCC)	42
- High-performance liquid chromatography HPLC	43
- High-performance thin-layer chromatography [HPTLC]	44
D) Structure Elucidation and Recently Developed Techniques for Identification	45
- The ultra-violet spectroscopy of the flavonoids	45
- The ¹ H- NMR spectra of flavonoids	58
- Carbon 13 NMR spectral analysis	59
- Mass spectral analysis	64
- Recently developed techniques of M S	69
AIM OF WORK	72
PLANT MATERIAL	73
- <i>Cotula cinerea</i>	74
- <i>Francoeuria crispa</i>	74

	Page
EXPERIMENTAL	
I. <i>Cotula cinerea</i>	79
I - VOLATILE OIL	79
Preparation of the Volatile Oil	79
Analysis of Volatile Oil	79
- Gas chromatography	79
- Gas chromatography coupled with mass spectrometry	81
II - THE LIPID CONSTITUENTS	94
Preparation of the Total Lipids	94
Purification and Fractionation of the Lipid Fraction	94
- Separation of the fatty alcohol fraction	94
- Separation of the unsap matter	95
Column Chromatography of the Unsaponifiable Matter	95
Isolation and identification of the Hydrocarbon Fraction	96
- Gas liquid chromatography	96
- Infra-red spectral analysis	101
Isolation and Identification of the Sterol Fraction	101
- Gas-Liquid Chromatography	101
Investigation of the Total Fatty Acids	101
Preparation of the Methyl Esters of the Total Fatty Acids	104
- Gas-Liquid Chromatography	104
III - THE FLAVONOIDS	107
Preparation of the Total Flavonoids	107
- Thin-layer chromatography	107
- Paper chromatography	108
Investigation of the Ethyl Acetate Fraction	113
Fractionation of the Flavonoidal Constituents (Fraction A)	115
- Column Chromatographic Fractionation (Fraction A)	115
Identification of Flavonoid Substance C-I	119
- UV Spectroscopy	119
A) Preparation of Reagent Stock Solutions	119
B) Procedure of Measurements	120
- UV Spectral Analysis of Substance C-I	121

	PAGE
Infra-red Spectral Analysis	126
Mass Spectral Analysis of C-I	126
Identification of Flavonoid Substance C-II	130
- Acid hydrolysis	131
- Ultra-violet Spectral Measurements	132
- Mass Spectral Analysis	137
Column Chromatographic Fractionation (Fraction B)	141
Isolation of the Flavonoid Substance C-III	141
- Acid hydrolysis of flavonoid substance C-III	144
Identification of the Flavonoid Substance C-III	147
- UV spectral analysis.....	147
- The Mass-spectral Analysis	147
- Proton Nuclear Magnetic Resonance	152
- Carbon-13-Nuclear Magnetic Resonance	155
Isolation of the Flavonoidal Substance C-IV	159
Identification of the flavonoidal substance C-IV	159
- Mass spectral analysis	159
 2. <i>Francoeuria crispa</i>	 164
I - Volatile Oil	164
Preparation of the Volatile Oil	164
Analysis of Volatile Oil	164
- Gas Chromatographic Analysis	164
II - THE LIPID CONSTITUENTS	168
Column Chromatographic Fractionation of the Acetone Soluble Fraction	168
Isolation and Identification of the Hydrocarbon Fraction	171
- Gas-Liquid Chromatography	171
Isolation and Identification of the Triterpenoid Fraction	171
- Gas-Liquid Chromatography	174
- Infra-red spectrum	174
- Preparation of the acetate derivative	174
Isolation and Identification of the Sterol Fraction	174
- Gas-Liquid Chromatography	177

	PAGE
Investigation of the Total Fatty Acids	177
- Gas-Liquid Chromatography	179
Extraction and Fractionation of the Different Constituents.....	180
III - THE STEROIDAL GLYCOSIDE	182
Isolation and Identification of the Steroidal Glycoside	182
- Preparation of the acetate	182
- Hydrolysis of the Glycoside	184
- Acetylation of the steroidal aglycone	184
- Reactive thin-layer chromatography	185
- Infra-red spectrum of the steroidal glucoside	185
- Gas-liquid chromatography of the aglycone	185
- ¹ H-NMR spectrum of the steroidal glucoside	189
IV - THE FLAVONOIDS CONSTITUENTS	191
Column Chromatographic Fractionation of the Chloroform Fraction.	191
Isolation of the Flavonoidal Substance FC-1	191
Identification of the Flavonoidal Substance FC-1	194
- Ultra-violet Spectral Analysis	194
- ¹ H-NMR Spectrum of the Isolated Substance FC-1	198
Isolation of the Flavonoidal Substance FC-2	200
Identification of the Flavonoidal Substance FC-2	202
- Ultra-violet Spectral Analysis	202
- ¹ H-NMR Spectrum of the Isolated Substance FC-2	203
Investigation of the Ethyl Acetate Fraction	210
Isolation of the Flavonoidal Substance FC-3 and FC-4	210
- Droplet Counter Current Chromatography	210
Identification of the Flavonoidal Substance FC-3	214
- Acid hydrolysis	214
- Ultra-violet Spectral Analysis	214
Identification of the Flavonoidal Substance FC-4	220
- Acid hydrolysis	220
- Ultra-violet Spectral Analysis	220
