By

Eng. Hoda Ahmed Mohamed Owess

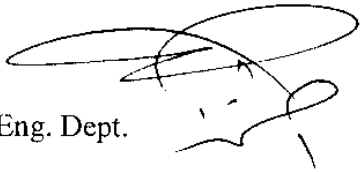

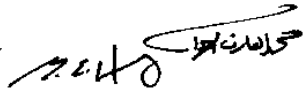

A Thesis Submitted to Electrical Power and Machines Department
of Ain Shams University for the Award of Doctor of Philosophy
Degree in Electrical Engineering (Power and Machines)

Supervised By

Prof. Dr. Ahmed Rizk Abul' Wafa
Electrical power & Machines Eng. Dept.
Faculty of Engineering
Ain Shams University.

Cairo 1997

EXAMINERS COMMITTEE

Name, Title , Affiliation	Signature
1- Prof. Dr. Ahmed Risk Abul'Wafa Head, Electrical Power & Machines Eng. Dept. Faculty Of Engineering Ain Shams University, Egypt Supervisor	
2- Prof. Dr. Mohamed EL Aref El -Hawary Associate Dean Of Engineering Faculty Of Engineering Technical University Of Nova Scotia, Canada	
3- Prof. Dr. Soliman Abed El' Hady Soliman Electrical Power & Machines Eng. Dept. Faculty Of Engineering Ain Shams University, Egypt	

ACKNOWLEDGMENT

I would like to express my deepest gratitude to Prof. Dr. Ahmed Rizk Abul'Wafa for his supervision and helpful guidance during the execution of this research work.

STATEMENT

This thesis is submitted to Ain Shams University in partial fulfillment of the Degree of Doctor of Philosophy in Electrical Engineering.

The work included in this thesis was carried out by the author in the Department of Electrical Power Engineering, Ain Shams University.

No part of this thesis has been submitted for a degree or a qualification at any other university or institute.

Name : Hoda Ahmed Mohamed Owess

CONTENTS

	Page No.
SUMMARY	i
ABSTRACT	v
NOMENCLATURE	vii
LIST OF TABLES	xiv
LIST OF FIGURES	xvi
CHAPTER ONE : INTRODUCTION	
1.1 Industrial Load Management Analysis	1-1
1.2 Industrial Loads Optimum Load Management	1- 4
CHAPTER TWO : REVENUE LOSS DUE TO POWER DEFICIT	
2.1 Structure Of Revenue Loss And Its Determinations	2-1
2.2 Revenue Loss Incurred By Industry Due To Power Deficit	2-1
2.3 Revenue Loss Incurred By Power System	2-10
2.4 Characteristics Of Incremental Revenue Loss	2-13
2.5 Incremental Revenue Loss Due To Power Deficit At Step Down Transformers Substations	2-23
2.6 Conclusions	2-37

CHAPTER THREE: OPTIMUM MANAGEMENT OF INDUSTRIAL LOADS DURING POWER SUPPLY DEFICIT

3.1	Introduction	3-1
3.2	Problem Formulation	3-2
3.3	Optimum Load Shedding Scheme Securing Minimum Revenue Loss During Power Supply Deficit	3- 4
3.3.1	Generalized Non Linear Constrained Programming Technique “Modified Constrained Rosenbrock Algorithm”...	3- 4
3.3.2	Lagrange Technique Augmented With Technical Constraints Algorithm	3-5
3.3.2.1	Upper Limit Violation	3- 9
3.3.2.2	Lower Limit Violation	3-11
3.3.2.3	Solution Algorithm	3-13
3.4	Conclusion	3-18

CHAPTER FOUR : CASE STUDY

4.1	Case Study Formulation	4-1
4.2	Problem Solving	4-1
4.2.1	Optimum power supply scheduling	4-1
4.2.1.1	Generalized Non Linear Constrained Programming Algorithm	4-1
4.2.1.2	Lagrange Technique Augmented With Technical Constraints	4-5
4.2.2	Random power supply scheduling	4-6
4.3	Conclusion	4-12

CHAPTER FIVE:	CONCLUSIONS AND	
	RECOMMENDATIONS	
5.1	Conclusions	5-1
5.2	Recommendations To Industrial Customer	5-3
5.3	Recommendations To Electric Utility ..	5-3
5.4	Further Work	5-3
APPENDIX A :	GENERALIZED NON LINEAR CONSTRAINED PROGRAMMING ALGORITHM	A-1
APPENDIX B :	LAGRANGE TECHNIQUE AUGMENTED WITH TECHNICAL CONSTRAINTS PROGRAMMING ALGORITHM	B-1
REFERENCES :	R-1
