The present thesis is submitted from Mr. Ahmed Mokhtar Mahmoud Badran to the Faculty of Science, Ain Shams University in partial fulfillment for the requirements of Master of Science in Geophysics.

Beside the reasearch work materialized in this thesis, the candidate attended and successfully passed post-graduate courses for one academic year in the following topics:

- 1-Seismic Stratigraphy .
- 2-Lithostratigraphy.
- 3-Basin Analysis.
- 4-Well Logging Interpretation.
- 5-Formation Evaluation.
- 6-Advanced Structural Geology.
- 7-Sedimentology.
- 8-Field Geophysics.
- 9-English Language.
- 10-Computer Programming.
- 11-Tectonics.
- 12-Numerical Analysis.

NOTE

ACKNOWLEDGMENT

The author is very grateful to Prof.Dr Ahmed Abu El-Ata Professor of Geophysics,Geophysics Department (Ain Shams University) for his great help in supervision,advice,providing papers and researches precise readings,and revising of this research.

I would like to express my deep sincere thanks to Mr.Saeed El Askary General manager of exploration studies and operations exploration department, Egyptian general petroleum corporation for his guidance help, valuable discussions, advice, and giving all the available computer facilities in EGPC to produce this research in this present form.

Special gratitude to my colleague Khaled Al Nowaihy for his patience dealing with the used computer programs,Also special deep thanks goes to Mr.Mohamed Reda petrophysist in Petroleum research Institute for providing his own computer programs, and his good beneficial advices and discussions.

I want to express my deepest regards to Mr.Mohamed Hossam,department manager of the geophysical exploration studies in EGPC,for his continuous encouragement with helpful discussions and giving me his own references.

Finally, many thanks goes to my childhood friend Ahmed Abdel Aal who gave me his personal computer for long period in my home to finish this research, and also deep gratitude to my older brother Hassan Badran for his great help in editing, reviewing, and printing the text.
