Dr. Maha Ali Ezz El-Din

M.D. Clinical Pathology

1997

قالوا سبحانك لا علم لنا

إلا ما علمتنا أنك أنت

العليم الحكيم

البقرة - آية ٣٢

Acknowledgment

First and foremost I feel always indebted to GOD, the most kind and the most mericful

I would like to express my deepest gratitude and appreciation to Prof. Dr. Mohamed Abd El-Fattah Taha, Professor of Internal Medicine, Faculty of Medicine, Ain Shams University, for the great help he offered, the fruitful advices and encouragement throughout the whole work,

Special thanks are due to Prof. Dr. Abd El-Ghany Shawkat Mohamed, Professor of Internal Medicine, Faculty of Medicine, Ain Shams University, for dedicating so much of his precious time and effort, and for his kindness, constant guidance to complete this work,

Thanks are also due to Dr. Maha Ali Ezz El-Din, M.D. Clinical Pathology, Specialist in Clinical Pathology, Ain Shams Hospital, for her assistance and help throughout this work,

CONTENTS

INTRODUCTION	1
AIM OF THE WORK.....	2
REVIEW OF LITERATURE.....	3
Virology.....	3
Epidemiology	9
Clinical presentation and Sequelae.....	22
Pathogenesis and Histopathology	28
Diagnosis.....	30
Prevention.....	36
Treatment	38
Familial risk in common diseases.....	41
SUBJECTS AND METHODS	46
RESULTS.....	51
DISCUSSION.....	78
SUMMARY	90
RECOMMENDATION.....	94
REFERENCE	95
ARABIC SUMMARY	

LIST OF TABLES

Tables in Review

Table (1): Milestones in the history of non-A, non-B hepatitis " hepatitis C".	3
Table (2): Perinatal transmission of HCV	18
Table (3): Population and recurrence risks for NIDDM and IDDM..	43
Table (4): Recurrence risks for hypertension.....	44

Tables in Results

Table. (1): Prevalence of anti HCV among family contacts to index and control cases.....	65
Table (2): Comparison between the mean age of index and control cases.	65
Table (3): Comparison between the mean age of anti HCV negative and positive contacts to index cases.....	65
Table (4): Comparison between the mean age of anti HCV negative and positive contacts to control cases.	66
Table (5): Sex distribution among index and control cases.....	66
Table (6): Sex distribution among contacts to index cases and its relation to anti-HCV.....	66
Table (7): Sex distribution among contacts to control cases and its relation to anti -HCV.....	67
Table (8): Prevalence of anti-HCV among contacts according to their relation to index cases.....	67

Table (9): Prevalence of anti-HCV among contacts according to their relation to control cases.....	67
Table (10): Comparison between anti-HCV positive and negative spouses of index cases according to duration of marriage.....	68
Table (11): Comparison between anti-HCV positive and negative spouses of control cases according to duration of marriage.....	68
Table (12): Prevalence of risky occupation among index and control cases	68
Table (13): Prevalence of risky occupation among contacts to index cases and its relation to anti-HCV	69
Table (14): Prevalence of risky occupation among contacts to control cases and its relation to anti-HCV.....	69
Table (15): Incidence of Blood transfusion among index and control cases.	69
Table (16): Incidence of Blood transfusion among contacts to index cases and its relation to anti-HCV.	70
Table (17): Incidence of Blood transfusion among contacts to control cases and its relation to anti-HCV.....	70
Table (18): Incidence of surgical operations among index and control cases.	70
Table (19): Incidence of surgical operations among contacts to index cases and its relation to anti-HCV.....	71
Table (20): Incidence of surgical operations among contacts to control cases an its relation to anti-HCV.....	71
Table (21): Incidence of injections with non disposable syringes among index and control cases.	71

III

Table (22): Incidence of injections with non disposable syringes among contacts to index cases and its relation to anti-HCV	72
Table (23): Incidence of injections with non disposable syringes among contacts to control cases and its relation to anti-HCV	72
Table (24): Incidence of frequent dentist visits among index and control cases.	72
Table (25): Incidence of frequent dentist visits among contacts to index cases and its relation to anti-HCV	73
Table (26): Incidence of frequent dentist visits among contacts to control cases and its relation to anti-HCV.....	73
Table (27): Incidence of exposure to identifiable risk factor among anti HCV positive contacts to index cases.	73
Table (28): Comparison between index and control cases according to the locality	74
Table (29): Comparison between anti HCV positive and negative contacts to index cases according to their locality.....	74
Table (30): Comparison between anti HCV positive and negative contacts to control cases according to their locality.	74
Table (31): Comparison between index and control cases according to the stander of life.....	75
Table (32): Comparison between anti HCV positive and negative contacts to index cases according to their stander of life..	75
Table (33): Comparison between anti HCV positive and negative contacts to control cases according to their stander of life.....	75

Table (34): Comparison between anti HCV positive and negative contacts to index cases and its relation to the use of common nail scissors.....	76
Table (35): Comparison between anti HCV positive and negative contacts to control cases and its relation to the use of common nail scissors.....	76
Table (36): Comparison between anti HCV positive and negative contacts to index cases and its relation to the use of common shaving blades.....	76
Table (37): Comparison between anti HCV positive and negative contacts to control cases and its relation to the use of common shaving blades.....	77

LIST OF FIGURES

Fig. (1): Schematic organization of HCV genome	5
Fig. (2): Epidemiologic risk factors among patients with acute and chronic HCV infection in USA	10
Fig. (3): Serologic course of (A) acute HCV infection and (B) chronic HCV infection HCV RNA was detected by the PCR EIA-1 = first-generation enzyme-linked immunosorbent assay for antibody to HCV (c100-3 antigen); EIA-2 = second-generation enzyme-linked immunosorbent assay for antibody to HCV (c200 and c22).....	35
Fig. (4): Human disease as being represented on a spectrum ranging from those which are largely environmental to those which are entirely genetic.....	41
