

**A STUDY OF TUMOR NECROSIS FACTOR ALPHA
IN TRACHEAL ASPIRATES OF
NEWBORNS WITH PNEUMONIA**

THESIS

Submitted for Partial Fulfillment of
Master Degree in Pediatrics

SUPERVISED BY

Prof. Dr.

Kotb Ahmed Tolba

Professor of Pediatrics
Ain Shams University

Prof. Dr.

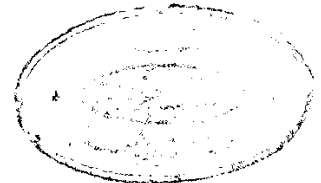

Mohammad Fathalla Moustafa

Assistant Professor of Pediatrics
Ain Shams University

Prof. Dr. Moustafa Mohammad El-Rasad

Professor of Biochemistry
Ain Shams University

**Faculty of Medicine
Ain Shams University
1997**

To My Husband

*Whose love, sacrifice & support
made this work possible*

And to My Family

*Whose encouragement helped
me through*

ACKNOWLEDGMENT

Thanks to Allah.

I would like to express my deepest thanks and profound gratitude to **Prof. Dr. Kotb Ahmed Tolba**, Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for his kind encouragement and help.

I can find no words to express my extreme indebtedness and thanks to **Prof. Dr. Mohammad Fathalla Moustafa**, Assistant Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for his great help, his continuous guidance and time.

I am also greatly indebted to **Prof. Dr. Moustafa Mohammad El-Rasad**, Professor of Biochemistry, Faculty of Medicine, Ain Shams University, for his great help and support in the practical part of this work.

Also my deep thanks are conveyed to the staff members of NICU of Gynaecology and Obstetrics Hospital of Ain Shams University, and to everyone who participated in some way or the other to let this work come to such a final picture.

Lastly, I would like to thank the patients involved in this study, without them this work would not have been accomplished.

Abeer Abdul Rauf Nabawy

LIST OF TABLES

	Page
<i>Review of Literature</i>	
Table (I): Comparison between classical hormones and cytokines.	6
Table (II): Showing names and abbreviations of the cytokines.	10
Table (III): Shows properties of TNF	16
Table (IV): Actions of TNF	20
Table (V): The predominant causative organisms of neonatal infection.	27
<i>Results</i>	
Table (1): Comparison between patients and controls regarding gestational age and weight.	55
Table (2): Comparison of blood picture between patients and controls.	56
Table (3): Percentages of abnormal haematological findings between patients and controls.	59
Table (4): Comparison between patients and controls regarding risk factors of infection.	62
Table (5): Difference in the mean TNF α level between patients group and control group.	63
Table (6): Differences in mean TNF α level between group 1 patients (patients with Klebsiella) and group 2 patients (patients with other organisms).	63
Table (7): Mean TNF α in patients with neonatal pneumonia in relation to presence or absence of risk factors for infection.	66
Table (8): Mean TNF α level of pneumonic neonates in relation to presence or absence of CRP and band cells.	67

	Page
Table (9): Comparison of mean TNF α level among patients with normal leucocytic count, leucocytosis and those with leucopenia.	70
Table (10): Comparison between patients with anaemia and those with normal haemoglobin concentration regarding mean TNF α level.	72
Table (11): Comparison between patients with thrombocytopenia and those with normal platelet count regarding TNF α level.	72
Table (12): Prognosis of patients in relation to studied laboratory parameters.	73
Table (13): Distribution of survivors and non-survivors among patients and controls.	76
Table (14): Distribution of survivors and non-survivors among Group 1 and Group 2 patients.	77
Table (15): Tumor necrosis factor alpha test results in patients and controls.	79
Table (16): Sensitivity, specificity, predictive value positive, predictive value negative and accuracy in diagnosis of neonatal pneumonia.	79
Table (17): Correlation between TNF α level and other studied parameters in neonates with pneumonia.	82

LIST OF FIGURES

	Page
Fig. (1): Standard curve for TNF α assay.	52
Fig. (1): Mean levels of WBC, RBC and Platelet counts in both patients and control group.	58
Fig. (2): Percentages of abnormal haematological findings in studied patients and controls.	61
Fig. (3): Mean level of TNF α in both patients and control groups.	64
Fig. (4): Mean level of TNF α in group 1 and group 2	65
Fig. (5): Mean level of TNF α in patients with +ve C-reactive protein (CRP) versus patients with negative CRP.	68
Fig. (6): Mean level of TNF α in patients with +ve bandaemia versus patients without bandaemia.	69
Fig. (7): Mean level of TNF α in patients with normal WBC's, leucocytosis and leucopenia.	71
Fig. (8): Mean level of TNF α in both patients who died and those who survived.	75
Fig. (9): Distribution of survivors and non-survivors among studied groups.	78
Fig. (10): Individual TNF α levels in pneumonia patients and in the control group.	81

Introduction and Aim of The Work
