BOOK

***Effect of Gamma Radiation on Materials Used for
Removal of Some Environmental Pollutants***

Thesis

Submitted to

Environmental Studies and Research Institute

Ain Shams University

For

M.Sc. Degree of Environmental Science

Department of Biological and Physical Science

By

Nabil Amin Ahmed El-Kelesh

(B.Sc.-Chemistry)

Cairo University

National Center for Radiation Research and Technology

Atomic Energy Authority

Cairo, Egypt

1995

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Acknowledgement

The author is greatly indebted to Professor Dr. **M. S. Abdel Mottaleb**, Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University, to Professor Dr. **A .M. Dessouki**, Head of Radiation Chemistry of Polymers Department, National Center for Radiation Research and Technology (NCRRT) and to Dr. **R.O.Aly** (NCRRT) for suggesting the point of research, supervision, continuous guidance and valuable discussions throughout this work.

My best thanks to Professor Dr. **M. A. Z. El-Behay**, Chairman of NCRRT and to Professor Dr. **E.A. Hegazy**, Head of Radiation Chemistry of Polymers Department for encouragement and care. Many sincere thanks to Professor Dr. **A. Yassin**, Dean of Institute of Environmental studies and Research Ain Shams University and Professor Dr. **Abdalla Ibrahim**, Head of Department of Biological and Physical Science for their valuable help and interest. Also, my best thanks to all my colleagues in the department and the NCRRT.

*Effect of Gamma Radiation on Materials Used for
Removal of Some Environmental Pollutants*

AIM OF THE WORK

CHAPTER I

INTRODUCTION	1
Water importance and control of water pollution.....	1
Pesticides	4
Adsorption	6
Adsorption on active carbon	8
Interaction of gamma-rays with matter	10
a- Effect of gamma-radiation on Water	12
b- Effect of gamma-radiation on aqueous solutions	15

CHAPTER II

LITERATURE REVIEW	19
Adsorption of pesticides from wastewater	19
Effect of gamma-radiation on pesticide solutions	27
Effect of gamma-radiation on activated carbon	28
Effect of gamma-radiation on strong cation exchange resins	30
Effect of gamma-radiation on anion exchange resins	39

CHAPTER III

EXPERIMENTAL	49
1-Materials	49
a- Pesticides	49
- Organophosphorus pesticides	49
- Carbamate pesticides	51
- Chlorohydrocarbon pesticides	52
b-Adsorbents	53
-Granular active carbon	53
- Ion- exchange resins	53
2- Experimental techniques	55
- Gamma irradiation source	55
- U.V. Spectrophotometer	56
- pH-Meter	56
3- Methods used for adsorption studies	59
a- Equilibrium studies	59
b- Kinetic studies	59
c- Column studies	59

CHAPTER IV

RESULTS AND DISCUSSION	60
1- Selective conditions for adsorption isotherm studies on column systems	62
a- Column length	62
b- Column diameter	62

	Page
c- Effect of initial concentration	64
d- Effect of flow rate.	66
2- Adsorption purification of water from pesticides	70
A- Column studies	70
- Radiation regeneration of adsorbents after complete exhaustion	79
- Radiation adsorption purification at the end of steadiness	98
B- Equilibrium studies (Batch Experiments).....	110
- Effect of pH on adsorption capacity	112
- Effect of temperature on adsorption capacity	127
SUMMARY	135
REFERENCES	141
ARABIC SUMMARY	

TABLES AND FIGURES LIST

Tables :	Page
Table (1) : Solubility of pesticides in water	50
Table (2) : Adsorption capacity of Granular Activated Carbon (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant.	76
Table (3) : Adsorption capacity of Dowex -1 (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant.	76
Table (4) : Adsorption capacity of Merck III (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant.	77
Table (5) : Adsorption capacity of Amberlite-X48 (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant.	77
Table (6) : Adsorption capacity of Merck-I (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant.	78
Table (7) : Adsorption capacity of GAC (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant. Irradiations were carried out at the end of steadiness.	106
Table (8) : Adsorption capacity of Dowex-1 (mg/g) for the different pesticides, the volume capacity in liters and the removal percent of the pollutant. Irradiations were carried out at the end of steadiness.	106
