List of Tables

Table No.		Page No.
1	Incidence of Down syndrome in live borns and fetuses in relation to maternal age	10
2	Sex distribution among studied Down syndrome patients	61
3	Age at diagnosis of Down syndrome patients ...	61
4	Birth order of Down syndrome patients	62
5	Maternal age	63
6	Paternal age	63
7	Prenatal history	64
8	Consanguinity	64
9	Associated anomalies in Down syndrome patients	65
10	Karyotype	65
11	Number of mothers above and below 30 years in relation to karyotype	67
12	Relation between maternal age and karyotype .	67
13	Relation between paternal age and karyotype ..	69
14	Relation between sex and karyotype	69
15	Relation between birth order and karyotype ...	70
16	Relation of karyotype to maternal age, and birth order	70
17	Relation between karyotype and anomalies	72
18	Relation between anomalies and sex	72
19	Relation between birth order and anomalies ...	73
20	Relation between prenatal history and anomalies	73
21	Eye manifestations in patients with Down syndrome	74

22	Relation of eye manifestations to I.Q.	74
23	Degree of hearing loss	75
24	Type of hearing loss	75
25	Degree of mental retardation	75
26	Comparison between cases and controls regarding I.Q.	76
27	Comparison between cases and controls regar- ding the hearing threshold at different freque- ncies using play audiometry	76
28	Comparison between cases and controls regar- ding the hearing threshold at different freque- ncies using FFA.	77
29	Comparison between cases and controls regar- ding average threshold in the groups studied by ABR.	77
30	Comparison between cases and control group regarding different waves	78
31	Comparison between cases and controls regarding the wave latencies	78
32	Correlation of PTA2 by FFA and play audio- metry and average threshold by ABR	78
33	Comparison between values of average thresh- old by ABR and average threshold (PTA2) by FFA and play audiometry	80
34	Correlation of degree of hearing loss among Down syndrome patients with different degrees of mental retardation	80
