

**REFINING OF LUBE OILS BASE FOR THE
MANUFACTURE OF WHITE OILS
M. Sc. THESIS.**

Thesis Advisors

1. Dr. Khalid Elewa Hashem
2. Prof. Dr. Samir El. Badrawey
3. Prof. Dr. Sara Mikhail

Approved

Prof. Dr. A. M. Rabie

Head of Chemistry Department

Faculty of Science

Ain Shams University

NOTES

This is to certify that Mis. Mary Riad Eskander, has attended and passed successfully the following post graduate courses as a partial fulfilment of the requirements of the degree of Master of Science, during the academic year 1989.

COURSES

1. Reaction Kinetics
2. Thermodynamics
3. Surface Chemistry
4. Catalysis
5. Physical properties of polymers
6. Computer Science
7. Cement Chemistry
8. Quantum Chemistry
9. Electro-Chemistry
10. Corrosion
11. English language

Prof. Dr. A. M. Rabie

Head of Chemistry Department

Faculty of Science

Ain Shams University

ACKNOWLEDGEMENT

The author wishes to express her sincere appreciation and deep gratitude to **Dr. K.M.E. Hashem** Associate Prof. of Physical Chemistry, Faculty of science, Ain Shams University, for his support and valuable guidance throughout this work.

I would like to submit my great thanks to **Prof. Dr. Samir El-Badrawey**, Head of chemical Refining laboratory in Petroleum Refining Department, (EPRI), for suggesting the subject of this work, his sincere efforts, constant support and talented supervision throughout this work.

I am indebted to **Prof. Dr. Sara Mikhail**, Prof. in Petroleum Refining Department (EPRI), for her sincere efforts, devotion, constant support, talented supervision and for the valuable discussion.

Thanks are also due to **Egyptian Petroleum Research Institute** for providing facilities in the **Refining Department** where this research work was undertaken.

CONTENTS

	Page
SUMMARY	I
INTRODUCTION	III
AIM OF THE PRESENT WORK	VI
 CHAPTER 1	
LITERATURE SURVEY	1
1.1. History of white oils	1
1.2. Production of white Oils	3
1.2.1 Calalytic Hydrogenation	3
A. One stage Hydrogenation	4
B. Two stages Hydrogenation	5
C. Three stages Hydrogenation	6
1.2.2. Extraction Technique.	7
1.2.3. Acid- Refining	8
A. Sulfuric Acid Refining	9
B. Oleum Refining	10
1.3. Clay Minerals	14
1.3.1. Structure of Montmorillonite	16
1.4. Uses of white Oils	19
 CHAPTER II	
EXPERIMENTAL	20
2.1. Feed stocks	20
2.2. Oleum Refining	23
2.2.1. Temperature	23
2.2.2. Amount of Acid.	23
2.2.3. Time of Mixing	24

2.3. Experimental Technique	24
- Clay Finishing.	25
- Preparation of Activated Local Clay.	25
2.4. Analytical Technique	26
2.4.1. Physical Characteristics	26
2.4.2. Structural Group Analysis	27
2.4.3 Components Analysis	28
- Chromatographic Separation Over silica Gel Column.	28
- Ultraviolet Absorption Spectroscopic Analysis	29
CHAPTER III.	
RESULTS AND DISCUSSION	32
3.1. Treatment With Concentrated Sulfuric Acid.	32
3.2. Treatment With Oleum	36
3.2.1 Light Lube Oil Base 90/110	37
A. Effect of Added Oleum	37
B. Effect of Contact time of Mixing	46
C. Effect of Reaction Temperatures	50
3.2.2 Middle Oil Base (140/160)	79
A. Effect of Oleum Amounts at Reaction Temperature 25°C.	79
B. Effect of Oleum Amounts at Reaction Temperature 35°C.	80
3.3.3 Heavy Oil Base (260/290)	90
CONCLUSION	109
REFERENCES	113

LIST OF TABLES
