

**TOXIC EFFECTS OF NARCOTICS:
EXPERIMENTAL STUDIES ON
THE LIVER**

THESIS

Presented to the Faculty of Girls
Ain Shams University

By

IMAN ABDEL-ALEIM ZIADA

Demonstrator

Zoology Department, Faculty of Girls
Ain Shams University

In Partial Fulfilment of the Requirements
For the Degree of
MASTER OF SCIENCE
(In Zoology)

1988

TOXIC EFFECTS OF NARCOTICS: EXPERIMENTAL
STUDIES ON THE LIVER

BOARD OF SCIENTIFIC SUPERVISION

- Professor Dr. Madiha A.M. Ashry, (Ph.D.) 
Head of the Department of Zoology, Professor of
Histochemistry, Faculty of Girls, Ain Shams
University, Cairo, Egypt.
- Dr. Sanaa M.R. Wahba, (Ph.D.) 
Assistant Professor of Histochemistry, Department
of Zoology, Faculty of Girls, Ain Shams University,
Cairo, Egypt.

Head of Department

**TOXIC EFFECTS OF NARCOTICS: EXPERIMENTAL
STUDIES ON THE LIVER**

COURSES

**Studied by the Candidate in Partial Fulfilment of the
Requirements for the Degree of M.Sc.**

- 1- Embryology and Experimental Embryology
- 2- Cytology and Genetics
- 3- Practical Zoology
- 4- German Language

LIST OF TABLES.....	
LIST OF FIGURES.....	
INTRODUCTION.....	1
<u>CHAPTER I:</u> <u>REVIEW OF LITERATURE</u>	3
I. Toxic Effect of Morphine.....	3
1. Morphine lethality.....	3
2. Morphine and animal behaviour...	5
3. General effects of morphine.....	6
II. Liver in Morphine Intoxication.....	12
III. Biochemical and Histochemical Investigation.....	16
<u>CHAPTER II:</u> <u>MATERIAL AND METHODS</u>	22
MATERIAL:	
I. Experimental Animals.....	22
II. Experimental Drug.....	22
III. Tissue Sampling.....	23
IV. Histopathological studies.....	24
METHODS:	
I. Housing of Experimental Animals.....	25
II. Body Weights.....	25
III. Liver Weights.....	25

	Page
IV. Biochemical Methods.....	26
(i) Determination of glycogen content.....	26
(ii) Determination of protein content.....	27
(iii) Determination of lipid content.....	29
(iv) Determination of water content of the liver.....	31
V. Histological and Histochemical Methods	33
VI. Statistical Analysis.....	34
Experimental Design.....	36
 <u>CHAPTER III: RESULTS</u>	 38
<u>Part I: Morphological Investigation</u>	38
1. General behaviour.....	38
2. Growth rates.....	39
3. Absolute liver weights.....	41
4. Relative liver weights.....	44
 <u>Part II: Biochemical Studies</u> .:	 46
1. Glycogen content.....	46
2. Total protein content.....	48
3. Total lipid content.....	51
4. Liver water content.....	54

	Page
<u>Part III:</u> Histological and Histochemical	
Investigation.....	57
I. Control group.....	57
II. Experimental groups.....	62
(I) Histological studies.....	62
(II) Histochemical studies.....	72
(i) Glycogen content.....	72
(ii) Total protein content.....	77
(iii) Lipid content.....	80
CHAPTER IV: DISCUSSION.....	82
I. Morphological Investigation.....	82
II. Histological studies.....	84
III. Biochemical and histochemical	
Investigation.....	86
CHAPTER V: SUMMARY.....	92
BIBLIOGRAPHY.....	97
ARABIC SUMMARY.....	

LIST OF TABLES

	Page
Table (1): Experimental design and group distribution..	1
Table (2): Average growth rate.....	39
Table (3): Averages of absolute liver weights.....	42
Table (4): Averages of relative liver weights.....	44
Table (5): Averages of liver glycogen.....	46
Table (6): Averages of liver total proteins.....	49
Table (7): Averages of hepatic total lipids.....	52
Table (8): Percentage of liver water content.....	55

LIST OF FIGURES

	Page
Fig. 1: Standard calibration curve for protein.....	28
Fig. 2: Standard calibration curve for lipid.....	30
Fig. 3: Average weekly body weights in grams.....	40
Fig. 4: Averages of absolute liver weights in grams...	43
Fig. 5: Averages of relative liver weights to body weights.....	45
Fig. 6: Average change in liver glycogen (mg/100mg wet tissue).....	47
Fig. 7: Average change in liver total protein (μ g/g wet tissue).....	50
Fig. 8: Average change in hepatic total lipid (μ g/g wet tissue).....	53
Fig. 9: Percentage of liver water content.....	56
Fig.10: Section of normal control liver (HX-E).....	58
Fig.11: Enlarged section of normal control liver to show sinusoidal spaces.(HX-E)	58
Fig.12: Section of control liver to show normal distribution of glycogen (Best carmine).....	60
Fig.13: Section of control liver to show normal distribution of total protein (Bromophenol blue).....	60

	Page
Fig. 14: Section of control liver to show normal distribution of fat. (HX-E).....	61
Fig. 15: Section of liver after one week of 50mg/kg morphine injection showing focal infiltrative lesions (HX - E).....	63
Fig. 16: Section of liver after two weeks of 50mg/kg morphine injection showing ill-differentiated degenerative cells with faintly stained cytoplasm (HX - E).....	63
Fig. 17: Section of liver after two weeks of 50mg/kg morphine injection indicating mild haemorrhagic lesions (HX - E).....	64
Fig. 18: Section of liver after three weeks of 50mg/kg morphine injection showing scattered areas of regeneration (HX - E).....	64
Fig. 19: Section of liver after three weeks of 50mg/kg morphine injection showing portal venules dilated and distended with erythrocytes (HX - E).....	66
Fig. 20: Section of liver after four weeks of 50mg/kg morphine injection showing increase in number of Kuppfer cells in sinusoids (HX-E). ..	66
Fig. 21: Section of liver after four weeks of 50m/kg morphine injection showing focal necrosis. (HX - E).....	67

Fig. 22:	Section of liver after one week of 100mg/kg morphine injection showing early degenerative change (HX - E).....	69
Fig. 23:	Section of liver after two weeks of 100mg/kg injection showing inflammatory lesions by mono and polymorphs and red blood cells within dilated sinusoids.(HX - E).....	69
Fig. 24:	section of liver after three weeks of 100 mg/kg injection showing infiltrative lesions replacing degenerative cells (HX - E)......	70
Fig. 25:	Section of liver after four weeks of 100mg/kg morphine injection showing nuclei of necrotic cells densely stained and the cytoplasm swollen and vacuolated (HX - E).....	70
Fig. 26:	Section of liver after four weeks of 100 mg/kg morphine injection showing normal centrilobular (a) and degenerative centrolobular cells (b) (HX - E).....	71
Fig. 27:	Section of liver after six weeks of 100mg/kg morphine injection showing portal tracts invaded by mononuclear inflammatory cell, fibrocytes and lymphocytes (HX-E).....	71
Fig. 28:	Liver section of rats treated with 50 mg/kg morphine showing periportal glycogen distributed as fine deposits within the hepatocytic cytoplasm (Best carmine).....	74

	Page
Fig. 29: Liver sections of rats treated with 50 mg/kg morphine showing increased glycogen deposits (Best carmine).....	74
Fig. 30: Liver sections of rats treated with 50mg/kg morphine showing diminution in amount of stored glycogen (Best carmine).....	75
Fig. 31: Liver sections of rats treated with 100mg/kg morphine showing cells, not involved in degenerative or necrotic changes, heavily loaded with glycogen (Best carmine).....	75
Fig. 32: Liver sections of rats treated with 100mg/kg morphine showing abnormal heterogenous distribution of stainable glycogen (Best carmine).....	76
Fig. 33: Liver sections of rats treated with morphine injection showing heterogenous distribution of total protein content in hepatic lobule (Bromophenol blue)	78
Fig. 34: Liver sections of rats treated with morphine showing inhibition in staining affinity in vacuolar and degenerative areas (Bromophenol blue).....	78
Fig. 35: Liver sections of rats treated with morphine showing increase in staining affinity within regenerating cells Bromophenol blue).....	79

	Page
Fig. 36: Liver sections of rats treated with 50mg/kg morphine showing diffused granules of lipid mainly healthy and regenerative cells (Sudan IV).....	81
Fig. 37: Liver sections of rats treated with 100mg/kg morphine showing necrotic cells devoid of stainable material (Sudan IV).....	81

ACKNOWLEDGEMENT

The author wishes to express her deepest debt of gratitude to Professor Dr. Madiha A.M. Ashry, Head of the Department of Zoology and Professor of Histochemistry, University College for Women, Ain Shams University, for suggesting and planning the work, valuable help and supervision throughout the accomplishment of this work.

I'am also deeply indebted to Dr. Sanna R. Wahba, Assistant Professor of Histochemistry, Department of Zoology, University College for Women, Ain Shams University, for her encouragement, valuable scientific guidance. With her continuous help the work was facilitated and more interesting.
