

EPIDEMIOLOGICAL AND BACTERIOLOGICAL FEATURES OF IMPETIGO IN INFANTS AND CHILDREN

Thesis

Submitted for partial fulfillment of
Master Degree in Dermatology and Venereology

616.526

N. S

Presented by

Nermeen Samy Abd Allah Abd El Fattah
(M.B.,B.CH.)

Under Supervision of

56300

Prof.Dr.Mohammed Hassan El Hefnawi

*Professor of Dermatology and Venereology
Faculty of Medicine, Ain Shams University*

Assist. Prof. Dr.Elham Abd El Zaher Mabrouk

*Assistant Professor of Dermatology and Venereology
Faculty of Medicine, Ain Shams University*

Faculty of Medicine
Ain Shams University
1999

Acknowledgement

*I would like to express my profound gratitude and appreciation to Prof. Dr. **Mohammed Hasan El Hefnawy**, Professor of Dermatology and Venereology, for giving me the privilege to work under his supervision, and for his patience, encouragement and eminent guidance.*

*I am also deeply grateful to Assist. Prof. Dr. **Elham Abd El Zaher**, Assistant Professor of Dermatology and Venereology, who devoted her time, effort and experience to facilitate the production of this study.*

*I would like also to express my gratitude to Prof. Dr. **Ibrahim Khalil**, Head of Bacteriology unit, Clinical Pathology Department for his help in conducting the bacteriological part in this thesis.*

Table (1):.....	(11)
<i>Predisposing factors of impetigo</i>	
Table (2):.....	(21)
<i>Properties distinguishing between S.aureus, S.epidermidis</i> <i>and S. saprophyticus</i>	
Table (3):.....	(49)
<i>Antibiotics for treatment of impetigo</i>	
Table (4):.....	(62)
<i>Age and sex distribution of the patients</i>	
Table (5):.....	(96)
<i>Antibiotic sensitivity for the causative organisms of impetigo</i>	

List of Abbreviations

S.aureus	: Staphylococci aureus
S.epidermidis	: Staphylococci epidermidis
S.saprophyticus	: Staphylococci saprophyticus
MIC	: Minimal inhibitory concentration
C3	: Complement three
FH	: Family history
PH	: Past history
Hb	: Hemoglobin level
