

Evaluation of Thallium-201 (TL-201) Stress-Immediate Reinjection SPECT Scintigraphy In The Detection Of Myocardial Viability

Thesis

Submitted for Partial Fulfillment of
M.D. Degree in
RADIODIAGNOSIS

By

Gehan Fawzy Mohamed

*M.B., B.Ch., M.Sc., Radiodiagnosis
Faculty of Medicine, Ain Shams University*

Supervisors

Prof. Dr. Yossef hamed Zaki

*Prof. of Radiodiagnosis
Faculty of Medicine
Ain Shams University*

Prof. Dr. Ahmed Talaat Khairy

*Prof. of Radiodiagnosis
Faculty of Medicine
Ain Shams University*

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿ قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا
إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ ﴾

صدق الله العظيم

سورة البقرة - آية (٣٢)

To..
My family

Gehan

Acknowledgement

*I find great pleasure in expressing my gratitude towards all those sincerely participated in completing this work. The greatest credit must go to **Prof. Dr. Yossef hamed Zaki**, Prof. of Radiodiagnosis, Ain Shams University, for his valuable assistance, supervision, guidance and help in presenting this work.*

*I would like also to thank **Prof. Dr. Ahmed Talaat Khairy**, Prof. of Radiodiagnosis, Ain Shams University, for his generous help and kind advises.*

*Last; but not least, special thanks are given to **Prof. Dr. Abdel Zahar Hassan**, Prof. and Head of Radiodiagnosis Department, and all the staff of Radiodiagnosis Department, Ain Shams University and my colleagues for all the facilities and support they offered.*

CONTENTS

	<u>Page</u>
Introduction and aim of the work	1
Review of Literature	3
Physiological considerations of myocardial blood supply	3
Pathology of coronary artery disease	16
Review of various techniques for TL-201 SPECT studies	35
Materials and Methods	42
Results and Illustrative Cases	50
Discussion	80
Summary and Conclusion	95
References	98
Arabic Summary	---

LIST OF TABLES

<u>Tab. No.</u>	<u>Page</u>
1	Clinical subgroups in which painless ischemia is likely to be important 32
2	Clinical characteristics of the patient population of this study 43
3	Relationship between immediate-reinjection and 24-hr redistribution imaging in assessment of myocardial viability (patient analysis)..... 52
4	Agreement between exercise/immediate reinjection and exercise/24 hour redistribution scans in terms of patients analysis (cell content = no. of patients)..... 53
5	Relationship between immediate-reinjection and 24-hour redistribution imaging in assessment of myocardial viability 56
6	Agreement between exercise (immediate reinjection and exercise/24 hour redistribution scans in terms of segmental analysis (cell content = no. of segments)..... 57

LIST OF FIGURES

<u>Fig. No.</u>	<u>Page</u>
1 Anatomy of th coronary vessels.....	3
2 Phasic flow of blood through the coronary capillaries of the human left ventricle (as extrapolated from studies in dogs).....	6
3 Coronary vessels A. anterior veiw B. posterior view.....	19
4 Plaques in coronary arteries.....	23
5 Patterns of myocardial infarction.....	25
6 Site of myocardial infarction and vessel involvement.....	26
7 Nomogram of 116 patients with perfusion defects immediately after exercise	51
8 Nomogram of 323 perfusion defects immediately after exercise.....	55
9 Examples of scans with reversible defects only on 1-hour immediate reinjection images, which showed no change on 24-hour redistribution images	59
10 Examples of scans with reversible defects only on 1-hour immediate reinjection images, which showed no change on 24-hour redistribution images	61
11 Examples of scans with reversible and persistent defects on 1-hour immediate	

	reinjection study, which showed no change in 24-hr redistribution images.....	63
12	Examples of scans with reversible and persistent defects on 1-hour immediate reinjection study, which showed no change in 24-hr redistribution images.....	65
13	Example of scans with persistent defects on 1-hr immediate reinjection images that showed no change on the 24-hr redistribution images	67
14	Example of scans with reversible defects on 1-hr immediate reinjection images, which showed additional fill-in on 24-hr redistribution images, yet this didn't change the final conclusions	69
15	Example of scans with reversible and persistent defects, where some of the persistent defects showed additional fill-in on the 24-hour redistribution images	71
16	Example of scans with reversible and persistent defects on 1-hr immediate reinjection images, where the persistent defects showed fill-in on the 24-hour redistribution images	73
17	Example of scans with reversible and persistent defects on 1-hr immediate reinjection images, where the persistent
