

Anesthetic Management of Traumatic CNS Injury

Essay Submitted for Partial Fulfillment
of Master Degree in Anesthesiology

BY

Amal Hamed Rabei

M.B.B.Ch., Faculty of Medicine, Ain Shams University

Supervised BY

Prof. Dr. Rakia Mohammed Amin Sheir

Professor of Anesthesia and Intensive Care

Faculty of Medicine - Ain Shams University

Prof. Dr. Mohammed Ali Zaghloul

Professor of Anesthesia and Intensive Care

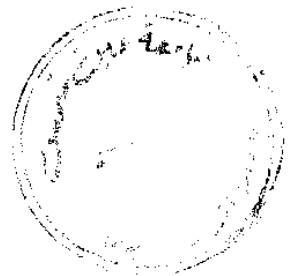

Faculty of Medicine - Ain Shams University

Dr. Omar Mohammed Taha El-Safty

Lecturer of Anesthesia and Intensive Care

Faculty of Medicine - Ain Shams University

**Faculty of Medicine
Ain Shams University
*** 1998 *****

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا سبحانك لا علم لنا

إلا ما علمتنا إنك أنت

العليم الحكيم

صدق الله العظيم

Acknowledgment

First and foremost, I thank **Allah**, the most Benificent and most Merciful for the fulfillment of this work.

I would like to express my sincere gratitude to **Prof. Dr. Rakia Mohammed Amin Sheir**, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her kind supervision, valuable suggestions, and spending quite precious time for the completion of this work.

My deepest thanks to **Prof. Dr. Mohamed Ali Zaghloul**, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his kind guidance and valuable supervision.

I am greatly indebted to **Dr. Omar Mohammed Taha El-Safty**, Lecturer of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his advice, continuous encouragement and interest in the progress of this work.

I would like to express my deepest thanks to my family, especially to my lovely mother for her support and encouragement.

I would also like to thank all my friends, colleagues, and staff of Anesthesiology Department, Ain Shams University, for their outstanding assistance and kind care.

Amal Hamed Rabei

List of Contents

	PAGE
Introduction	1 – 2
Chapter 1: Physiological Considerations	3 – 16
Functional anatomy of the brain	
Cerebral blood supply	
Blood supply of the spinal cord	
Cerebral metabolism	
Cerebrospinal fluid	
Intracranial pressure	
Chapter 2: Pathophysiology of CNS Trauma	17 – 22
Primary injury	
Secondary injury	
Chapter 3: Complications of CNS Injury	23 – 32
Chapter 4: Anesthetic Management of CNS Trauma	33 – 112
Prehospital evaluation	
Clinical presentation	
Monitoring	
Diagnostic modalities	
ICP control	
Cerebral protection	
Anesthetic technique	
Postoperative and intensive care management	
Ethical issues	
Summary	113 – 116
References	177 – 134
Arabic Summary	1 – 3

List of Tables

No.	Table	Page
Table (1):	Systemic complications of acute head injury.	23
Table (2):	Systemic complications of acute spinal cord injury.	24
Table (3):	Problems associated with severe spinal cord injuries at different levels.	26
Table (4):	Factors often associated with life threatening injury.	34
Table (5):	Glasgow Coma Score.	41
Table (6):	Electroencephalographic changes during anesthesia.	55
Table (7):	Effect of anesthetic agents on evoked potentials.	58
Table (8):	Faults in technique leading to raised ICP.	93

List of Figures

No.	Figure	Page
Figure (1):	Lateral aspect of the cerebral cortex.	4
Figure (2):	Cerebral circulation.	7
Figure (3):	Cerebral autoregulation.	9
Figure (4):	Blood supply of the spinal cord.	12
Figure (5):	Intracranial compliance curve.	16
Figure (6):	The main intracranial and extracranial causes of secondary injury to the brain.	20
Figure (7):	Arachidonic acid cascade.	22
Figure (8):	The N-methyl-D-aspartate (NMDA) receptor.	76

Introduction
