# ACKNOWLEDGMENT

*I would like to express my deepest thanks and gratitude to Prof. Dr. Ahmed Sedky Abdul Rahman, professor of surgery, Faculty of Medicine, Ain Shams University, for his keen interest, meticulous supervision, constant guidance.*

*I would also like to express my sincere gratitude to Dr. Hisham Abdul Raouf El-Akkad, Lecturer of surgery, Faculty of Medicine, Ain Shams University, for his valuable support, kind advice, and help in bringing this work forward.*

## **CONTENTS**

1- Introduction .....	1
2- Aim of the work.....	3
3- Review of literature	
• Pathophysiology .....	4
• Aetiology of intraperitoneal adhesions .....	18
• Surgical pathology .....	25
• Prevention of adhesions .....	31
• Clinical picture .....	36
• Management of adhesive intestinal obstruction .....	43
4- Patient and Method .....	60
5- Results .....	71
6- Discussion .....	81
7- Conclusion .....	99
8- Summary .....	100
9- References .....	102
10- Arabic Summary

## LIST OF TABLES

Table	Page
1.Type of previous surgery producing adhesive intestinal obstruction.	19
2.Sites of postsurgical adhesions in 210 patients with previous abdominal surgery.	26
3.Site of adhesions which produced obstruction in 80 cases of adhesive obstruction	28
4.Distribution of patients in the age groups	73
5.Hospital variables in 45 admissions for postoperative adhesive intestinal obstruction	80
6.Spectrum of intestinal obstruction of large and small bowel in the UK & USA in the latter half of this century	81
7.Spectrum of small bowel obstruction.	82
8.Proportion of obstructions which require surgery produced by adhesions in the most recent series of intestinal obstructions of both large and small bowel.	82
9.Experienced clinical judgment in small-intestinal obstruction (preoperative diagnosis of strangulation).	87
10.Characteristics of simple and strangulated obstruction.	88
11.Physical findings in mechanical closed loop obstruction.	94
12.Pain symptoms in mechanical closed loop obstruction.	94
13.Hospital variables in 297 admissions for postoperative adhesion ilues strangulated versus viable bowel (Operative findings).	95
14.Proposed Discriminate parameters in small bowel obstruction	97

## LIST OF FIGURES

Figure	Page
1. Diagrammatic representation of three components contributing to intestinal obstruction.	29
2. Technique of intestinal plication popularized.	55
3. The modified <b>Childs-Phyllips</b> transmesenteric plication procedure for complex adhesion.	57
4. Multiple fluid levels in erect films.	65
5. Concertina pattern with jejunal loops.	66
6. Featureless tube with ileal loops.	67
7. Haustrations in case of colonic obstruction.	68
8. Distribution of sex.	71
9. Number of patient in each group.	71
10. Distribution of sex in each group.	72
11. Distribution of age.	72
12. Period of hospital stay.	73
13. Operatively managed group.	79
