

Some Hydrodynamic Problems with Moving Boundary Conditions

Thesis

*Submitted in Partial Fulfillment for the
Requirement of the Master Degree in Teacher
Preparation in Science (Applied Mathematics)*

To

Department of Mathematics
Faculty of Education-Ain Shams University

Under Supervision of

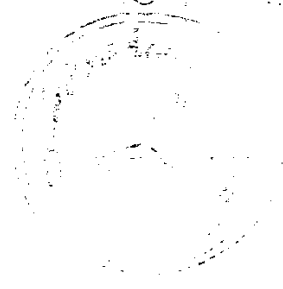

Prof. Dr. El-Sayed F. El-Shehawey,
Head of the Department of Mathematics,
Faculty of Education,
Ain Shams University.

E. F. El-Shehawey

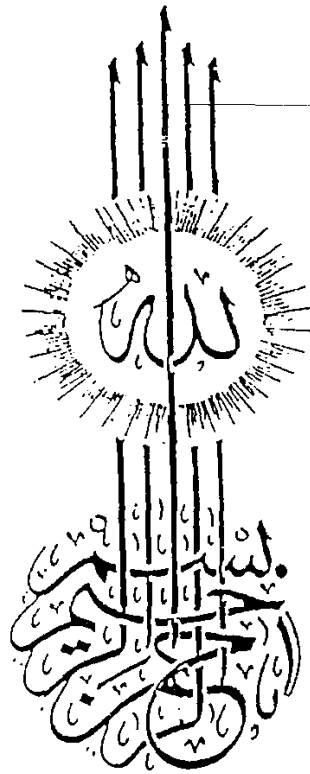

Dr. H. E. Gad -Allah,
Lecturer of Mathematics,
Faculty of Education,
Ain Shams University.

H. E. Gad -Allah

FAMILY**

Acknowledgements

Acknowledgements

I am deeply thankful to Allah, who always helps and guides me.

I would like to express my deepest gratitude and special thanks to **Prof. Dr. El-Sayed F. El-Shehawey**, Head of the Department of Mathematics, Faculty of Education, Ain Shams University, for suggesting the points, helpful guidance and for offering me valuable facilities during the supervision of this thesis .

I would like to express my deepest gratitude to **Dr. H. Gad-Allah**, Lecturer of Mathematics, Faculty of Education, Ain Shams University for his kind supervision and cooperation .

Finally, many thanks to the staff of the Department of Mathematics, Faculty of Education, Ain Shams University, specially **Dr. Elsayed M. E. Elbarbary**, for their continuous encouragement.

Contents

		Page
	Preface.....	I
Chapter I	Introduction.....	1
1.1	Development of Fluid Mechanics.....	1
1.2	Newtonian and Non-Newtonian Fluids.....	7
1.3	Travelling and Standing Waves.....	8
1.4	Free, Moving and Mixed-Boundary Value Problems	8
1.5	Dimensions and Units.....	10
1.6	Reynolds Number and Froude Number.....	13
1.7	On Two-Phase Flow.....	14
1.8	On Virtual Mass.....	16
1.9	On Perturbation Method.....	17
1.10	The Human Ureter.....	19
1.11	The Peristalsis in Small Intestine.....	20
1.12	The Basic Equations for a Pure Fluid.....	24
1.13	The Basic Equations for a Two-Phase Flow.....	26
Chapter II	The Effect of Virtual Mass on Peristaltic Transport of a Particle-Fluid Suspension.....	28
2.1	Introduction.....	28
2.2	Formulation of the Problem.....	30

2.3	Method of Solution.....	37
2.4	Free Pumping (Originally Stationary Fluid).....	43
2.5	Numerical Results and Discussions.....	46
Chapter III	Peristaltic Pumping of a Fluid in an Inclined Planer Channel.....	72
3.1	Introduction.....	72
3.2	Formulation of the Problem.....	73
3.3	Method of Solution.....	76
3.3.1	Closed Form Solutions for Small Values of Re and K_1	79
3.3.2	Method of Solution for Arbitrary Values of Re and K_1	83
3.4	Numerical Results and Discussions.....	86
	References.....	110

Preface
