الله

ACKNOWLEDGMENT

I would like to express my deep gratitude to Professor Dr. FATMA SEDDIK MAHMOUD, Professor of Radiodiagnosis, Ein Shams University, for her patience, insight, and wise guidance. It was her kind encouragement and support that allowed the completion of this work.

I would like further to extend my appreciation and gratefulness to Dr. HASSAN GALAL ISMAIL, Lecturer of Radiodiagnosis, Ein Shams University, for his valuable assistance and helpful suggestions during the preparation of this work.

To my family

Contents

• Introduction and Aim of the work	1
• Anatomical Considerations	2
• Pathology of Acute Cerebral Ischemia	25
• MRI Findings in Acute Cerebral Ischemia	30
• Other MRI Techniques Used in Evaluation of Acute Cerebral Ischemia	72
• Summary and Conclusion	85
• References	87
• Arabic Summary	

List of Figures

Figure	Title	Page
1	Digitally subtracted arterial phase of carotid arteriogram, Anteroposterior projection.	4
2	Digitally subtracted arterial phase of carotid arteriogram, Lateral projection.	5
3	Digitally subtracted arterial phase of vertebral arteriogram, Anteroposterior projection.	8
4	Digitally subtracted arterial phase of vertebral arteriogram, Lateral projection.	9
5	Digitally subtracted venous phase of carotid arteriogram, Anteroposterior projection.	13
6	Digitally subtracted venous phase of carotid arteriogram, Lateral projection.	14
7	Arterial vascular territories-Axial plane.	19,20,21
8	Arterial vascular territories-Coronal plane.	22,23,24
9	Thrombotic infarct in the distribution of left MCA.	31
10	Acute infarct confined to the distribution of the right PICA.	32
11	Hemorrhagic subacute infarct in right parietal region.	34
12	Chronic infarct in the distribution of the left MCA.	35
13	Thrombotic pontine and left cerebellar infarctions.	38
14	Embolic infarction in distribution of left PICA and branch of left MCA.	41
15	Hemorrhagic infarction in distribution of right PCA.	42
16	Lacunar infarction involves the right putamen.	46
17	Chronic lacunar infarcts.	48
18	Mild ischemic-gliotic changes in centrum	50

	semiovale.	
19	Moderate-severe ischemic-gliotic changes in deep white matter.	51
20	Ischemia and infarction caused by CNS vasculitis in SLE.	54,55
21	Brain stem ischemia and infarction in Behçet's disease.	56
22	Infarction caused by tuberculous meningitis.	57
23	Ischemic changes secondary to vasospasm of ICA and its branches.	59
24	MR images of diffuse hypoxic brain damage.	63
25	MR findings in carbon monoxide poisoning.	64
26	Acute left ICA dissection.	67
27	MR findings in Moyamoya disease.	68
28	Thrombosis of deep cerebral veins and superior sagittal sinus.	71
29	Watershed infarct, pre- and post-Gd DTPA.	73
30	Subacute cerebral infarction pre- and post-Gd DTPA.	74
31	Cortical ischemic lesion by diffusion weighted and T2-weighted images.	77
32	MR and metabolite images obtained 24 hours after stroke.	79
33	MR angiogram and arteriogram in MCA occlusion.	83

INTRODUCTION & AIM OF THE WORK
