MY FIANCE

ACKNOWLEDGEMENT

The credit of bringing this work to light goes to the masterly teaching our Professor Dr. Hoda El Deeb, Professor of Radiodiagnosis, Ain Shams University, who encouraged me too much, she suggested the subject, set up the plan and offered brilliant ideas from the start to the end. Her unfailing efforts, unlimited support, valuable criticism, meticulous close supervision and continuous advice were to me the best guide during the different stages of this work.

I am particularly so thankful to Dr. Fatma Seddik, Assistant Professor of Radiodiagnosis, Ain Shams University, for her perpetual guidance and generous help which where to me so pushing and stimulating.

My Deep thanks go to Professor Dr. Zeinab Abdallah, Head of Radiodiagnosis Department, Ain Shams University, for her thorough concern.

Also, a great deal of gratitude should be saved to Professor Dr. Abdel Zaher Hassan, Professor of Radiodiagnosis, Ain Shams University and Professor Dr. Hosneya Afifi, Professor of Radiodiagnosis, El-Azhar University, for their kindness in supplying me with many references in concern and for them no words of praise are sufficient.

I would like to express my profound appreciation to Dr. Hesham Mahmoud, Lecturer of Radiodiagnosis, Ain Shams University, for his valuable, sincere cooperation and resourceful knowledge.

I am too much grateful to Dr. Ahmed Khodair, Assistant Lecturer of Radiodiagnosis, Ain Shams University, for his helpful remarks in the completion of this essay.

Also, my unlimited gratitude to all my Professors, Colleagues and Staff members of Radiodiagnosis Department, Ain Shams University.

Sameh
