HYPEROSMOLAR STATES AND ANESTHETIC MANAGEMENT

Essay submitted for partial fulfillment
of Master degree in Anesthesiology

By

Ashraf Barakat El-Sayed

*M.B.B. Ch., Faculty of Medicine,
Ain Shams University*

Supervised By

Prof. Dr. Nahed Effat Yousef

*Professor of Anesthesia and Intensive Care Department
Faculty of Medicine – Ain Shams University*

Dr. Seham Hesin Mohammed

*Lecturer of Anesthesia and Intensive Care
Faculty of Medicine – Ain Shams University*

**Faculty of Medicine
Ain-Shams University**

*****1998*****

بسم الله الرحمن الرحيم

قالوا سبحانك لا علم لنا
إلا ما علمتنا إنك أنت
العليم الحكيم

صدق الله العظيم

﴿سورة البقرة - الآية ٣٢﴾

Acknowledgment

First, thank are all due to **God** for blessing this work, until it has reached its end, as a part of his generous help throughout my life.

I would like to direct special thanks to **Prof. Dr. Naahed Effat Yousef**, professor of Anesthesia and intensive care department, faculty of medicine, Ain Shams University, for her close supervision, continuous help great support and encouragement she gave me throughout the whole work, and the tremendous effort she has done in the meticulous revision of the whole work, it is a great honor to work under her guidance and supervision.

I would like to express my sincere gratitude to **Dr. Seham Hesin Mohamad**, lecture of anesthesia and intensive care faculty of medicine, Ain Shams university for her great support throughout the whole work.

Ashraf Barakat

List of Contents

	Page
Introduction	1
Chapter 1: Physiology of Body water and electrolyte balance	2-28
Chapter 2: Causes of hyperosmolar states	29-57
Chapter 3: Management of hyperosmolar states	58-67
Chapter 4: Anesthetic management of hyperosmolar States	68-70
Summary	71-72
References	73-87
Arabic Summary	1-2

List of Tables

No.	Table	Page
Table 1 :	Distribution of TBW [based on an average 70 Kg adult male].	2
Table 2 :	Daily water losses (ml.) under different conditions.	7
Table 3 :	Composition of different fluid compartment.	7
Table 4 :	Osmolar substances in ECF and ICF (mosm./liter H ² O).	9
Table 5 :	Factors that influence ADH secretion in humans.	17
Table 6 :	Principal effectors involved in volume regulation.	20
Table 7 :	Conditions that increase renin secretion.	21
Table 8 :	Stimuli that increase aldosterone secretion.	23
Table 9 :	Physiological changes due to pure water loss.	37
Table 10 :	Etiology of CDI.	39
Table 11 :	Etiology of NDI.	42
Table 12 :	Drug-induced nephrogenic diabetes insipidus	43
Table 13 :	Results of dehydration testing.	47
Table 14 :	Physiological changes due to hypotonic fluid loss.	50
Table 15 :	Routes of hypotonic Fluid loss.	50
Table 16 :	Therapeutic hypertonic solutions.	52
Table 17 :	Factors predisposing to HHS	54
Table 18 :	Features of diabetic ketoacidosis (DKA) and hyperosmolar nonketotic coma (HNKC)	57
Table 19 :	Drugs used in treatment of diabetes insipidus	62

List of Figures

No.	Figure	Page
Figure 1 :	Regulation of ADH secretion.	16
Figure 2 :	Effects of aldosterone on Na⁺, K⁺, and H⁺ balance.	24
Figure 3 :	Hormones that control water, salt and blood pressure.	28
