Acknowledgment

I wish to express my deep appreciation and gratitude to Dr. *Mohsen S. El Sify* Professor of Pediatrics, Ain Shams University, for giving me the privilege of working under his supervision, great support, encouragement, patience, enthusiasm and helpful guidance. His advises are always stimulating and essential to complete this work.

I also express my deep thanks and gratitude to Dr. *Aisha Mamdouh Kafez* Lecturer of bacteriology. Department of Microbiology and Immunology. Ain Shams University, for her stimulating suggestions, valuable instructions and generous help.

To all the patients and their families and to every one who participated in some way or other to let this work come to such a final picture, I owe my thanks and gratitude.

Contents

Subjects	Page
• Introduction and Aim of The Work	1
• Review of Literature:	3-54
Chapter I: Childhood Malignancies	3
Chapter II: Febrile Neutropenia in Childhood Malignancy	18
Chapter III: Bacterial and Fungal Infections in Febrile Neutropenic Children With Cancer	22
Chapter IV: Cytokines	48
• Subjects and Methods	55
• Results	61
• Discussion	82
• Summary and Conclusion	92
• References	98
• Arabic Summary.	

List of Tables

Table No.	Subjects	Page
I	Prognostic factors in ALL	11
II	Prognostic factors in ANLL	12
III	An effective treatment regimen for standard - risk ALL	14
IV	Causes of leucopenia and/or neutropenia	20
V	Bacterial causes of febrile episodes in neutropenic patients.	30
VI	Clinically significant neutrophil counts	32
VII	Presents commonly used regimens for managing infections in cancer patients	37
VIII	Modification of therapy	42
IX	Bioactivities of IL-1B	49
X	Bioactivities of GM-CSF	53
1	The parameters of the patients group	68
2	The parameters of the control group	69

Cont. List of Tables

Table No.	Subjects	Page
3	The number and percentage of the documented infection group as well as the suspected infection group in both the patients group and the control group	70
4	The isolated organisms and their number in the patients group versus the control group	70
5	Statistical comparison between mean values of serum CRP, IL-1B and GM-CSF in patients versus normal control ...	71
6	Statistical comparison of the mean values of CRP, IL-1B and GM-CSF in patients with documented infection versus patients with suspected infection.	72
7	Statistical comparison of the mean values of ANC, CRP, IL-1B and GM-CSF in patients with gram-positive infection, gram-negative infection and fungal infection	73
8	Statistical comparison of the mean values of CRP, IL-1B and GM-CSF in the 3 patients who died versus all patients	74

List of Tables

Table No.	Subjects	Page
9	Statistical comparison of the mean values of ANC, duration of neutropenia and fever in the 3 died patients versus all patients	75
10	Statistical comparison of both IL-1B and GM-CSF mean values (pg/ml) according to fever and ANC	76
11	Statistical comparison of the mean values of IL-1B and GM-CSF (pg/ml) according to corticosteroids and antibiotics therapy	77
12	Correlation between different parameters	77
13	Comparison between IL-1B and GM-CSF values during febrile attack and those after relief of fever	77

List of Figures

Fig. No.	Subjects	Page
I	Algorithm for the initial management of the patient with fever of unexplained origin and neutropenia	37
1	Correlation between IL-1B and temperature	78
2	Correlation between IL-1B and ANC	79
3	Correlation between GM-CSF and ANC	80
4	Correlation between GM-CSF and temperature	81

List of Abbreviations

AL	: Acute Leukemia.
ALL	: Acute Lymphocytic Leukemia.
ANC	: Absolute neutrophil count.
ANLL	: Acute non lymphocytic leukemia.
cALLa	: Common ALL antigen.
cDNA	: Complementary deoxyribonucleic acid.
CSF	: Colony stimulating factor.
DNA	: Deoxyribonucleic acid.
GM-CSF	: Granulocyte - macrophage colony stimulating factor.
HD	: Hodgkin's disease.
GPI	: Gram positive infection.
IL-IB	: Interleukin I-B.
IL-IRA	: Interleukin I-receptor antagonist.
LS	: Lymphosarcoma.
NHL	: Non Hodgkin lymphoma.
PBPC	: Peripheral blood progenitor cell.
PG-E ₂	: Prostaglandin E ₂ .
PUO	: Pyrexia of unknown origin.
rh-GM-csf	: Recombinant human GM-CSF.
RNA	: Ribonucleic acid.
TNF	: Tissue necrosis factor.
WBC _s	: White blood cells.
BFU-E	: Blood forming unit-erythroid.
