

**COMPARITIVE STUDY BETWEEN EARLY ENTERAL
VERSUS PARTIAL PARENTERAL FEEDING IN BURNED
CHILDREN**

Thesis

**Submitted in partial fulfillment of the
M. D. Degree in Anesthesiology**

By

Sanaa Mohamed Mohamed El-Fawal
M.B., B. Ch., M.Sc., Ain Shams University

Under the Supervision of

Prof. Dr. Kamal Zaki Afify Kodeira

*Professor of Anesthesia and Intensive Care
Faculty of Medicine, Ain Shams University*

Prof. Dr. Fikry Fouad Ahmad El-Bokl

*Professor of Anesthesia and Intensive Care
Faculty of Medicine, Ain Shams University*

Dr. Bassel Mohamed Essam Nour El-Dien

*Lecturer of Anesthesia and Intensive Care
Faculty of Medicine, Ain Shams University*

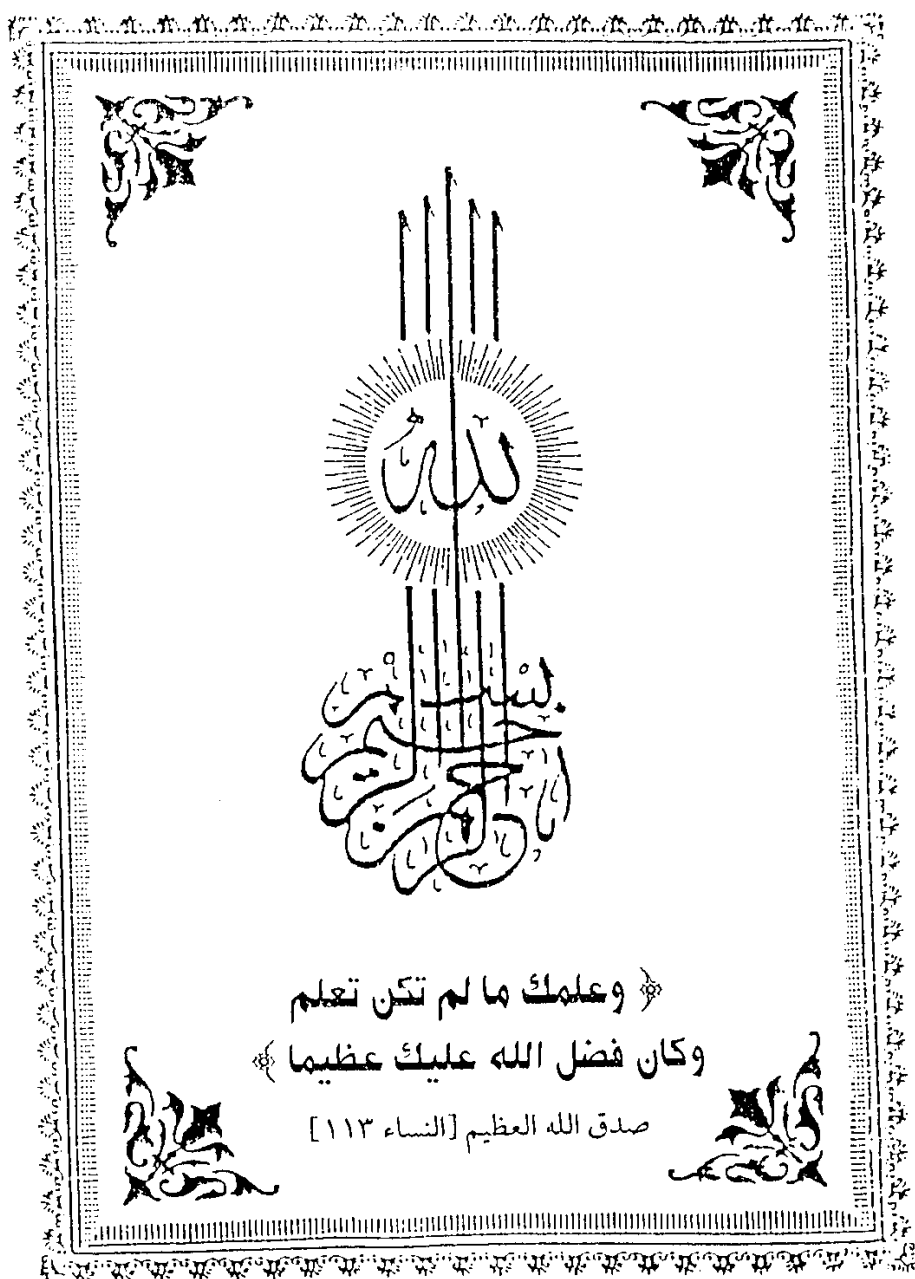

Dr. Mona Fathy Yousef

*Lecturer of Clinical Pathology
Faculty of Medicine, Ain Shams University*

**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY**

1999

This work is dedicated to
*my great father and mother,
my husband and kids*

1

Acknowledgment

Thanks are all to *Allah* for giving me the chance, patience, ability and time to accomplish this work, as a little part of his generous help throughout life.

I would like to express my sincere appreciation and deep gratitude to ***Prof. Dr. Kamal Zaki Affify Kodeira***, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his constant help and guidance throughout this work.

My grateful thanks are due to ***Prof. Dr. Fikry Fouad Ahmad El Bokl***, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his great support, patience and tremendous effort he has done in the meticulous revision of this work.

My deep thanks are offered to ***Dr. Bassel Mohamed Essam Nour El-Dien***, lecturer of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his sincere help, support and cooperation throughout the work.

It gives me a great pleasure to express my deep gratitude to ***Dr. Mona Fathy Youssef***, lecturer of clinical pathology, Faculty of Medicine, Ain Shams University, for her sincere help and cooperation.

Thanks are due to my professors and colleagues in the department of anesthesia and intensive care either for their help or advice. Moreover, I would like to express my thanks to ***Dr. Amro Magdi***, lecturer of plastic surgery, Faculty of Medicine, Ain Shams University, for his helpful assistance.

Last but not least, I owe my beloved family an expression of gratitude for their patience, encouragement and moral support which made this work possible.

Sanaa Mohamed El-Fawal

LIST OF CONTENTS

	PAGE
– Introduction	1 - 2
– Aim of the Work	3
– Literature Review	4 - 49
Pathophysiological changes after thermal injury	4 - 12
Feeding of thermally injured child	13 - 27
Methods of nutritional support	28 - 41
Assessment of nutritional state of thermally injured children	42 - 49
– Patients and Methods	50 - 53
– Results	54 - 66
– Discussion	67 - 77
– Conclusion	78
– Summary	79 - 80
– References	81 - 98
– Arabic Summary	1 - 3

LIST OF FIGURES

Figure No.	Caption	Page
1	Glucose oxidation and fatty acid synthesis from glucose	16
2	The percentage of CO ₂ excretion from glucose oxidation in relation to the rate of I.V. glucose infusion.	16
3	Respiratory quotient in relation to the rate of I.V. glucose infusion.	17
4	Demographic data for enteral and combined feeding groups with BSAB < 30 %	58
5	Demographic data for enteral and combined feeding groups with BSAB > 30 %	58
6	Weight changes in enteral and combined feeding groups with BSAB < 30 %	60
7	Weight changes in enteral and combined feeding groups with BSAB > 30 %	60
8	Mean hemoglobin levels in all groups	61
9	Mean albumin levels in all groups	63
10	Changes in transferrin level for the enteral and combined feeding groups with BSAB < 30 %	64
11	Changes in transferrin level for the enteral and combined feeding groups with BSAB > 30 %	64
12	Incidence of gastrointestinal complications in all groups.	66

LIST OF TABLES

Table No.	Caption	Page
1	Estimation of macronutrient requirements	24
2	Micronutrient protocols for parenteral and enteral diets.	26
3	Example of values of different food stuff.	29
4	Common enteral nutrition formulas.	31
5	Demographic data for enteral and combined feeding groups with BSAB < 30 %.	57
6	Demographic data for enteral and combined feeding groups with BSAB < 30 %.	57
7	Weight changes for enteral and combined feeding groups with BSAB < 30 %.	59
8	Weight changes for enteral and combined feeding groups with BSAB > 30 %.	59
9	Laboratory data for enteral and combined feeding groups with BSAB < 30 %.	61
10	Laboratory data for enteral and combined feeding groups with BSAB > 30 %.	61
11	Liver and kidney functions for enteral and combined feeding groups with BSAB < 30 %.	62
12	Liver and kidney functions for enteral and combined feeding groups with BSAB > 30 %.	62
13	Plasma proteins for enteral and combined feeding groups with BSAB < 30 %.	63
14	Plasma proteins for enteral and combined feeding groups with BSAB > 30 %.	63
15	Immunological status for enteral and combined feeding groups with BSAB < 30 %.	65
16	Immunological status for enteral and combined feeding groups with BSAB > 30 %.	65
17	Gastrointestinal complications.	66
