Degree: Philosophy Doctoral of Science (Ph.D. degree in Physics)

Title: Radon and thoron measurements in ancient Egyptian places using developed nuclear techniques.

Name: Mohamed Ehab Ahmed Fakher El-Din Bakr

Thesis Advisors	Approved
Prof. Dr. Samir El-Kamessy Professor, Physics Department, Faculty of Science, Ain Shams University.	----------
Prof. Dr. Soad Abdel Monam El-Fiki Professor, Physics Department, Faculty of Science, Ain Shams University.	----------
Prof. Dr. Ossama Nasser Head of Basic Science Department, Faculty of Engineering and Technology, Future University in Egypt.	----------
Prof. Dr. Werner Rühm Head of Individual Dosimetry Group, Institute of Radiation Protection, Helmholtz Center in Munich, Germany	----------
Ass. Prof. Elsayed Salama Ahmed Assistant Professor, Physics Department, Faculty of Science, Ain Shams University	----------

Acknowledgement

I would like to express my heartfelt thanks and deeply grateful to:

Prof. Dr. Samir El-Khameesy.
Prof. Dr. Soad El-Fiki.
Prof. Dr. Ossama Nasser.
Prof. Dr. Werner Rühm.
Assistant Prof. El-Sayed Salama.

For their supervision, continuous and useful advice, helpful support and discussions, encouragement and guidance throughout this dissertation. I really owe much of my success in the accomplishment of this work to them.

I dedicate my deep thanks to the **Future University in Egypt** for the excellent financial support they always offered.

Furthermore, I would like to express my deeply indebted to **Institute of Radiation Protection, Helmholtz Center in Munich** for the experimental facilities they offered during this dissertation.

Abstract		I
Summary		IV
List of Figures		VI
List of Tables		XI
Chapter 1: Introduction		
1.1	Introduction	1
1.2	Literature review	3
1.2.1	Historical background	3
1.2.2	Radon and thoron measurements	4
1.3	Scope and objectives of the present study	8
Chapter 2: Theoretical Aspects		
2.1	Radon	10
2.1.1	Radon properties	10
2.1.2	Radon isotopes	11
2.1.3	Radon daughters	12
2.1.4	Radon risks	13
2.1.5	Radon emanation	14
2.1.6	Radon transport and diffusion	15
2.1.7	Radon concentration in air	16
2.1.7.1	Indoor radon concentration	16
2.1.7.2	Outdoor radon concentration	17
2.2	Radiation health hazards	18
2.2.1	Radium equivalent activity (Ra_{eq})	18
2.2.2	The internal external absorbed dose rate (D)	18

2.2.3	The annual effective dose (EAD)	19
2.2.4	The external hazard index (H_{ex})	19
2.2.5	The representative level index ($I_{\gamma r}$)	20
2.3	Equilibrium factor and working level	20
2.4	Occupational radon exposures and effective	21
2.5	Thoron effective doses	22

Chapter 3: Features of Studied Regions

3.1	History	23
3.2	Geography of Egypt	24
3.3	Studied regions and their features	26
3.3.1	Saqqara	26
3.3.1.1	East sector	27
3.3.1.1.1	Zoser Pyramid	27
3.3.1.1.2	South tomb of Zoser Pyramid	28
3.3.1.2	Western sector	29
3.3.1.2.1	Serapeum	29
3.3.2	Luxor	30
3.3.2.1	Valley of kings	31
3.3.2.1.1	Tomb of RAMESES II SONS (KV 5)	32
3.3.2.1.2	Tomb of RAMESES II (KV 7)	33
3.3.2.1.3	Tomb of RAMESES V and RAMESES VI (KV 9)	34
3.3.2.1.4	Tomb of BAY (KV 13)	35
3.3.2.1.5	Tomb of “Unknown Name” (KV 21)	36
3.3.2.1.6	Tomb of “Unknown Name” (KV 26)	36
3.3.2.1.7	Tomb of “Unknown Name” (KV 31)	37
3.3.2.1.8	Tomb of TIA’A (KV 32)	38
3.3.2.1.9	Tomb of THUTMES III (KV 34)	39
3.3.2.1.10	Tomb of AMENHETEP II (KV 35)	40
3.3.2.1.11	Tomb of THUTMES I (KV 38)	41

3.3.2.1.12	Tomb of “Unknown Name” (KV 40)	42
3.3.2.1.13	Tomb of YUYA and THUYU (KV 46)	42
3.3.2.1.14	Tomb of TIYE (Unknown) OR AKHENATEN (Unknown) (KV 55)	43

Chapter 4: Experimental Techniques

4.1	Radioactivity measurements	45
4.1.1	Gamma-ray spectrometer device	45
4.1.1.1	Energy calibration	47
4.1.1.2	Efficiency calibration	48
4.1.2	Material and methods	50
4.2	Radon concentration measurements	51
4.2.1	AlphaGUARD radon monitor	51
4.2.1.1	Device calibration	52
4.2.2	Portable radon and thoron monitor [RTM 1688-2]	53
4.2.2.1	Device properties	54
4.2.3	New electronic exposure meter	54
4.2.3.1	Rule	54
4.2.3.2	Technical recognition	55
4.2.3.2.1	Power supply	56
4.2.3.2.2	Detector	56
4.2.3.2.3	Pre-amplifier	56
4.2.3.2.4	Pulse shaper	56
4.2.3.2.5	Amplifier	57
4.2.3.2.6	Energy discriminator	57
4.2.3.2.7	Microcontroller	57
4.2.3.3	Device calibration	58

Chapter 5: Results and Discussions

5.1	Gamma spectrometric analysis	60
5.1.1	Saqqara region measurements	60
5.1.2	Luxor region measurements	61
5.2	Radiation hazard parameters	62
5.2.1	Saqqara region	63
5.2.2	Luxor region	64
5.3	Radon concentration	65
5.3.1	Saqqara region measurements	66
5.3.2	Luxor region measurements	71
5.4	Personal radon concentrations	77
5.5	Thoron concentrations	78

Chapter 6: Theoretical Modeling

6.1	Analytical modeling of indoor radon Concentration	80
6.2	Computational Fluid Dynamics (CFD) Model for natural ventilation rate calculation	84
6.3	Radon equilibrium factor and ventilation rate	90
6.4	Results and discussion	92

Conclusion 103
