

**A COMPARATIVE STUDY BETWEEN THE RESULTS OF
PERCUTANEOUS NEPHROLITHOTOMY AND
EXTRACORPOREAL SHOCK WAVE LITHOTRIPSY IN
THE TREATMENT OF LOWER CALYCEAL STONES**

THESIS

Submitted for partial fulfillment of
M.Sc Degree in:
UROLOGY

Presented by
Mohamed Hamdi Ibrahim
M.B., B.Ch

Under the supervision of
Prof. Dr. Mohamed Tarek M. Fathy Zaher
*Professor of Urology
Faculty of Medicine
Ain Shams University*

Assis. Prof. Dr. Wael Aly Maged
*Assis. Prof. of Urology
Faculty of Medicine
Ain Shams University*

Dr. Mohamed Shukry Shoeb
*Lecturer in Urology
Faculty of Medicine
Ain Shams University*

**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY
1999**

الحمد لله رب العالمين

ACKNOWLEDGEMENT

To ALLAH, goes all my deepest gratitude and thanks for achieving any work in my life.

I wish to express my cordial appreciation and utmost gratitude to **Prof. Dr. Tarek Zaher**, Professor of Urology, Faculty of Medicine, Ain Shams University, for his sincere guidance, supervision and kind encouragement throughout the whole thesis.

My sincere thanks to **Assis. Prof. Dr. Wael Maged**, Assistant Professor of Urology, Faculty of Medicine, Ain Shams University, for initiation the idea for this thesis, as well as providing an invaluable criticism and direction.

I am indeed most grateful to **Dr. Mohamed Shoeb**, Lecturer in Urology, Faculty of Medicine, Ain Shams University, for his relentless support, splendid efforts and creative thoughts.

Last but not least, my deep appreciation is expressed to all the staff of Urology department, Ain Shams University, and to all members of my family for their co-operation and encouragement

Mohamed Hamdi

TO MY FAMILY ..

I Introduction and Aim of The Work	1
II Review of Literature	
Historical aspects of urinary stone disease	3
Epidemiological aspects of urinary stone disease ...	5
Theories of stone formation	9
Types of urinary stones	15
Methods of diagnosis	23
Pathological consequences	29
Treatment modalities	32
Extracorporeal shock wave lithotripsy (ESWL)	35
Percutaneous nephrolithotomy	52
II Patients and Methods	62
III Results	70
IV Cases	79
V Discussion	90
VI Summary and Conclusion	98
VII References	101
VIII Arabic summary	---

LIST OF TABLES AND FIGURES

	Tables	Page
1	Pertinent features of the three forms of Hypercalciuria	17
2	Radiographic densities of stones in relation to bone	26
3	Advantages and disadvantages of shock wave generators	41
4	Comparison of imaging modalities	42
5	Ease of fragmentation of various calculi	43
6	Incidence of complications in our patients treated with ESWL	75
	Figures	
1	Saturation and supersaturation of solutes in urine	10
2	Mechanism of stone fragmentation	37
3	Electrohydraulic lithotripter shock wave generation	38
4	Electromagnetic lithotripter shock wave generation	39
5	Piezoelectric shock wave generation	40
6	Siemens lithostar plus lithotripter	66
7	Percutaneous nephrolithotomy set	69
8	Electromagnetic lithoclast	69
9	Incidence of acute and obtuse infundibulopelvic angle in ESWL	71
10	Incidence of narrow and wide calyceal neck in ESWL	72
11	Percentage of stone-free patients in ESWL	73
12	Incidence of stone disintegration in PCNL	76
13	Success rate of PCNL	77
