**"A STUDY ON SOME AGRICULTURAL CROPS  
IN THE STAGE OF POST HARVESTING"**

**CLEANING WHEAT GRAINS BY FLUIDIZATION  
BY**

**MOHAMED ABD EL-AZIZ MOHAMED AHMED EL-TAWIL**

**B.Sc. in Ag. Mech., Faculty of Agric., Kafr EL-Sheikh  
Tanta University, 1992**

***Thesis***

**submitted in partial fulfilment of  
the requirement of the Degree of  
MASTER OF SCIENCE**

**IN**

**AGRICULTURAL MECHANIZATION  
Department of Agricultural Mechanization  
Faculty of Agric., Kafr EL-Sheikh  
Tanta University**

**1997**

**Approved**

*M. Alkarakalla*  
*M. Metwally*  
*Masoud A. Helwa*

طه، ١١٤

## SUPERVISION COMMITTEE

*Prof. Dr.*

METWALLI METWALLI MOHAMED

Prof. and Head of Agricultural Mechanization Department  
Faculty of Agric., Kafr EL-Sheikh,  
Tanta University

*Dr.*

FATHEY IBRAHIM HINDEY

Assistant prof. in Agricultural Engineering, Ag. Mech. Dept.,  
Faculty of Agric., Kafr EL-Sheikh,  
Tanta University

***DEDICATION***

***TO***  
***my parents***

## **Acknowledgment**

*The author wishes to express his deep and sincere thanks and appreciation to **Prof. Dr. METWALLI METWALLI MOHAMED**, Professor and head of Agricultural Mechanization Department, Faculty of Agriculture, kafr El-Sheikh, Tanta University for his supervision, guidance encouragement and revising manuscript.*

*The author also wishes to express his deep and sincere thanks to **Dr. FATHEY IBRAHIM HINDEY** , Assistant Prof. in Agricultural Mechanization Dept., Faculty of Agriculture, Kafr El-Sheikh, Tanta University for his supervision, guidance encouragement and revising manuscript and continuous scientific help.*

*The author also wishes to express his deep and sincere thanks to : **Dr. ISMAIL AHMED ABD EL-MOTALB**, Associate Prof., **Dr. EL-SAID MOHAMED KHALIFA**. Assistant Prof., **Mrs. NABIHA HASSAN ABOU-EL-HANA** Assistant Lecturer, **Mr. SAID EL-SAYED ABO-ZAHER**, Assistant Lecturer and **Mr. EL-SAYED MAHMOUD EL-BEILY** Assistant Lecturer in Agricultural Mechanization Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for their encouragement, continuous scientific help and providing some research materials.*

*I would like to express my sincere and deep thanks to all the staff members of Agriculture Mechanization Department, Faculty of Agriculture, at Kafr El-Skeikh, Tanta University for their helpfull comments and encouragement.*

*Very deep thanks to **my father, my mother , my wife and my family** for their continuous encouragement and their patient during my study for M.Sc.*

1	- INTRODUCTION .....	1
2	- REVIEW OF LITERATURE .....	3
2.1	- General information on seed cleaning. ....	3
2.2	- Characteristics of grain and seed separation.....	3
2.2.1	- Size and shape. ....	4
2.2.2	- Weight of grains. ....	5
2.2.3	- Surface texture. ....	5
2.2.4	- Mechanical properties. ....	6
2.2.5	- Electrical properties. ....	6
2.3	- Air flow with orifice plate. ....	6
2.3.1	- Terminal velocity (Critical velocity). ....	8
2.4	- Methods of cleaning and grading. ....	10
2.4.1	- Screens unit. ....	10
2.4.2	- Screen and fan cleaners. ....	13
2.4.3	- Indent disk and cylinder separators. ....	16
2.4.4	- Spiral separator. ....	18
2.4.5	- Centrifuge separator. ....	18
2.4.6	- Cyclone separator. ....	19
2.4.7	- Rotary separator. ....	21
2.4.8	- Inclined belt separator. ....	21
2.4.9	- Separation based upon surface texture. ....	21
2.4.10	- Colour separator. ....	23
2.4.11	- Magnetic separation.....	23
2.4.12	- Electrostatic separation. ....	23
2.4.13	- Cleaning seed by fluidization. ....	23
2.5	- Pneumatic separation. ....	24
2.6	- Factors affecting the cleaning efficiency of the fluidizing separators	32
2.6.1	- Feeding material components. ....	33

	Page
2.6.2 - Air stream velocity. ....	34
2.6.3 - Unit of feeding materials in the separation canal ( Specific feeding rate).	34
2.6.4 - Dimensions of separation duct ( Canal). ....	35
2.6.5 - Dispersion of air stream velocity in separation duct. ....	35
2.6.6 - Initial velocity of the mixture. ....	35
<b>3 - MATERIALS AND METHODS.</b>	<b>36</b>
3.1 - Experimental machine. ....	36
3.1.1 - Air delivery unit, air flow pipe and orifice plates. ....	36
3.1.2 - Feeding hopper. ....	36
3.1.3 - Separating duct. ....	36
3.1.4 - Screens. ....	39
3.1.5 - Receiving containers. ....	39
3.1.6 - The frame. ....	39
3.2 - Materials. ....	39
3.2.1 - Crop materials. ....	39
3.2.2 - Samples preparation. ....	40
3.3 - Tested factors. ....	40
3.4 - Experimental procedures.....	40
3.5 - Measurement. ....	42
3.5.1 - Grain dimensions. ....	42
3.5.2 - Straw dimensions. ....	44
3.5.3 - Determination of friction angle. ....	44
3.5.4 - Determination of repose angle. ....	44
3.5.5 - Determination of moisture content. ....	46
3.5.6 - The weight of tested samples. ....	46
3.5.7 - Determination of specific weight of samples. ....	46
3.5.8 - Determination of feeding and cleaning time. ....	48
3.5.9 - Determination of air flow rate and air stream velocity. ....	48
3.5.9.1 - The terminal velocity. ....	48
3.9.2 - Drag coefficients. ....	50

	Page
3.5.10 - Determination of static pressure. ....	50
3.5.11 - Determination of air temperatures and air relative humidity. ....	51
3.5.12 - Determination of energy required for separation. ....	52
3.5.13 - Separation effectiveness and degree of cleanliness. ....	52
3.5.14 - The statistical analysis. ....	52
<b>4 - RESULTS AND DISCUSSION. ....</b>	<b>53</b>
4.1 - Physical and aerodynamic properties of wheat grains, straw and mixture. ....	53
4.1.1 - Correlation between shape and size of grain. ....	53
4.1.2 - Specific weight. ....	57
4.1.3 - External friction angle. ....	57
4.1.4 - Repose angle. ....	57
4.1.5 - Physical properties of wheat straw. ....	61
4.1.6 - Aerodynamic properties of wheat grains. ....	61
4.1.6.1 - Terminal velocity of wheat grains and wheat straw. ....	64
4.1.6.2 - Drag coefficient and Reynold's number. ....	66
4.2. - Evaluation of fan characteristics ....	70
4.2.1. - The air flow rate.....	70
4.2.2. - The static pressure.....	70
4.2.3. - Electrical energy requirements for separation.....	70
- Evaluation of laboratory experiments.....	70
4.3. - Effect of different factors on separation effectiveness.....	72
4.3.1. - Effect of air stream velocity ....	72
4.3.2. - Effect of specific feeding rate ....	77
4.3.3. - Effect of total impurities ....	78
4.3.4 - Effect of duct slope downward.....	79
4.4. - Effect of different factors on grain recovery.....	80
4.4.1. - Effect of air stream velocity.....	81
4.4.2. - Effect of specific feeding rate.....	81
4.4.3. - Effect of total impurities.....	88
4.4.4. - Effect of duct slope downward.....	89
4.5. - Effect of different factors on grain losses ....	90
4.5.1. - Effect of air stream velocity ....	91
4.5.2. - Effect of specific feeding rate.....	96

	Page
4.5.3. - Effect of total impurities .....	96
4.5.4 - Effect of duct slope downward.....	97
4.6. - Effect of different factors on degree of cleanliness.....	99
4.6.1. - Effect of air stream velocity.....	99
4.6.2. - Effect of specific feeding rate.....	104
4.6.3. - Effect of total impurities.....	104
4.6.4. - Effect of duct slope downward.....	107
- SUMMARY AND CONCLUSIONS.	110
- REFERENCES.	114
- APPENDIX	117
- ARABIC SUMMARY	

## List of Tables

No. of Table	Title of Table	Page
1	: The arithmetic mean, standard deviation and coefficient of variation of some physical and aerodynamic properties of wheat kernel, Sakha 61 variety.....	54
2	: The mean values of friction angle for grains, straw and mixtures.....	60
3	: The mean values of repose angle for grains, straw and samples with impurities.....	60
4	: The average physical and aerodynamic properties of prepared wheat straw tested samples, Sakha 61.....	62
5	: Percentage of separation effectiveness ( $E$ ) of wheat grains in the mixture at 0.2617 rad ( $15^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates. ....	73
6	: Percentage of separation effectiveness ( $E$ ) of wheat grains in the mixture at 0.5236 rad ( $30^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	74
7	: Percentage of grain recovery ( $R_g$ ) in the mixture at 0.2617 rad ( $15^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	84
8	: Percentage of wheat grain recovery ( $R_g$ ) in the mixture at 0.5236 rad ( $30^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	85
9	: Percentage of wheat grain losses ( $L_g$ ) in the mixture at 0.2617 rad ( $15^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	92
10	: Percentage of wheat grain losses ( $L_g$ ) in the mixture at 0.5236 rad ( $30^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	93
11	: Percentage of degree of cleanliness ( $C_e$ ) of wheat grains in the mixture at 0.2617 rad ( $15^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	100
12	: Percentage of degree of cleanliness ( $C_e$ ) of wheat grains in the mixture at 0.5236 rad ( $30^\circ$ ) slope of duct downward as affected by different air stream velocities, total impurities and specific feeding rates.....	101
