بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

لَسْبَدَانِكَ لَا نَعْلَمُ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

First and above all, my deepest gratitude and thanks to **Allah** for achieving any work.

I would like to express my especial cordial thanks and endless gratitude and appreciation to *Prof. Abdel-Megeed Ismail Abdel-Megeed*, Professor of Obstetrics and Gynecology, Faculty of Medicine- Ain Shams University, for giving me the opportunity to work under his meticulous supervision and for his kind support that made achievement of this work possible.

I am also grateful and would like to express appreciation to *Dr. Mohamed Mahmoud Al-Sherbiny*, Assistant Professor of Obstetrics and Gynecology, Faculty of Medicine- Ain Shams University, for his collaboration in this work.

I am also grateful and would like to express sincere appreciation and gratitude to my advisor *Dr. Tarek Aly Raafat*, Assistant Professor of Obstetrics and Gynecology, Faculty of Medicine- Ain Shams University, for his valuable and kind supervision. His honest assistance and patience made me truly indebted to him.

Finally, I would also seize the opportunity to dedicate this thesis to my husband and my family for their continuous encouragement and support.

Dina Emad Eldin Elmorsy

List of Abbreviations

Abb.	Meaning
AFS	American Fertility Society
CBC	Complete blood count
CS	Cesarean section
CT	Computed tomography
ECG	Electro cardio gram
FDA	Food and Drug Administration
FFP	Freash frozen plasma
GnRH	Gonadotropin-releasing hormone
Hb	Hemoglobin
Hct	Hematocrit
HSG	Hysterosalpingogram
ICU	Intensive care unit
IUD	Intrauterine devices
LNG-IUS	Levonorgestrel-releasing intrauterine system
MRI	Magnetic resonance imaging
NG	Nulligravida
OCPs	Oral contraceptive pills
PRBCs	Packed red blood cells
SERMs	Selective estrogen receptor modulators
TA	Tranexamic acid

List of Tables

Table	Title	Page
1	Events observed with carbetocin during the clinical trials were of the same type and frequency as the adverse events observed with oxytocin when administered after Caesarean section under spinal or epidural anaesthesia	75
2	Characteristics of patients in the two study groups	86
3	Operative data in the two study groups	88
4	Perioperative change in the hemoglobin level in the two study groups	90
5	Perioperative change in the hematocrit in the two study groups	92
6	Need for blood transfusion and consumption of blood products in the two study groups	94
7	Incidence of drug-related adverse reactions in the two study group	96
8	Postoperative data in the two study groups	97
9	Risk analysis for the need for blood transfusion	99

List of Figures

Figure No.	Title	Page No.
1	Drawing of a surgical specimen showing a large myoma with small lacunar spaces of infiltrated endometrium	8
2	Different locations of uterine fibroids, Wallach and Vlahos	9
3	An anterior fibroid presses directly on the bladder and posterior fibroid pressure on the rectum	17
4	Laparoscopic myomectomy	35
5	Uterine artery embolization	38
6	Myomectomy technique	60
7	Operative time in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	89
8	Estimated blood loss in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	89
9	Hemoglobin level before and after surgery in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	90
10	Absolute change in the hemoglobin level after surgery in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	91

Figure No.	Title	Page No.
11	Percentage of change in the hemoglobin level after surgery in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	91
12	The Hematocrit before and after surgery in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	92
13	Absolute change in the hematocrit after surgery in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	93
14	Percentage of change in the hematocrit after surgery in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	93
15	Need for blood component transfusion in the two study groups	95
16	Hospital length of stay in the two study groups. Markers represent individual observations. Horizontal line represents the mean. Error bars represent the standard error of the mean (SEM)	98
