**Study to detect the antibodies of human
cytomegalovirus in the sera of patients
with acute coronary syndrome**

Thesis submitted for partial fulfillment of
Master degree of cardiology

By

Marianne Ramsis Anis
M.B.,B.Ch.

Under supervision
Of

Prof. Ihab Attia
Professor of Cardiology
Ain Shams University

Dr. Ashraf Okkba
Assistant Professor of Medicine
Ain Shams University

Dr. Ahmed Abd El-Raheman
Lecturer of Cardiology
Ain Shams University

Acknowledgement

Thanks first and last to ALLAH, to whom we owe his great care, support and guidance in every step in our life.

I would like to express my deepest appreciation and gratefulness to **Prof. Ihab Mohamed Attia** Professor of Cardiology, Faculty of Medicine, Ain Shams University, for giving me the chance to work under his generous supervision and continuous encouragement.

I wish to offer my deepest thanks and my sincere gratitude to **Prof. Ashraf Mahmoud Okkba** Assistant Professor of Medicine, Ain Shams University for his trustful help and meticulous advice. I wish to offer my profound appreciation and gratitude to **Dr. Ahmed Abd El-Raheman**, Lecturer of Cardiology, Faculty of Medicine, Ain Shams University for his unlimited and continuous help and advice.

I wish to offer my profound appreciation and gratitude to **Dr. Hala Mahmoud Hafez** Lecturer of Clinical Pathology, Ain Shams University for here continuous interest, honest, assistance and kind cooperation.

My profound appreciation and gratitude to My Family for their unlimited help and continuous encouragement through out this work.

Lastly, my thanks to all the persons who were the subjects of this study, and all who helped me through out this work.

List of abbreviations

PGI₂	Prostacyclin.
+ve	Positive
ADP	Adenosine diphosphate.
CABG	Coronary artery bypass graft.
CMV	Cytomegalovirus.
CRP	C- reactive protein.
DM	Diabetes Mellitus
DNA	Double stranded nucleic acid.
EBV	Ebstien bar virus.
ECG	Electrocardiogram.
EDGF	Endothelial derived growth factor.
EDRF	Endothelial derived relaxent factor.
EGF	Epidermal growth factor.
EIA	Enzyme immunoassay.
ELISA	Enzyme linked immunosorbent assay.
EM	Electron microscopy.
ESR	Erythrocyte sedemintation rate.
FGF	Fibroblast growth factor.
FH	Family history.
H. Pylori	Helicobacter Pylori.
HDL	High density lipoprotein.
HSV	Herpes Simplex virus.
HTN	Hypertension
ICAM-1	Intercellular adhesion molecule – 1
IF	Immunofluorescence
IgA	Immunoglobulin A.
IGF - 1	Insulin like growth factor 1.
IgG	Immunoglobulin G.
IgM	Immunoglobulin M.
IHD	Ischemic heart disease.

IP	Immunoperoxidase.
LA	Latex agglutination.
LDL	Low density lipoprotein.
M-CSF	Macrophage colony stimulating factor.
MI	Myocardial infarction.
MIE gene	Major immediate early gene.
MRNA	Messenger ribonucleic acid.
NO	Nitric oxide
No.	Number
O₂	Oxygen
OGMP	Oxidized guanosine monophosphate.
Ox LDL	Oxidized low density lipoprotein.
PAI - 1	Plasminogen activator inhibitor type 1.
PCI	Percutaneous coronary intervention
PCR	Polymerase chain reaction.
PDGF	Platelet derived growth factor.
PTCA	Percutaneous transluminal coronary angioplasty.
RIA	Radio-immunoassay.
SD	Standard deviation.
TxA₂	Thromboxane A ₂ .
VCAM-1	Vascular cell adhesion molecule - 1
-ve	Negative

List of Tables

		Page
<i>Table (1)</i>	The mean value of the age in different groups.	60
<i>Table (2)</i>	Number and percentage of smokers in different groups.	60
<i>Table (3)</i>	Number and percentage of diabetics in different groups.	61
<i>Table (4)</i>	Number and percentage of hypertensive subjects in different groups.	62
<i>Table (5)</i>	Number and percentage of dyslipidemic in different groups.	63
<i>Table (6)</i>	Number and percentage of subjects gave family history of coronary artery disease.	64
<i>Table (7)</i>	Number and percentage of subjects gave previous history of myocardial infarction.	65
<i>Table (8)</i>	Number of subjects gave history of previous coronary intervention.	66
<i>Table (9)</i>	Number and percentage of subjects had underwent previous stress test.	67
<i>Table (10)</i>	The mean value of ESR in different groups and its SD	68
<i>Table (11)</i>	Number and percentage of subjects had elevated ESR.	69
<i>Table (12)</i>	Number and percentage of subjects with CRP positive.	70
<i>Table (13)</i>	Number and percentage of subjects with CRP positive.	72
<i>Table (14)</i>	Rising titer of CMV antibody titer in different groups.	73
<i>Table (15)</i>	The mean value of CMV antibody titer and its SD in different groups.	75
