STUDY OF THE ROLE OF TUMOR NECROSIS FACTOR-α, LEPTIN, PLASMINOGEN ACTIVATOR INHIBITOR-1, AND OXIDATIVE STRESS IN THE PATHOPHYSIOLOGY OF OBESITY DIABETES SYNDROME

٣٢٩٣٤

THESIS

Submitted To the Faculty of Medicine,

University of Alexandria

In Partial Fulfillment of the Requirement

Of the MD Degree

IN BASIC MEDICAL SCIENCES IN

BIOCHEMISTRY

By

MONA MOUSTAFA SOBHY EL SAYED
MBB Ch, Alexandria
MBSC Biochemistry, Alexandria

FACULTY OF MEDICINE
UNIVERSITY OF ALEXANDRIA
2004

SUPERVISORS

Prof. Dr. Mahmoud A. Zahran

Professor of Medical Biochemistry

Prof. Dr.Mohamed A.Zeidan

Assistant Professor of Medical Biochemistry

Faculty of Medicine, University of Alexandria

First and foremost, thanks to ALLAH

I would like to express my everlasting gratitude and appreciation to ***Prof. Dr. Mahmoud A. Zahran***, Professor of Medical Biochemistry, Faculty of Medicine, University of Alexandria, for the stimulating encouragement and supervision I received throughout this work.

I am greatly indebted to ***Prof. Dr. Enayat M. Hashem*** Professor of Medical Biochemistry, Faculty of Medicine, University of Alexandria, for her useful instructions and sincere cooperation throughout this work.

Also my deepest gratitude and sincere appreciation to ***Prof. Dr Mohamed N. Desouky***, Professor of Medical Biochemistry, Faculty of Medicine, University of Alexandria for his continuous guidance, mentorship, and sincere help during this work.

I am also thankful to ***Prof. Dr Yehia M. Ghanem***, Professor of Internal Medicine, Faculty of Medicine, University of Alexandria, for his help and kind interest in this work.

I extend my thanks to ***Dr Mouhamed A. Zedan,*** Assistant Professor of Medical Biochemistry, Faculty of Medicine, University of Alexandria, for his continuous support and guidance throughout this work.

ARABIC SUMMARY

List Of Figures

PAGE

Introduction

Figure1: The effects of leptin on hypothalamic proopiomelanocortin (POMC) and agouti gene related peptide (AGRP) neurons and their interaction with hypothalamic melanocortin receptors (MC-Rs).....7

Figure 2: Hypothalamic integration of peripheral energy balance signals.....9

Figure 3: Interaction between the hypothalamus and adipocytes.....12

Figure 4: Thermogenesis in brown adipose tissue 14

Figure 5: Neural regulation of beta-cell insulin release.....16

Figure 6: Regulation of glucose transport by insulin 22

Figure 7: Metabolism of adipose tissue 24

Figure 8: Triglyceride storage in high fat and high carbohydrate diet.....27

Figure 9: Leptin receptors 37

Figure 10: The JAK-STAT mechanism by which the leptin signal is transduced in the hypothalamus.....41

Figure 11: Model of LRb signaling.....42

Figure 12: . Leptin signaling in pancreatic 3-cells.....47

Figure 13: TNF-α- initiated signaling cascades.....58

Figure 14: proposed mechanism by which TNF-α may act to decrease adipocyte mass.....61

Figure 15: The fibrinolytic system.....62

Figure 16: The insulin receptor.....73

Figure 17: Protein-protein interaction domains involved in insulin signal transduction.....76

Figure 18: Regulation of gene expression by insulin.....78

Figure 19 a: Activation of glycogen synthase by insulin.....80

Figure 19 b: Transmission of signal mediated by PI-3kinase.....81

Figure 20: Ser/Thr phosphorylation of the insulin receptor substrate (IRS) molecule induces insulin resisance.....84

Figure 21: Role of insulin in adipose tissue metabolism.....87

Figure 22: Steps of lipid peroxidation.....94

Methods

Figure 23: Standard curve of leptin.....104

Figure 24: Standard curve of TNF-α.....109

Figure 25: Standard curve of PAI-1.....114

Figure 26: Standard curve of insulin 119

Results

Figure 27: Fasting serum glucose.....132

Figure 28: 2- hours post load glucose.....135

Figure 29: Fasting serum insulin.....138

Figure 30: 2- hours post load serum insulin.....141

Figure 31: HOMA IR 144

Figure 32: Cholesterol 147

Figure 33: Triglycerides.....150

Figure 34: High density lipoprotein cholesterol.....153

Figure 35: Low density lipoprotein cholesterol.....156

Figure 36: Leptin 159

Figure 37: Tumor necrosis factor-alpha.....162

Figure 38: Plasminogen activator inhibitor-1.....165

Figure 39: Plasma malondialdehyde.....168

List Of Tables

PAGE

Table 1: WHO and NCEP ATP III Definitions of the Metabolic Syndrome.....*71*

Table II : Anthropometric measures of the studied groups.....*129*

Table III: Comparison of Fasting Glucose levels in the studied group.....*131*

Table IV:.Comparison of 2h-post load Glucose levels in the studied groups..... *134*

Table V: Comparison of Fasting Insulin levels in the studied group.....*137*

Table VI: Comparison of 2h-post load insulin levels in the studied group.....*140*

Table VII: Comparison of HOMA IR in the studied group.....*143*

Table VIII: Comparison of fasting triglycerides in the studied group.....*146*

TableIX: Comparison of serum Cholesterol levels in the studied group..... *149*

TableX: Comparison of serum HDL-cholesterol levels in the studied group..... *152*

Table XI: Comparison of serum LDL-cholesterol levels in the studied group..... *155*

Table XII: Comparison of leptin levels in the studied groups.....*158*

Table XIII: Comparison of tumour necrosis factor-α levels in the studied groups..... *161*

Table XIV: Comparison of Plasminogen activator inhibitor-1 levels in the studied groups.....*164*

Table XV: Comparison of Malondialdehyde levels in the studied groups.....*167*

Table XVI: Correlation coefficients of the studied parameters.....*170*

Table XVII: Correlation coefficients of the studied parameters in the diabetic patients *171*

Table XVII: Correlation coefficients of the studied parameters in the nondiabetic patients *172*

List Of Abbreviations

aFABP	Adipocyte-specific fatty acid binding protein
AgRP	Agouti gene-related peptide
ANOVA	analysis of variance
aP-2	Fatty acid binding protein
BAT	Brown adipose tissue
BMI	Body mass index
C/EBPα	CCAAT/enhancer binding protein-α
CaMK	Ca^{2+}/calmodulin-dependent protein Kinase
cAMP	Cyclic adenosine monophosphate
CART	Cocaine-amphetamine- regulated transcript
CCK	Cholecystokinin
CGRP	Calcitonin gene related peptide
CNF	Ciliary neurotropic factor
CPU	Central processing unit
CRF	Corticotrophin-releasing factor
Db	Diabetic
DD	Death domain
EDETA	Ethylenediamine tetraacetate
ERK	Extracellular factor-regulated kinases
FADD	Fas-associated death domain protein
FAN	Factor associated with neutral SMase
FAS	Fatty acid synthase
FLICE	FADD-like interleukin 1β converting enzyme
GCSF	Granulocyte colony-stimulating factor
GH	Growth hormone
GHRH	Growth hormone releasing hormone
GLP-1	Glucagon like-peptide-1
