EFFECT OF SOME NUTRIENTS ON NUTRITIONAL AND PHYSIOLOGICAL STATUS OF GRAPE PLANTS

By

Alaa El-Din Nour El-Din Mohamed Sharaf

B.Sc. (Agric.) Zagazig University, 1978

M.Sc. (Horti) Zagazig University, 1990

Thesis

*Submitted in partial fulfilment of the Requirements
of the Degree of Doctor of Philosophy*

In

Horticulture (Pomology)
Faculty of Agriculture, Moshtohor
Zagazig University

1997

EFFECT OF SOME NUTRIENTS ON NUTRITIONAL AND PHYSIOLOGICAL STATUS OF GRAPE PLANTS

APPROVAL SHEET

TITLE OF THESIS

**EFFECT OF SOME NUTRIENTS ON NUTRITIONAL
AND PHYSIOLOGICAL STATUS OF GRAPE PLANTS**

BY

Alaa El-Din Nour El-Din Mohamed Sharaf

*This Thesis For The Ph. D. Degree
Has Been Approved By:*

Prof. Dr. M. Madbouly

Prof. Dr. M. A. Khamis

Prof. Dr. A. M. Hegazy

Prof. Dr. M. Elashmou

(Committee In Charge)

Date: 15/9/1997

ACKNOWLEDGEMENT

The author wishes to express his sincere appreciation and gratitude to **Prof. Dr. Mohamed A. Khamis**, Professor of Pomology, Hort. Dept., Faculty of Agric., Moshtohor Zagazig univ. for his supervision, planning this study, helpful advice, encouragement, criticism, continuous guidance and valuable suggestions throughout the course of this work and writing the manuscript.

Sincere thanks and gratitude to **Prof. Dr. Mohamed A. El-Ashram**, Professor of Pomology, Hort. Dept., Faculty of Agric., Moshtohor Zagazig univ. for his supervision, progressive criticism, sincere help and valuable assistance during the course of this work and writing the manuscript.

The author wishes to express his sincere appreciation and gratitude to **prof. Dr. Farid A. Mohamed**, Professor of Plant Nutrition and Head of Plant Res. Dept., Atomic Energy Authority, for his supervising, planning this work, direction, criticism and continuous guidance throughout the course of this work and writing the manuscript.

The author wishes to express his deepest gratitude to **Prof. Dr. Mohamed M. Sharaf**, Professor of Pomology, Hort. Dept., Faculty of Agric., Moshtohor Zagazig Univ. for his supervision, valuable guidance, providing facilities, kind help in the course of presentation of the results, writing the manuscript and over coming difficulties throughout the whole period of investigation.

I must, also, acknowledge to co-operation and help from the authority and colleagues in both Plant Res. dept. and Soil & Water Res. Dept., Atomic Energy Authority.

List of table

Table No

1- Some soil chemical properties of three soil types used in this study	64
2- Preparation of the differential diluted nutrient solutions used for feeding young Ruby seedless vines of the second experiment	65
3- Plant height, stem thickness, number of both laterals and leaves per Ruby seedless grape rooted cuttings as influenced by soil type, mineral nutrition and their combinations during 1993 & 1994 seasons	69
4- Shoot, leaves fresh and dry weight of Ruby seedless grape rooted cuttings as influenced by soil type, mineral nutrition and their combinations during 1993 & 1994 seasons.	71
5- Root, total plant dry weight and top/root ratio of Ruby seedless grape rooted cuttings as influenced by soil type, mineral nutrition and their combinations during 1993 & 1994 seasons.	74
6- Nitrogen content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, same mineral nutrition and their combinations during 1993 and 1994 seasons.	80
7- Phosphorus content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, same mineral nutrition and their combinations during 1993 and 1994 seasons.	83
8- Potassium content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, same mineral nutrition and their combinations during 1993 and 1994 seasons.	86
9- Magnesium content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, same mineral nutrition and their combinations during 1993 and 1994 seasons.	90

10- Iron content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, sme mineral nutrition and their combinations during 1993 and 1994 seasons.	93
11-Manganese content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, sme mineral nutrition and their combinations during 1993 and 1994 seasons.	96
12- Zinc content in various plant organs of Ruby seedless grape rooted cuttings in relation to soil type, sme mineral nutrition and their combinations during 1993 and 1994 seasons.	98
13- Nitrogen contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	102
14- Phosphorus contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	105
15- Potassium contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	109
16-Magnesium contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	112
17- Iron contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	116
18- Manganese contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	118
19- Zinc contents in different plant organs sampled at two dates as affected by various nutrient elements omission during 1993 and 1994 seasons.	121

20- Foliar absorption treanslocation and utilization of labelled Fe by grape plants grown in different soil types.	124
21- Foliar absorption treanslocation and utilization of labelled Mn by grape plants grown in different soil types.	127
22- Foliar absorption treanslocation and utilization of labelled Zn by grape plants grown in different soil types.	130
23- Absorption, translocation and utilization of labelled Fe by grape plants grown in different soil types, after soil application.	134
24- Absorption, translocation and utilization of labelled Mn by grape plants grown in different soil types, after soil application.	135
25- Absorption, translocation and utilization of labelled Zn by grape plants grown in different soil types, after soil application.	139
