

ACKNOWLEDGEMENT

I am deeply thankful to Allah, lord of the worlds for showing me the right path and helping me to complete this work.

I would like to express my deep respect, sincere and appreciation to Prof. Dr. Nadia Abd El Hakim Youssef, Prof. of physical chemistry (Faculty of Women, Ain Shams University) for her sincere supervision, for suggesting the point of this research, for her continuous advice, guidance, respective suggestions, fruitful discussions and facilities which she offered me through the progress and finishing this work.

Deep thanks to Dr. Seham Ali Shaban Assistant. Prof. of physical chemistry (Egyptian Petroleum Research Institute) for the supervision, her valuable assistance and guidance in my entire experimental work, her kindness and encouragement during this work.

I really appreciate the efforts of Dr. Fatma Abd Elsamea Ibrahim, lecturer of physical chemistry (Faculty of Women, Ain Shams University) for her supervision, support, continuous help, and valuable advices and for helping me in revision and writing this work.

Acknowledgement

My thanks extend also to all the staff members and my colleagues at Faculty of Women Ain Shams University for their cooperation and encouragement during this work.

LIST OF ABBREVIATIONS	xiii
AIM OF THE WORK	xiv
ABSTRACT	xv
CHAPTER I	
INTRODUCTION	
I.1. Point and Non-point Sources.	1
I.2. Causes of Pollution.	2
I.3. Water Pollution.	3
I.4. Pollution Due to Synthetic Dyes and its Impact on Health and the Environment.	4
I.4.1. Toxicity effects of dyes.	5
I.4.2. Carcinogenicity of dyes.	7
I.5. History of Dyes.	8
I.6. Chemical Properties of Dyes.	9
I.7. Classification of Dyes.	10
I.7.1. Natural dyes.	10
I.7.2. Synthetic dyes	11
I.8. Several Techniques for Dye Removal and Degradation.	13
I.8.1. Physical methods.	14
I.8.2. Biological methods.	14
I.8.3. Chemical methods	15

I.8.3.1. Ozonation.	15
I.8.3.2. Immobilized by TiO₂.	16
I.8.3.3. Fenton and Photo-Fenton Oxidation Reaction.	16
I.9. Several Studies Related to Using of Fenton Oxidation Process for the Treatment of Dyes Wastewaters.	22
CHAPTER II EXPERIMENTAL	
II.1. Chemicals and Reagent	32
II.2. Experimental.	34
II.3. Photochemical Reactor.	39
II.4. X-ray Diffraction (XRD).	39
II.5. Infrared Spectroscopy (IR).	40
II.6. Transmission Electron Microscopy (TEM).	40
II.7. Surface Area Measurement (BET).	41
II.8. Differential Thermal Analysis (DTA) and Thermal Gravimetric Analysis (TGA).	41
II.9. Vibrating Sample Magnetometer (VSM).	41
II.10. Kinetic study.	42
CHAPTER III RESULTS AND DISCUSSION	
III.1. Catalytic Degradation of Methyl Orange Dye (MO) by Using Fenton Reaction.	44
III.1.1. The absorption spectra of MO dye	44
III.1.2. The effect of the concentration of H₂O₂ on the degradation of MO dye.	46
III.1.3. The effect of the concentration of FeSO₄ on the degradation of MO dye.	50
III.1.4. The effect of the initial concentration of MO dye on its degradation.	52
III.1.5. The effect of the initial pH on the degradation of MO dye.	56

III.1.6.The effect of photo-Fenton reaction on the degradation of MO dye.	59
III.1.7. Kinetic study for the degradation of MO dye.	61
III.2. Catalytic Degradation of Methylene Blue (MB) Dye by Using Fenton Reaction.	64
III.2.1. The absorption spectra of MB dye.	64
III.2.2.The effect of the concentration of H_2O_2 on the degradation of MB dye.	66
III.2.3.The effect of the concentration of $FeSO_4$ on the degradation of MB dye.	70
III.2.4.The effect of the initial concentration of MB dye on its degradation.	72
III.2.5.The effect of the initial pH on the degradation of MB dye.	76
III.2.6.The effect of photo-Fenton reaction on the degradation of MB dye.	79
III.2.7. Kinetic study for the degradation of MB dye.	80
III.3. Catalytic Degradation of Ponceau 3R (P3R) Dye by Using Fenton Reaction.	83
III.3.1. The absorption spectra of P3R dye	83
III.3.2.The effect of the concentration of H_2O_2 on the degradation of P3R dye.	85
III.3.3.The effect of the concentration of $FeSO_4$ on the degradation of P3R dye.	88
III.3.4.The effect of the initial concentration of P3R dye on its degradation.	91
III.3.5.The effect of the initial pH on the degradation of P3R dye.	95
III.3.6.The effect of photo-Fenton reaction on the degradation of P3R dye.	98
III.3.7. Kinetic study for the degradation of P3R dye.	100
III.4. Catalytic Degradation of Eriochrome Black T (EBT) Dye by Using Fenton Reaction.	103
III.4.1. The absorption spectra of EBT dye.	103

III.4.2.The effect of the concentration of H_2O_2 on the degradation of EBT dye.	105
III.4.3.The effect of the concentration of $FeSO_4$ on the degradation of EBT dye.	108
III.4.4.The effect of the initial concentration of EBT dye on its degradation.	111
III.4.5.The effect of the initial pH on the degradation of EBT dye.	114
III.4.6.The effect of photo-Fenton reaction on the degradation of EBT dye.	117
III.4.7. Kinetic study for the degradation of EBT dye.	119
III.5. Catalytic Degradation of Congo Red (CR) Dye by Using Fenton Reaction.	122
III.5.1. The absorption spectra of CR dye.	122
III.5.2.The effect of the concentration of H_2O_2 on the degradation of CR dye.	124
III.5.3.The effect of the concentration of $FeSO_4$ on the degradation of CR dye.	127
III.5.4.The effect of the initial concentration of CR dye on its degradation.	130
III.5.5.The effect of the initial pH on the degradation of CR dye.	133
III.5.6.The effect of photo-Fenton reaction on the degradation of CR dye.	137
III.5.7. Kinetic study for degradation of CR dye.	139
III.6. Catalytic Degradation of Methylene Blue (MB) Dye Using Photo-Fenton Reaction in Heterogeneous system.	142
III.6.1. Characterization of prepared iron oxide.	142
III.6.1.1.Characterization of prepared iron oxide using X-ray diffraction (XRD).	143
III.6.1.2.Characterization of prepared iron oxide using infrared spectroscopy (IR).	144
III.6.1.3.Characterization of prepared iron oxide using transmission electron microscopy (TEM).	146
III.6.1.4.Characterization of prepared iron oxide using surface area measurement (BET).	147

III.6.1.5.Characterization of prepared iron oxide using thermal gravimetric analysis and differential thermal analysis (TGA/DTA).	148
III.6.1.6.Characterization of ferric oxide nanoparticles using vibrating sample magnetometer (VSM) techniques.	149
III.6.2.The effect of Fe₂O₃ nanoparticles only and Fe₂O₃ nanoparticles with H₂O₂ on the degradation of MB dye in light.	151
III.6.3.The effect of the concentration of H₂O₂ on the degradation of MB dye.	152
III.6.4.The effect of the weight of Fe₂O₃ nanoparticles on the degradation of MB dye.	155
III.6.5.The effect of the initial concentration of MB dye on its degradation.	157
III.6.6.The effect of the initial pH on the degradation of MB dye.	159
III.6.7. Kinetic study for the degradation of MB dye by photo-Fenton reaction.	162
