### EARLY DETECTION OF CMV INFECTION IN IMMUNOCOMPROMISED CANCER PATIENTS WITH HAEMATOLOGIC MALIGNANCIES

### Thesis

### Submitted for Partial Fulfilment for the Doctorate Degree in Clinical Pathology and Laboratory Oncology

By

### Ariga Kamal Amer

(M.B.B. Ch. Cairo University) M.Sc., Clinical Pathology, Cairo University

Under Supervision of

### Prof. Dr. Sohair Abd EI-latif Issa

Prof. Of Clinical Pathology National Cancer Institute - Cairo University

### Prof. Dr. Heba Mohamed Rabbi EI-Zawahry

Prof. Of Medical Oncology National Cancer Institute - Cairo University

### Prof. Dr. Hadir Ahmed EI-Mahallawy

Prof. Of Clinical Pathology National Cancer Institute - Cairo University

### Prof. Dr. Mohamed Tarek M. A. Mansour

Prof. Of Virology & Immunology National Cancer Institute Cairo University

> National Cancer Institute 2003

Cairo University

بسم الله الرحيم

### **ACKNOWLEDGMENT**

I am greatly indebted and thankful to Professor Doctor Sohair Abd EI-Latif Issa, Professor of Clinical Pathology, National Cancer Institute, Cairo University for her kind supervision. It is an honor to work with a professor who has been internationally appreciated for her continuous efforts in the field of clinical pathology.

My great thanks, appreciation, and loyalty are to Professor Doctor Heba Mohamed Rabbi El-Zawahry, Professor of Medical Oncology, National Cancer Institute, Cairo University for her unlimited generosity in time effort, and help. It was through her continued supervision and support that this work could have been achieved.

I owe a great deal to my supervisor Professor Doctor Hadir Ahmed El Mahallawy, Professor of Clinical Pathology, National Cancer Institute, Cairo University. She has always offered her help in the practical as well as in the writing parts of my thesis.

In all gratitude, thanks are due to Professor Doctor M. Tarek Mansour, Professor of Virology, National Cancer Institute, Cairo University. Words are not enough to express my appreciation or to explain the exhaustive help and valuable suggestions.

I would like to thank Dr. Hisham Shahin Lecturer of Clinical Pathology, National Cancer Institute, Cairo University for his help through the clinical part of this work.

I would also like to thank Dr. Mohammed Hafez lecturer of Virology, National Cancer Institute, Cairo University for his great help, support and encouragement throughout this study.

I wish to express my thanks and deep respect to Dr. Nelly Hassan assistant of Biostatistics and Epidemiology unit National Cancer Institute, Cairo University.

The assistance and unrestrained help of all my colleagues at the clinical pathology department, Mr. Sameh Nadim and Mr. Seoudi made this work possible.

### **CONTENTS**

### REVIEW OF LITERATURE

	Page
Viruses	1
Cytomegalovirus (CMV)	5
Diagnosis of CMV	28
Acute lymphatic leukemia	36
Acute Myeloid leukemia	52
Material and Methods	63
Results	70
Discussion	84
Summary	95
