

***Geochemistry Of Groundwater In
Coastal Areas, South- Sinai***

Thesis
Submitted to
Faculty of Science
Ain Shams University

For
Ph.D. Degree in Chemistry

By
Moustafa Mohamed said Abd Elfattah
B.Sc., Chemistry (1986)
M.Sc., Chemistry (1992)

Desert Research Center
Egypt

2004

***GEOCHEMISTRY OF GROUNDWATER IN COASTAL
AREAS, SOUTH SINAI-EGYPT***

Thesis advisors:

Prof. Dr. M. S. Abdel Mottaleb

Prof. Dr. M. K. Sallouma

Assoc. Prof. M. H. El Sayed

Approved

**Head of
Chemistry Department**

Prof. Dr. M. A. A. El-Kasaby

***GEOCHEMISTRY OF GROUNDWATER IN COASTAL
AREAS, SOUTH SINAI-EGYPT***

By

Moustafa Mohamed said Abd El Fattah

B.Sc., Chemistry (1986)

M.Sc., Chemistry (1992)

This thesis for Ph.D. degree has been approved by:

Prof. Dr. E. A. Hasan

Prof. Dr. A. M. Barakat

Prof. Dr. M. S. Abdel Mottaleb

Prof. Dr. M. K. Sallouma

DATE OF EXAMINATION: 29/11/2004

Thanks to GOD
&
My family
(parents, wife and daughter)

ACKNOWLEDGMENT

The author wishes to express his deep gratitude and thanks to **Prof. Dr. M. S. Abdel Mottaleb** (Chemistry Department, Faculty of Science, Ain Shams University) for his continuous supervision, valuable advice and fruitful discussion throughout this work.

Deepest thanks and sincere gratitude are due to **Prof. Dr. M. K. Sallouma** (Hydrogeochemistry Department, DRC) for her continuous supervision, generous guideline and scientific support throughout this work.

The author is highly indebted to **Assoc. Prof. Dr. Magdy Hossny El-Sayed** (Hydrogeochemistry Department ,Desert Research Center) for suggesting, planning the point of research, fruitful, helpful discussions and also, for the sincere guidance with encouragement during their direct supervisions throughout this work.

Many thanks are also for all the staff members and colleagues of **DRC** for their interest and facilities provided throughout this work.

جيوكيمياء المياہ الجوفية بالمناطق الساحلية, جنوب سيناء-
مصر

رسالة مقدمة إلى
كلية العلوم
جامعة عين شمس

للحصول علي درجة
الدكتوراه
في
فلسفة الكيمياء

مقدمة من
مصطفى محمد سعيد عبد الفتاح
بكالوريوس العلوم (كيمياء)
ماجستير العلوم (كيمياء)
كلية العلوم-جامعة عين شمس

مركز بحوث الصحراء
2004

ACKNOWLEDGEMENT

All the infinite deepest thanks and gratitude to my **GOD** who guided me and provide all facilities to finish this work.

The author would like to express his great and sincere thanks to **Prof. Dr. M. S. Abd El Mottalib**, *Prof. of inorganic and analytical chemistry, Chemistry Dept., Fac. of Sci., Ain Shams Univ.*, for continuous supervision and guidance throughout the implementation of this work.

The author wishes to extend his sincere appreciation to **Prof. Dr. M. K. Sallouma**, *Prof. of hydrogeochemistry, Hydrogeochemistry Dept., Desert Research Center*, for planning, supervision, effective guidance, and valuable discussion throughout the whole work and also for his continuous efforts to complete this thesis. Actually, the author is deeply indebted to him.

Deep thanks and appreciation gratitude are also expressed to **Dr. M. H. El Sayed**, *Ass. Prof. of hydrogeochemistry, Hydrogeochemistry Dept., Desert Research Center*, for suggesting and following up the point of research, for full support, encouragement, editorial advice, and facilitating the research program.

Deep thanks and appreciation gratitude are also expressed to **Dr. S. G. Abd El-Samie**, *Ass. Prof. of Atomic Energy Authority*, for helping in analysis of stable isotopes.

Sincere thanks and gratitude are also due to **Prof. Dr. S. El Demerdashe**, *Prof. of soil chemistry and mineralogy*,

Desert Research Center, whose friendship and continuous help are appreciated.

Many thanks to all my colleagues in the *Desert Research Center*, especially those in the *Hydrogeochemistry Dept.*
