## قسم

نقسم بالله العظيم أن المادة التي تم توثيقها وتسجيلها  
على هذه الأفلام قد أعدت دون أية تغيرات

## يجب أن

تحفظ هذه الأفلام بعيداً عن الغبار

في درجة حرارة من 15 – 20 مئوية ورطوبة نسبية من 20-40 %

To be kept away from dust in dry cool place of  
15 – 25c and relative humidity 20-40 %

007c

## APPROVAL SHEET

### ESTIMATION OF GENETIC AND PHENOTYPIC PARAMETERS FOR SOME PRODUCTIVE TRAITS IN POULTRY

By  
**MOUSTAFA GHONAMY EL-SISY**

B.Sc. Agricultural Science  
(Poultry Production) 1977  
Ain-Shams University  
M.Sc. Poultry Breeding, 1989  
Department of Animal Production  
Zagazig University, Banha Branch

Thesis  
Submitted in Partial Fulfillment of the  
Requirements for the Degree of  
DOCTOR OF PHILOSOPHY

In  
POULTRY BREEDING

To the  
Department of Animal Production  
Faculty of Agriculture at Moshtohor  
Zagazig University, Banha Branch  
Egypt  
2001

This thesis has been approved by

Dr.: M. S. Itanafi  
Dr.: G. M. Ghabrial  
Dr.: Samia El-egany  
Dr.: A. T. M. Ellabban

Date: 7 / 1 / 2001

Committee in charge

***SUPERVISION COMMITTEE***

**ESTIMATION OF GENETIC AND PHENOTYPIC  
PARAMETERS FOR SOME PRODUCTIVE  
TRAITS IN POULTRY**

By

**MOSTAFA GHONAMY EL-SISY**

B.Sc. Agricultural Science (Poultry Production) 1977 Ain-Shams University.

M.Sc. Poultry Breeding, 1989 Department of Animal Production Zagazig  
University, Banha Branch.

Under the Supervision of:

**Prof. Dr./*MOHAMED HANAFI S. MAHMOUD***

Emeritus Professor of Poultry Breeding,  
Department of Animal Production,  
Faculty of Agriculture at Moshtohor,  
Zagazig University, Banha Branch,  
Egypt.

**Dr./*ABD EL-FATTAH M. EL-LABBAN***

Associate Professor of Poultry Breeding,  
Animal production Research Institute,  
Agriculture Research Center  
Ministry of Agriculture  
Egypt.

## *ACKNOWLEDGEMENT*

## ACKNOWLEDGEMENT

The author wishes to express his sincere appreciation to a number of people who given invaluable assistance during the course of this study. Deepest thanks and gratitude to **Dr. MOHAMED HANAFI** Emeritus Professor of Poultry Breeding, Department of Animal Production, Faculty of Agriculture at Moshtohor, Zagazig University, Banha Branch, Egypt, for his close supervision, designing of this experiment, suggesting the problem, encouragement, constructive criticism and for his advice during this work.

Deepest thanks and gratitude to **Dr. MAHER H. KHALIL** Professor of Animal Breeding, Department of Animal Production, Faculty of Agriculture at Moshtohor, Zagazig University, Banha Branch, Egypt, for his close supervision, suggesting the problem, planning and laying out the statistical analysis of this work and for his great help and advice during this work.

Special thanks are directed to **Dr. Abd EL-FATTAH M. EL-Labban** Associate Professor of Poultry Breeding, Animal Production Research Institute, Agriculture Research Center, Ministry of Agriculture for his close supervision, his help providing facilities required for this study.

Special thanks are directed to **Dr. Mahmoud M. Iraqi** Lecturer of Poultry Breeding, Department of Animal Production, Faculty of Agriculture at Moshtohor, Zagazig University, Banha Branch, Egypt, for his great help and advice during this work.

Thanks are also, due to the staff members of the Department of Animal Production, Faculty of Agriculture at Moshtohor, Zagazig University to pursue graduate study.

## LIST OF TABLES

<i>Table</i> No.	<i>Page</i> No.
1 Reviewed estimates of proportions of variation for body weight at different ages.....	15
2 Reviewed estimates of heritability for body weight at different ages.....	16
3 Reviewed estimates of genetic ( $r_G$ ) and phenotypic ( $r_p$ ) correlations among body weights at different ages.....	17-18
4 Reviewed estimates of proportions of variation for daily gain at different age intervals.....	19
5 Reviewed estimates of heritability for daily gain at different age intervals.....	20
6 F-ratios of ANOVA for body weight at different ages.....	50
7 Estimates of mating type means ( $\pm S.E.$ ), heterosis ( $H^i$ ), dam additive effect ( $G^m$ ) and sire additive effect ( $G^i$ ) of body weights at different ages.....	54
8 F-ratios of ANOVA for daily gain at different age intervals.....	61
9 Estimates of mating type means ( $\pm S.E.$ ), heterosis ( $H^i$ ), dam additive effect ( $G^m$ ) and sire additive effect ( $G^i$ ) of daily gain at different age intervals.....	62
10 F-ratios of ANOVA for livability traits at different age intervals.....	63
11 Estimates of mating type means ( $\pm S.E.$ ), heterosis ( $H^i$ ), dam additive effect ( $G^m$ ) and sire additive effect ( $G^i$ ) of livability traits at different age intervals.....	63
12 Estimate of variance components ( $\sigma^2$ ) and proportions of variance (V%) due to sire and dam effects for body weight at different ages.....	70

<i>Table</i>	<i>Page</i>
No.	No.
13	Estimates of heritabilities ( $\pm$ S.E.) due to sire, dam and sire + dam for body weight at different ages..... 70
14	Genetic correlation coefficients ( $\pm$ S.E.) among traits of body weight at different ages (above diagonal) and phenotypic correlation coefficients (below diagonal).....72
15	Estimate of variance components ( $\sigma^2$ ) and proportions of variance (V%) due to random effects for daily gains at different age intervals..... 73
16	Estimates of heritabilities ( $\pm$ S.E.) due to sire, dam and sire + dam for daily gain at different age intervals.....73
17	Average age and body weight at sexual maturity and egg production through the first three months after sexual maturity.....78
18	F – ratios of ANOVA for egg quality traits.....83
19	Estimates of mating type means ( $\pm$ S.E), heterosis ( $H^h$ ), dam additive effect ( $G^m$ ) and sire additive effect ( $G^i$ ) of egg quality traits.....84
20	Estimate of variance components ( $\sigma^2$ ) and proportions of variance (V%) due to sire and dam effects for egg characteristics.....89
21	Estimates of heritabilities ( $\pm$ S.E.) due to sire, dam and sire + dam for egg characteristics..... 89
22	Genetic correlation coefficients ( $\pm$ S.E) among traits of egg base on sire + dam (above diagonal) and phenotypic correlation coefficients (below diagonal).....90
