ROLE OF VENTED EAR MOULD IN FITTING PROGRAMMABLE HEARING AIDS

Thesis

Submitted for partial fulfillment of the M.Sc. Degree
in AUDIOLOGY

Presented By

MEDHAT FATHI MOHAMMED

(M.B., B.Ch.)

Under Supervision of

٤٢٢
Dr. Nagwa M. Abdel-Monem Hazzaa

Assistant Professor of Audiology,
Otolaryngology Department
Ain Shams University

٤٢٢
Dr. Adel Ibrahim Abdel-Maksoud

Lecturer of Audiology
Otolaryngology Department
Ain Shams University

٤٢٢
**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY**

2000

بِسْمِ اللَّهِ
الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا
إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

صَدَقَ اللَّهُ الْعَظِيمُ

سورة البقرة (٢٢)

ACKNOWLEDGMENTS

Before all, I should express my deep thanks to GOD, without his great blessings I would never accomplish my work.

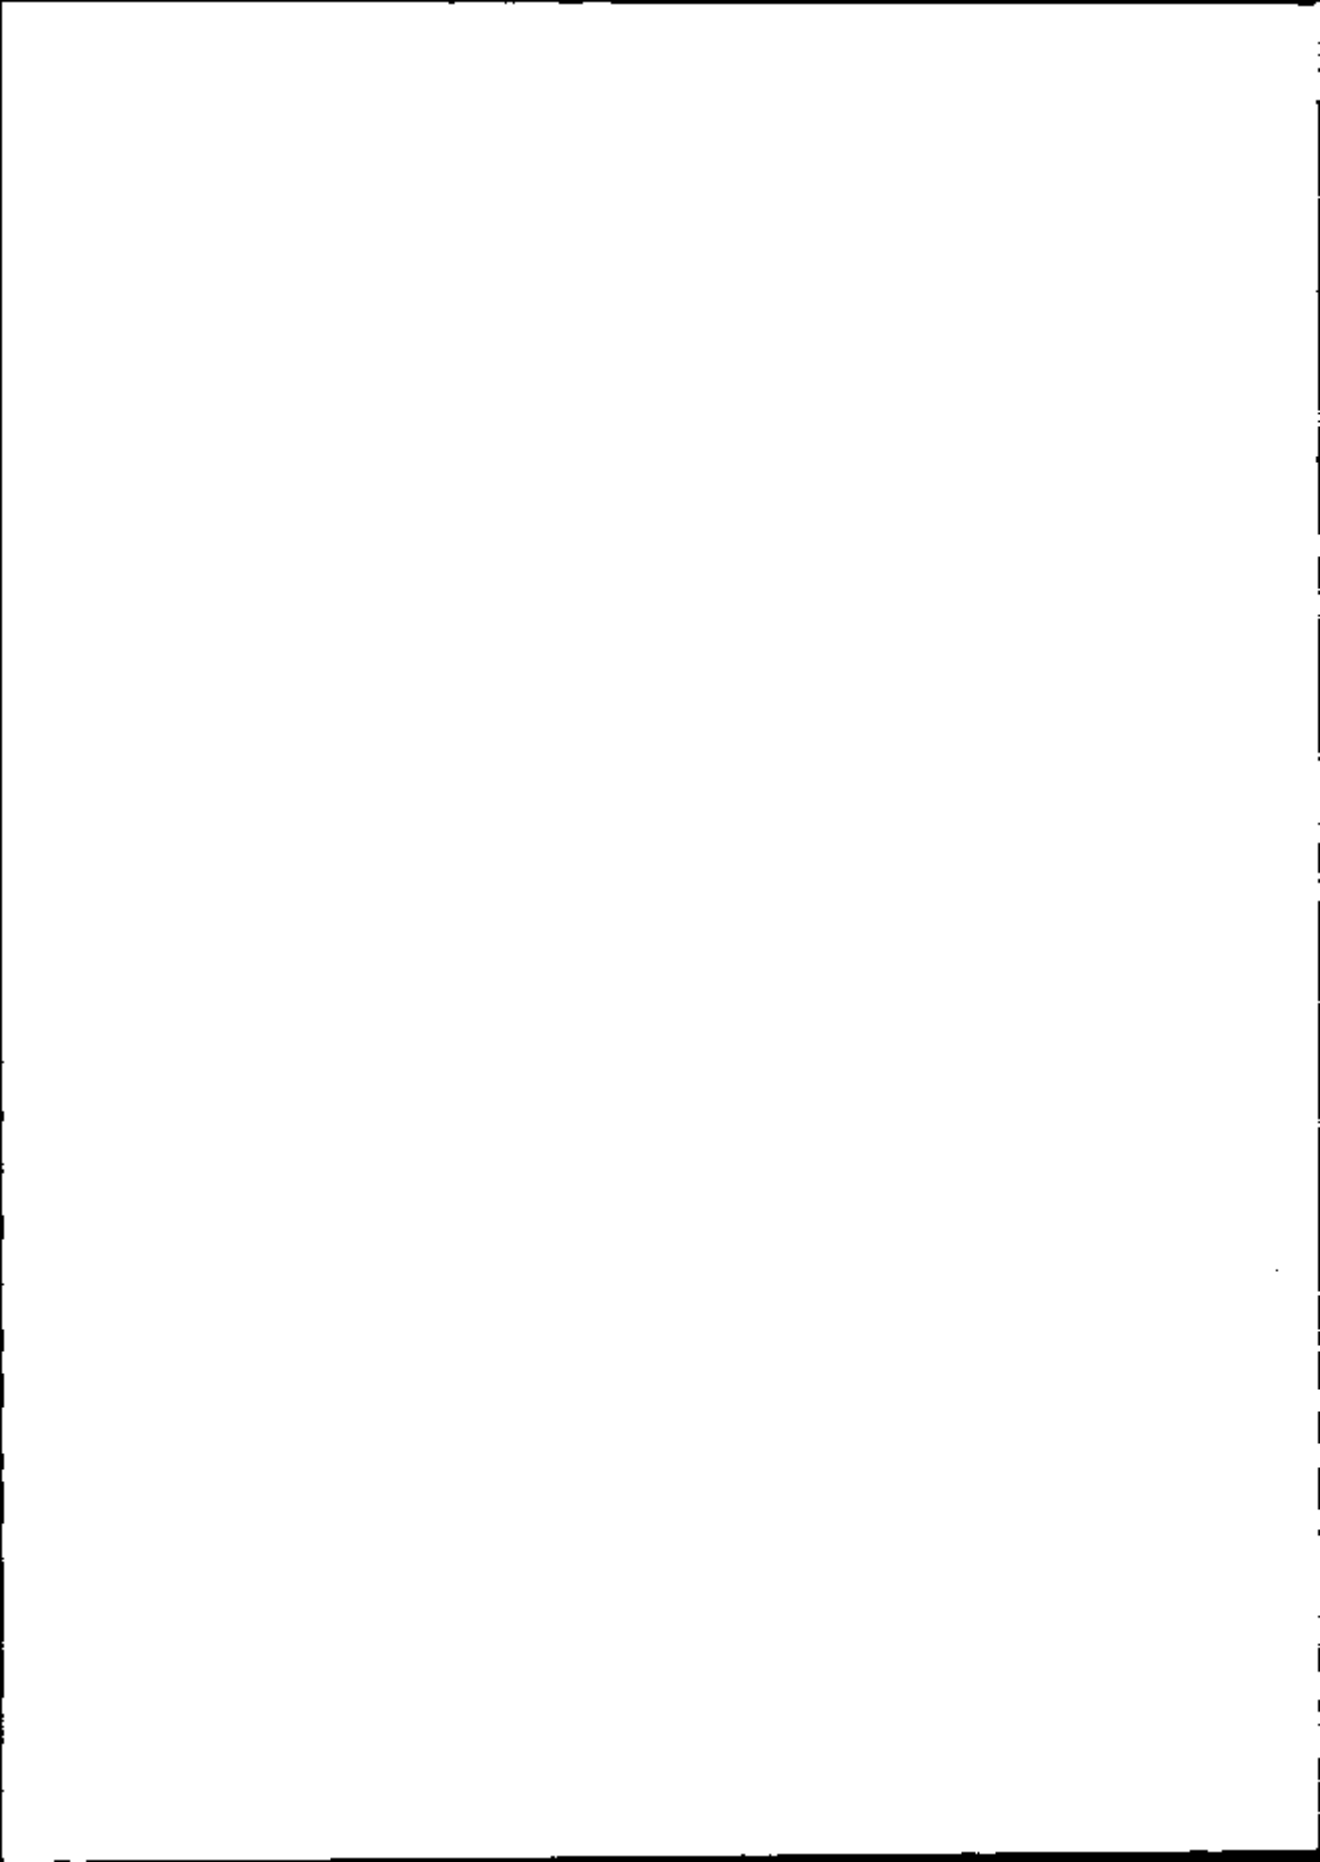

I am deeply obliged to Dr. Nagwa Hazaa, Assistant Professor of Audiology, Faculty of Medicine, Ain Shams University, without her vast experience, knowledge, and continuous meticulous guidance, this work would not have been possible. With her critical mind, brought out the final points of my research and opened new paths of thought which were formerly closed. Her contribution is without doubt, great.

I also feel deeply thankful to Dr. Adel Abdel-Maksoud, Lecturer of Audiology, Faculty of Medicine, Ain Shams University, for his expert guidance, for his illuminating remarks, sympathetic attitude, tremendous assistance, encouragement, excellent guidance and enthusiastic support.

I would like to thank the staff members of Audiology Dept., Faculty of Medicine, Ain Shams and Menoufiya Universities for their help and kind moral support.

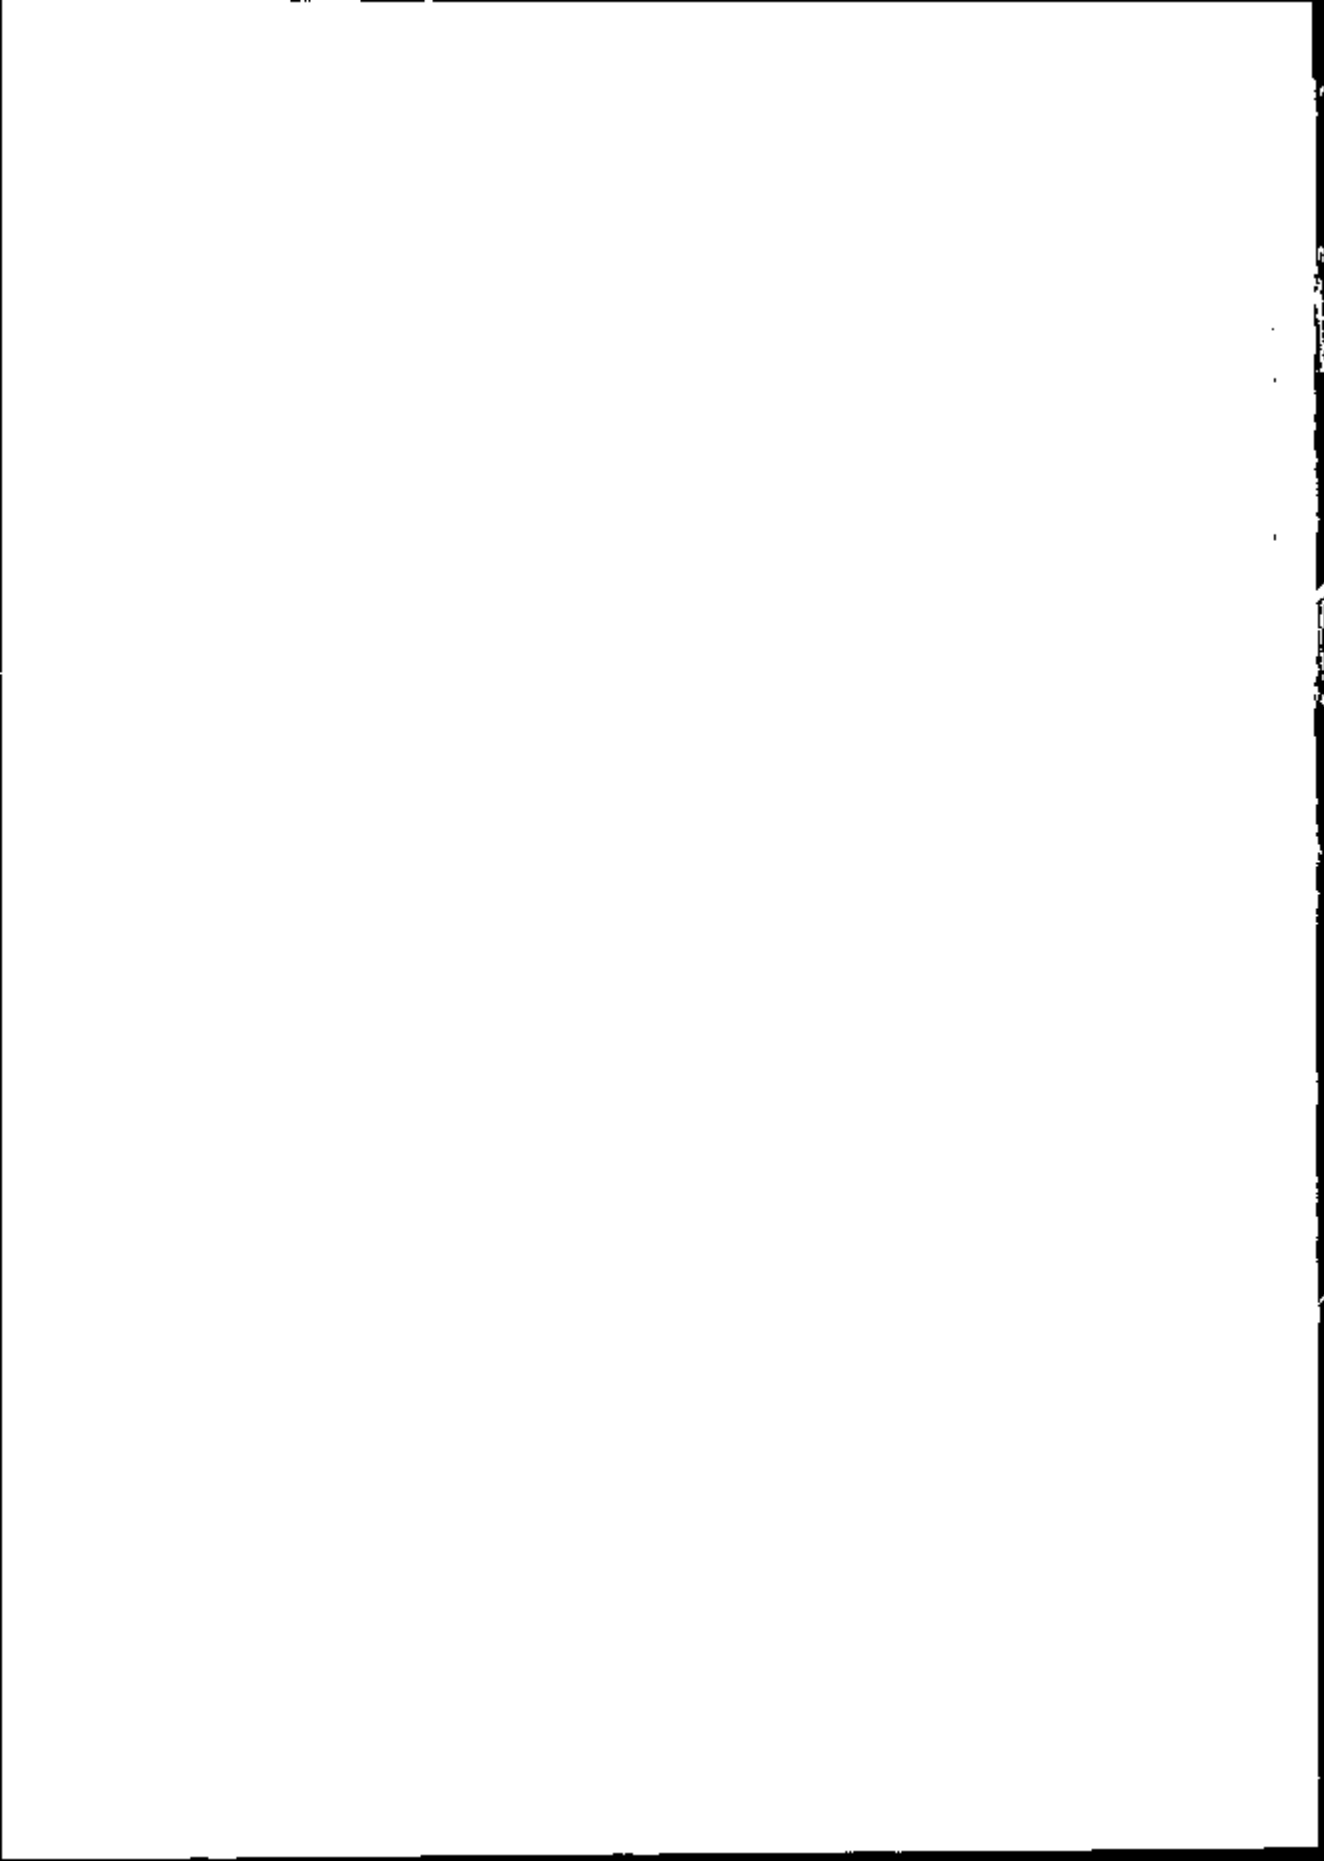

LIST OF ABBREVIATIONS

A/D conversion	Analog to digital conversion
CMOS	Complementary metal oxide semiconductor
EEPROM	Electrically erasable programmable read only memory
H.A	Hearing aid
HIMSA	Hearing Instrument Manufacturers' Software Association
I.C	Integrated circuit
I.G.	Insertion gain.
PVV	Positive venting valve
RAM	Random access memory
REM	Real ear measurement
S.N.H.L	Sensori-neural hearing loss
SAV	Select-a-vent
T.G.	Target gain
VLSI	Very large scale integration circuit
VVV	Variable venting valve

CONTENTS

<i>Item</i>	<i>Page</i>
<u>Introduction</u>	1
<u>Aims of the work</u>	4
<u>Review of Literature</u>	5
• High frequency S.N.H.L	5
• Hearing aids :	9
- History and evaluation	9
- Programmable hearing aids	17
• Coupling system of hearing aids	24
- Earmould	24
- Earmould venting	35
- Role of earmould venting in H.A. fitting	44
- Modification of electroacoustic characteristics of hearing aids	49
<u>Materials and Methods</u>	51
<u>Results</u>	58
<u>Discussion</u>	95
<u>Conclusions</u>	103
<u>Recommendations</u>	104
<u>References</u>	109

LIST OF TABLES

Tab. (1):	The score sheet for quantitative and qualitative analysis	57
Tab. (2):	Mean, standard deviation and range of pure tone thresholds of the study groups.	58
Tab. (3):	Mean, standard deviation and t-test results of the target gain and simulated response with opened vent	60
Tab. (4):	Mean, standard deviation and t-test results of the target gain and simulated response with closed vent	61
Tab. (5):	Mean, standard deviation and t-test results of the functional gain with opened and closed vent in the study group.	62
Tab. (6):	Mean, standard deviation, and t-test results of the target gain and insertion gain with opened vent.	64
Tab. (7):	Mean, standard deviation and t-test results of the target gain and insertion gain with closed vent.	65
Tab. (8):	Mean, standard deviation and t-test results of the insertion gain with opened and closed vent in the study groups.	66
Tab. (9):	Effect of venting on speech clarity.	68
Tab. (10):	Effect of venting on sense of hollowness.	70

Tab. (11): Effect of venting on sense of own voice ringing.	70
Tab. (12): Effect of venting on occurrence of the feedback.	71
Tab. (13): Effect of venting on the overall preference of the hearing aid.	71
Tab. (14): Effect of venting on the overall quantitative scores.	72
Tab. (15): Mean, standard deviation and t-test results of pure tone threshold of sloping and steeping groups	74
Tab. (16): Mean, standard deviation and t-test results of insertion gain of the sloping and steeping groups with opened vent	76
Tab. (17): Mean, standard deviation and t-test results of insertion gain of the sloping and steeping groups with closed vent	77
Tab. (18): The relation between the clarity and the audiometric configuration.	78
Tab. (19): The relation between hollowness and audiometric configuration.	80
Tab. (20): The relation between own voice ringing and audiometric configuration.	81
Tab. (21): The relation between feedback and audiometric configuration.	82
