ACKNOWLEDGMENT

Praise to Allah the most merciful and Compassionate.

I want to express my thankfulness to ***Prof. Dr. Medhat Hassan Shehata***; Professor of Pediatrics, Institute Of Postgraduate Childhood Studies, Ain Shams University, who has guided me and made this work achievable through his assistance and supervision.

Also, I am deeply indebted to ***Prof. Dr. Samia Samy Aziz***; Professor of Public Health, Institute Of Postgraduate Childhood Studies, Ain Shams University, for her utmost help, kind indispensable guidance, valuable instruction and technical support.

I would like to forward my sincere appreciation to ***Prof. Dr. Neveen Tawokol Younis***; Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for giving me the privilege of working under her supervision, and also for dedicating much of his precious time, and wide experience that guided this work to succeed.

Thanks are due to ***Ministry of Social Affairs*** for permitting and facilitating application of the work.

At last but not least, my deepest gratitude to my ***parents*** and all my ***Family members***, for their patience and kindness.

List of Abbreviations

AAP	: American Academy of Paediatrics
ACTH	: Adrenocorticotrophic hormone
ADHD	: Attention Deficit Hyperactivity Disorder
AN	: Anorexia nervosa
ASQ	: Ages and Stages Questionnaire
BDI	: Battelle Developmental Inventory
BMI,	: Body Mass Index,
BMIA	Body Mass Index for age
BOT2-SF	: Bruininks-Oseretsky Test of Motor Proficiency, Second Edition, Short Form
BSID-II	: Bayley Scales of Infant Development-II
CDC	: Centers for Disease Control and Prevention
CNS	: Central Nervous system
DLMs	: Delayed Language milestones
DMMs	: Delayed Motor milestones
DQ	: Developmental Quotient
DSED	: Disinhibited Social Engagement Disorder
GIT	: Gastrointestinal Tract

HC,	: Head Circumference,
HCA	Head Circumference for age
HPA	: Hypothalamic Pituitary Adrenal
Ht, HtA	: Height, Height for age
ICF	: International classification of Functioning, Disability and Health
IQ	: Intelligence Quotient
LB	: late bloomers
LDMs	: Language development milestones
LT	: late talkers
MD	: Maternal deprivation
MDI	: Mental Development Index of Bayley Scales
MDMs	: Motor Development milestones
MUAC,	: Left Mid Upper Arm circumference,
MUACA	Left mid Upper arm circumference for age
NLMs	: Normal Language milestones
NMMs	: Normal Motor milestones
PDI	: Psychomotor Development Index of Bayley Scales
RAD	: Reactive attachment disorder

WHO : World Health Organization

WPPSI : Wechsler Preschool Primary Scale of
Intelligence

Wt, WtA : Weight, Weight for Age

WtHt : Weight for Height

Tables of review

Table	Page
Table (A): Gross, fine motor and self care skills	20
Table (B): Piaget's stages of cognitive development	26
Table (C): Speech and Language Milestones	28
Table (D): Erikson's stages of psychosocial development	33
Table (E): Socio-emotional skills development	34
Table (F): Development of attachment in early childhood	39
Table (G): Growth Delays causes in institutionalized children	43

Tables of results

Table	Page
Table (1): Age distribution for case and control groups.	62
Table (2): Gender distribution for case and control groups.	62

Table (3): Distribution of institution living children according to residency	63
Table (4): Significant medical history findings of institution living children	63
Table (5): Children with history of delayed language and motor milestones in home living controls	64
Table (6): Comparison between case and control groups regarding their growth parameters (Z-Score)	65
Table (7): Comparison between institution living cases and control group regarding their growth parameters (percentiles)	66
Table (8): Comparison between Males' and Females' growth parameters (Z-Score) within case and control groups	67
Table (9): Comparison between males' and females' growth parameters (Percentiles) within case and control groups	68
Table (10): Comparison between case and control groups' growth parameters (Z-Score) in males and in females	69

Table (11): Comparison between case and control groups' Growth parameters (Percentiles) in males and in females	71
Table (12): Comparison between case and control groups regarding different age groups growth parameters (Z-Score)	72
Table (13): Comparison between case and control groups regarding different age groups growth parameters percentiles	73
Table (14): Comparison between case and control groups regarding their Portage assessment Developmental Quotient (DQ)	76
Table (15): Comparison between Males' and Females' Portage assessment DQ within case and control groups	77
Table (16): Comparison between case and control groups' Portage assessment DQ in males and in females	78
Table (17): Comparison between case and control groups regarding different age groups' Portage assessment DQ scores	80

Table (18): Comparison between control children with history of DLMs and those with history of NLMs regarding growth parameters Z Scores and Portage assessment DQs	84
Table (19): Comparison between control children with history of DMMs and those with history of NMMs regarding growth parameters Z Scores and Portage assessment DQs	85
Table (20): Correlation between Duration of institutionalization and growth parameters Z Scores and Portage assessment DQs	86
