**ON WASTE WATER TREATING TECHNOLOGY IN PETROLEUM
INDUSTRY, A THEORETICAL AND EXPERIMENTAL STUDY TO
IMPROVE EFFECTIVENESS OF OIL - WATER SEPARATION IN
CROSS FLOW PACK (CFP) SEPARATORS**

by

Mohammed Essam Mohamed Kandil

**A Thesis submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
DOCTOR OF PHILOSOPHY
in
MECHANICAL POWER ENGINEERING**

Under the Supervision of

Prof. Dr. Mahmoud Ahmed Fouad
Professor of Mechanical Power Engineering
Faculty of Engineering, Cairo University

Prof. Dr. Tharwat Wazier Abo Arab
Professor of Mechanical Power Engineering
Faculty of Engineering, Cairo University

Dr. Farouk Abo El-ela Kenawy
Chairman of Gulf of Suez Petroleum Company

**FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA EGYPT

1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has a solution for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied. In this case the solution is unique and is given by the formula

ACKNOWLEDGMENT

The researcher is very grateful for his supervisors Prof. Dr. Mahmoud Ahmed Fouad, Prof. Dr. Tharwat Wazier AboArab and Dr. Farouk Abo El-ella Kenawy for their keen supervision and valuable instructions. Special thanks and gratefulness are also forwarded to the Management of GUPCO and especially Operations staff for their fruitful help and support to sponsor the experimental work of the present research.
