

Role of MSCT in Evaluation of Coronary Artery Bypass Grafts

Essay

Submitted for partial fulfillment of Master degree in
Radiodiagnosis

Presented by
Maha Mohamed El-Taher Ahmed Ali
M.B, B.CH.
Ain Shams University

Supervised by
Dr.Fardous Abdel-Raof Abdeen
Professor of Radiodiagnosis
Faculty of Medicine
Ain Shams University

Dr.Reem Hassan Bassiouny
Lecturer of Radiodiagnosis
Faculty of Medicine
Ain Shams University

Faculty of Medicine
Ain Shams University
2010

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

"قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ"

صدق الله العظيم

سورة البقرة الآية (٢٥٥)

Acknowledgement

First of all, thanks to God for helping me to carry out this work.

I would like to express my deepest feeling of gratitude to **Prof. Dr. Fardous Abdel-Raof Abdeen**. Prof. of Radiodiagnosis, Ain Shams University, for her valuable instruction, her vast experience and meticulous supervision, her continuous encouragement and support indeed gave me a push to work hard.

All my respect to **Dr. Reem Hassan Bassiouny**. Lecturer of radio diagnosis, Ain shams university, for her effort, supervision and encouragement.

I dedicate this work to my family who have supported me all over my life and made me who I am now and without them I wouldn't have achieved anything.

List of contents

- Introduction and Aim of Work.....1
- Anatomy of the Coronary Vessels.....5
- Coronary Artery Disease.....38
- Coronary artery bypass grafts, types, procedures and follow up.....55
- Physical and Technical Principal of MDCT.....83
- MDCT assessment of the coronary grafts.....146
- Summary and conclusion.....180
- References.....184
- Arabic summary.....--

List of Figures

Chapter (1)

<i>No.</i>	<i>Title</i>	<i>Page</i>
1	The right, left and right posterior aortic sinuses	6
2	Origin of the coronary arteries and cranial	6
3	Left coronary artery with its branches	8
4	Recurrent course of the distal segment of the left anterior descending artery	10
5	Anatomical variants of diagonal (Diag) branches	11
6	Left circumflex (LCX) artery	12
7	Intermediate coronary artery	14
8	Anatomy of the right coronary artery (RCA)	17
9	Independent origin of the right conal artery	17
10	<i>Marginal acute (MAc-1,MAc-2) branches</i>	18
11	<i>Posterior-right-ventricular branch</i>	18
12	<i>Anterior and posterior views of the posterior descending artery (PDA)</i>	19
13	Large posterolateral (PL) branch from the (RCA)	19
14	Examples of posterior descending arteries (PDA)	22
15	PDA originating from the circumflex artery	22
16	Balanced coronary circulation pattern	23
17	Separate origins of the LAD and LCX	25
18	LCA arising from the right coronary sinus	26
19	LAD artery arising from the right coronary sinus	26

<i>No.</i>	<i>Title</i>	<i>Page</i>
20	High takeoff of the RCA	27
21	Renderings of the left coronary arterial and venous systems	29
22	RCA in the inferior atrioventricular groove partly covered by the middle cardiac vein	29
23	Axial anatomy of the heart in the craniocaudal direction.	34
24	Vertical long axis views of the heart	35
25	Short axis view of the heart.	36
26	Horizontal long axis views of the heart	37

Chapter (3)

<i>No.</i>	<i>Title</i>	<i>Page</i>
1	Typical appearances of right (arrow) and left (solid arrowhead) SVGs	61
2	Normal anatomy of the coronary arteries& shows examples of CABGs	61
3	Mechanical aortic connector	63
4	SVG positioned at a 90° angle relative to the aorta	63
5	Left IMA grafts	69
6	Right IMA graft	69
7	Multiple CABGs in patient	74
8	MIP reconstruction of the left internal mammary artery	77
9	Intramyocardial course of the left anterior descending artery	78

Chapter (4)

<i>No.</i>	<i>Title</i>	<i>Page</i>
1	Single slice CT scanner	87
2	X-ray absorption and signal detection	87
3	Multislice (multi-row) detector CT	90
4	Anatomic area evaluated in a single rotation of the X-ray tube	91
5	ECG gating as shown on the CT console	95
6	prospective ECG-triggered scan mode	97
7	Retrospective scanning method	100
8	Differences between partial scan reconstruction versus multiple-segment reconstruction	104
9	Image differences between partial scan reconstruction versus multiple-segment reconstruction	106
10	Pitch definition	108
11	Isotropic voxel	110
12	<i>Stair step artifact</i>	114
13	Artifacts due to incomplete breath holding	116
14	Metallic sternal wires, surgical clips	118
15	High-attenuating artifacts	119
16	Low-attenuating artifact	119
17	Improved depiction of a coronary artery bypass graft with delayed scanning	121
18	Automatic segmentation reconstruction artifact	122
19	Contrast-enhanced retrospectively ECG-gated	136
20	Reconstruction of images on the three different anatomic planes	142
21	Reconstruction of coronary vessels on a	143

	curved plane	
22	Volume-rendering technique	145

Chapter (5)

<i>No.</i>	<i>Title</i>	<i>Page</i>
1	High-attenuating artifacts	149
2	Metallic sternal wires surgical clips	149
3	Free saphenous venous grafts to the distal RCA	150
4	Volume rendering 16- MDCT images	151
5	Significant metallic artifacts related	153
6	Volume rendering shows significant eccentric stenosis at the proximal anastomotic site of the venous graft	154
7	Curved multiplanar reconstruction 16-MDCT images	155
8	Stepladder artifact due to pulmonary motion	156
9	Patent left internal mammary artery (LIMA) graft to the left anterior descending artery (LAD)	158
10	Significant stenosis of the distal runoff artery (the distal RCA)	159
11	Conventional coronary angiogram&64-(MSCT)	160
12	Example of CT 64-slice angiography	161
13	Patent LIMA to LAD graft	162
14	Oblique MPR showing free saphenous venous grafts from the aortic root to the PDA	163
15	Stenosis of the left subclavian artery	164
16	LIMA connected to the LAD	165
17	Volume-rendered image shows aortic	167

	<i>connectors</i>	
<i>18</i>	<i>Curved multiplanar reformation image shows kinking of a right SVG</i>	<i>168</i>
<i>19</i>	<i>Curved multiplanar reformation image shows a radial artery graft with postoperative vasospasm</i>	<i>169</i>
<i>20</i>	<i>Pseudoaneurysm of an SVG</i>	<i>171</i>
<i>21</i>	<i>Iatrogenic early graft occlusion</i>	<i>172</i>
<i>22</i>	<i>Three-dimensional volume-rendered image shows an unsuspected pulmonary embolism after CABG</i>	<i>175</i>

List Of Tables

<i>Table No.</i>	<i>Title</i>	<i>Page</i>
<i>1</i>	<i>corresponding sites of myocardial lesions in the typical right dominant heart</i>	<i>42</i>
<i>2</i>	<i>Comparative Anatomic and Physiological Properties of Internal Mammary Artery and Saphenous Vein</i>	<i>66</i>
<i>3</i>	<i>Contraindications to iodinated contrast agents</i>	<i>125</i>
<i>4</i>	<i>Contraindications to Nitroglycerin</i>	<i>125</i>
<i>5</i>	<i>Contraindications to Beta-Blockade</i>	<i>126</i>
