التوثيق الالكتروني والميكرو فيلم

جامعة عين شمس

التوثيق الالكتروني والميكرو فيلم

قسم

نقسم بالله العظيم أن المادة التي تم توثيقها وتسجيلها
علي هذه الأفلام قد اعدت دون أية تغيرات

يجب أن

تحفظ هذه الأفلام بعيداً عن الغبار

في درجة حرارة من 15 – 20 مئوية ورطوبة نسبية من 20-40 %

To be kept away from dust in dry cool place of
15 – 25c and relative humidity 20-40 %

EVALUATION OF POST RENAL TRANSPLANT PROTEINURIA

By

AYMAN FATHI REFAIE IBRAHEIM
M.B.B.ch, M.Sc. (General Medicine)

THESIS

Submitted in partial fulfillment of
M.D. degree in ' **General Medicine** '

SUPERVISORS

Prof. Dr.

GALAL MOHAMED AMER

Prof. & Head of General Medicine
Dept., Faculty of Medicine
Menofia University

Prof. Dr.

MOHAMED AHMED GHONEIM

Prof. & Head of Urology Dept. &
Director of Urology & Nephrology
Center, Mansoura University

Prof. Dr.

MOHAMED ABD EL- KADER SOBH

Prof. of General Medicine & Head of
Nephrology Dept., Urology & Nephrology
Center, Mansoura University

Prof. Dr.

FATMA EL- HOUSENY MOUSTAFA

Ass. Prof. of Pathology
Faculty of Medicine
Mansoura University

Dr.

HASSAN ABD EL-HADY AHMED

Ass. Prof. of General Medicine
Faculty of Medicine
Menofia University
(1997)

LIST OF CONTENTS

=====

	Page
* Introduction.....	1
* Aim of the work	2
* Review of Literature.....	3
A- Proteinuria	
- Introduction	4
- Mechansim and significance of proteinuria	6
- Types and pathophysiology of proteinuria	12
- Renal hemodynamics and proteinuria	19
- Proteinuria and progression of renal disease.....	24
- Measurement of urinary proteins	26
B- Post - transplant proteinuria	
- Introduction	32
- Chronic allograft rejection	34
- Proteinuria and chronic rejection	38
- Allograft glomerulopathy.....	40
- Recurrent renal disease	44
- De novo glomerulonephritis	59
- Cyclosporine Nephrotoxicity	61
* Patients and Methods	65
* Results	78
* Discussion	133
* Summary and Conclusion	143
* References	145.
* Arabic Summary	

LIST OF TABLES

=====

	Page
Table (1) : Demographic data (Proteinurics Vs. non-proteinurics)	88
Table (2) : Mean serum creatinine concentrations (Proteinurics Vs. non-proteinurics)	89
Table (3) : Frequency of rejection episodes (Proteinurics Vs. non-proteinurics)	90
Table (4) : Pre and post-transplant hypertension (Proteinurics Vs. non-proteinurics)	91
Table (5) : Antihypertensive therapy (Proteinurics Vs. non-proteinurics)	92
Table (6) : Original kidney disease (Proteinurics Vs. non-proteinurics)	93
Table (7) : Original kidney disease in all recipients	94
Table (8) : Pattern of pathological lesions in the grafts	95
Table (9) : Graft histopathology in the studied recipients	96
Table (10) : Histopathological findings in the grafts of biopsed cases of all recipients	97
Table (11) : Demographic data (microalbuminurics Vs. non-microalbuminurics)	99
Table (12) : Mean serum creatinine concentrations (microalbuminurics Vs. non-microalbuminurics) ...	100

Table (13) :	Frequency of rejection episodes (microalbuminurics Vs. non-microalbuminurics) ...	101
Table (14) :	Pre and post-transplant hypertension (microalbuminurics Vs. non-microalbuminurics)....	102
Table (15) :	Antihypertensive therapy (microalbuminurics Vs. non-microalbuminurics) ...	103
Table (16) :	Pathological abnormalities in the grafts (microalbuminurics Vs. non-microalbuminurics) ...	104
Table (17) :	Clinical and laboratory characteristics of the proteinurics according to the degree of proteinuria.....	105
Table (18) :	Relation between the degree of proteinuria and frequency of rejection episodes	106
Table (19) :	Relation between the degree of proteinuria and histopathological findings	107
Table (20) :	Relation between the degree of proteinuria and graft and patient survivals	108
Table (21) :	Case profiles of recipients with nephrotic-range proteinuria	109

LIST OF FIGURES

=====

	Page
Fig (1) : Mean Serum Creatinine Concentrations (mg/dl) In The Two Groups (Proteinurics Vs non-proteinurics) At Comparable Time Points Post Transplants	110
Fig (2) : Frequency of Rejection Episodes in The Two Groups (Proteinurics Vs non-proteinurics)	111
Fig (3) : Frequency of pre and post transplant Hypertension In both groups	112
Fig (4) : Comparison of Antihypertensive Therapy Used In Both Groups	113
Fig (5) : Original Kidney Disease In Both Groups	114
Fig (6) : Frequency of Pathological Lesions In The Grafts of Both Groups (Proteinurics Vs non-proteinurics)	115
Fig (7) : Kaplan-Meier graft survival graph	116
Fig (8) : Mean Serum Creatinine Concentrations (mg/dl) In Microalbuminurics And Non-Microalbuminurics At Comparable Time Points	117
Fig (9) : Frequency Of Rejection Episodes In Microalbuminurics Vs Non- Microalbuminurics	118
Fig (10) : Frequency Of Pre And Post Transplant Hypertension In Microalbuminurics Vs Non Microalbuminurics	119

Fig (11) : Antihypertensive Therapy Used In Microalbuminurics Vs Non -Microalbuminurics	120
Fig (12) : Frequency of Pathological Lesions In The Grafts Of Microalbuminurics Vs Non Microalbuminurics.....	121
Fig (13) : Original Kidney Disease In Microalbuminurics Vs Non Microalbuminurics	122

HISTOPATHOLOGICAL FIGURES

=====

- Fig (1):** Focal segmental glomerulosclerosis in native kidney (PAS x 250).....123
- Fig (2):** Focal segmental glomerulosclerosis in native kidney (Direct immuno fluorescence x 250).....123
- Fig (3):** Recurrent focal segmental glomerulosclerosis in the graft (PAS x 250).....123
- Fig (4):** Renal amyloidosis in native kidney (Congo redx400)..124
- Fig (5):** Renal amyloidosis in native kidney (Congo red - polarised light x 250).....124
- Fig (6):** Renal oxalosis in native kidney (Hx &E - Polarised light x 100).....125
- Fig (7):** Recurrent oxalosis in the graft (Hx & E x 100).....125
- Fig (8):** Mesangiocapillary glomerulonephritis (Hx & E x 400)...126
- Fig (9):** Mesangiocapillary glomerulonephritis type II (Uranyl acetate & lead citrate x 5000).....126
- Fig (10):** Membranous nephropathy (PAS x 400).....127
- Fig (11):** Membranous nephropathy (Direct immunoflorescence x 400).....127
- Fig (12):** IgA nephropathy (Hx &E x 250).....128

Fig (13): IgA nephropathy (Direct immunofluorescencex400).128

Fig (14): Crescentic glomerulophritis (Hx & E x 400).....128

Fig (15): Acute cellular rejection (Hx & E x 100).....129

Fig (16): Chronic rejection (Hx & E x 100).....129

Fig (17): Chronic cyclosporine vasculopathy (PAS x 400).....130

Fig (18): Transplant glomerulopathy (PAS x 400).....130

Fig (19): Transplant glomerulopathy (Uranyl acetate & lead citrate x 6700).....131
