Department of Computer
Engineering and Systems

Building Scalable Grid Resource Management Systems Based on the P2P Paradigm

By

Eng. Ahmed Abdul-Aziz Abdul-Haleem Hamza

A Thesis Submitted in Partial Fulfillment of the Requirements for the Masters of Science
Degree in Automatic Control Engineering

Y/COY

Supervisors

Prof. Mofreh M. Salem

A. Prof. Hesham A. Ali

*Head of
Computer Engineering and Systems Department
Faculty of Engineering, Mansoura University
Mansoura, Egypt*

*Department of Computer Engineering and Systems

Thesis Title:

**Building Scalable Grid Resource Management
Systems Based on the P2P Paradigm**

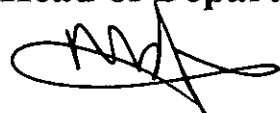

Researcher Name:

Eng. Ahmed Abdul-Aziz Abdul-Haleem Hamza

Supervisors:

<i>Id</i>	<i>Name</i>	<i>Position</i>	<i>Signature</i>
1	Prof. Mofreh Mohammed Salem	Head of Computer Engineering & Systems Department - Faculty of Engineering – Mansoura University	
2	Assoc. Prof. Hesham Arafat Ali	Assoc. Prof. at Computer Engineering & Systems Department – Faculty of Engineering – Mansoura University	

Head of Department

Vice Dean

Faculty Dean

*To my parents, and my dearest brother, Amgad. Without you,
none of this would have been possible.*

Acknowledgements

First, and foremost, the praise goes to Allah for granting me the patience, inspiration, and persistence to complete this work.

I'd like to express my gratitude to all my professors at the Department of Computers and Systems Engineering where I spent most of the time during my M.Sc. period. My supervisors: **Prof. Mofreh Mohammed Salem**, head of the department, for his care and support and directing comments, and **Assoc. Prof. Hesham Arafat Ali**, for his encouragement, guidance, enlightening discussions, and patience with me along this journey. I sincerely thank them both for their confidence and trust, and for giving me the opportunity to do this thesis project under their supervision. Special thanks to our mentor, and the Godfather of the department, **Prof. Ali Ibrahim El-Desouky**, from whom we've all learned a lot. His care and concern for all the members of the department is undeniable. I wish them all good health, happiness, and prosperity.

Words cannot describe the gratitude I owe to my parents. They have constantly kept me motivated at all times in my life and gave everything up (and more) so that I could realize my dreams. Without their help and support, I wouldn't have been able to pursue the master's degree.

I would also like to deeply thank everyone who provided me with advice and helped me in any way during the time I spent on this work, especially the following:

-
- My colleagues: Abdul-Rahman Azab, for our insightful discussions and brainstorming sessions, and Sally El-Ghamrawy and Noha Sakr, for their support and encouragement along the way.
 - The FreePastry team, including: Alan Mislove, James Stewart, Animesh Nandi, and, especially, Jeff Hoyer for guiding me through the mazes of FreePastry's code.
 - Eng. Ahmed El-Shikh, for his invaluable advice that has always directed me towards taking successful steps in my life.

Finally, I thank all those who replied my e-mails and answered my questions during the past couple of years including: Thomas Zahn (INRIA), Nuno Lopes (University of Minho), and Ioannis Aekaterinidis (University of Patras). Your explanations and discussions really broadened my perspective.
