B.Sc. in Botany and Chemistry (2008)
Faculty of science, Ain Shams University

Thesis Submitted as
A Partial Fulfillment of the Requirements of
Master Degree in Botany (Physiology)
To
Botany department, Faculty of women for Arts, Science and Education, Ain Shams
University

Supervisions

Prof. Dr. Kawther Mohamed Tawfik

Professor of Plant Physiology,
Botany Department, Faculty of Women,
Ain Shams University

**Prof. Dr. Samy Mostafa
Mohammed**

Professor of Phytochemistry,
Medicinal and Aromatic Plants Research
Department,
National Research Center

**Prof. Dr. Abdelaaty Abdelaziz
Shahat**

Professor of Phytochemistry,
Phytochemistry Department,
National Research Center

2017

APPROVAL SHEET

Title of thesis: **“Hypoglycemic effect and antioxidant of some Egyptian medicinal plant extracts”**

Presented by

Lina Hossam El_Din Zaki

(سورة طه آيه ١١٤)

ACKNOWLEDGEMENT

My first and last gratitude to the Almighty " ALLAH" for giving me the health, strength, patience and faith to undertake this work.

I would like to express my sincere and special thanks to **PROF. DR. KAWTHER MOHAMED TAWFIK**, Professor of plant physiology, Botany Department, Faculty of woman, Ain Shams University for her advice, guidance and encouragement as well as her academic experience and great efforts with me.

I also like to express my appreciation and everlasting gratitude to **PROF. DR. SAMY MOSTAFA MOHAMMED**, Professor of Phytochemistry, Medicinal and Aromatic Plants Research Department, National Research Center for his keen supervision, teaching everything from the ground up, fruitful help and his advice throughout the course of this work, also for providing all facilities and supplies to carry out this study.

I am also indebted to **PROF. DR. ABDELAATY ABDELAZIZ SHAHAT**, Professor of Phytochemistry, Phytochemistry Department, National Research Center for aiding in suggesting, planning the point of the research and his supervision, support, continuous encouragement, preparing and revising the manuscript.

.

Deep thanks to **PROF. DR. SAMIR A. E. BASHANDY**, Professor of Pharmacology, Pharmacology Department, National Research Center for his guidance and great encouragement, also aiding in carried out biological activities for this work and preparing the manuscript.

I like to express my deepest gratitude to **PROF. DR. FATMA A. MORSY**, Professor of Histology, Pathology Department, National Research Centre for her cooperation and advice in histology samples in this work.

I would also like to thank Head of Botany Department **PROF. DR. ABEER AHMED RUSHDY**, Faculty of woman, Ain Shams University, for her encouragement and help.

I am also grateful to **DR. ZINAB AHMED ABDEL-GAWAD**, Assistant professor of plant physiology, faculty of woman, Ain Shams University for her helpful advices.

My thanks and gratitude also to **AMR MOHAMMED** and **MOHAMMED IBRAHIM**, Research assistant, Medicinal and Aromatic Plants Research Department, National Research Center for their helpful during the present investigation.

Sincere thanks are extended to all members of Medicinal and Aromatic Plants Research Department, National Research Centre, Dokki, Cairo, Egypt. And great appreciation is given to all staff members of Department of Botany, Faculty of woman, Ain Shams University.

Heartily thanks and deepest love are specially expressed to my family for their wholehearted support and encouragement.

Dedicated to

My Father,

My Mother,

My Husband,

My Brothers,

My Sister,

For their patience and help.

**This thesis has not been previously submitted
for any degree at this or any other university**

LIST OF ABBREVIATIONS	IV
ABSTRACT	VI
1 INTRODUCTION	1
2 REVIEW OF LITERATURE	6
2.1 <i>Hibiscus rosa sinensis</i> :-----	6
2.1.1 Chemical composition of <i>Hibiscus rosa sinensis</i> :	10
2.1.2 Pharmacological activities of <i>Hibiscus rosa sinensis</i> :	16
2.2 <i>Beta vulgaris rubra</i> :-----	20
2.2.1 Chemical composition of <i>Beta vulgaris rubra</i> :.....	23
2.2.2 Pharmacological activities of <i>Beta vulgaris rubra</i> :.....	32
3 MATERIALS AND METHODS	37
3.1 Chemicals:-----	37
3.2 Apparatus and Instruments:-----	38
3.3 Plant materials: -----	39
3.4 Extraction:-----	40
3.5 Preliminary phytochemical screening of the extracts of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves:-----	40
3.5.1 Tests for Sterols and Triterpenoids.....	40
3.5.2 Test for carbohydrates and/or glycosides:	41
3.5.3 Test for tannins	41
3.5.4 Test for phenolic compounds	42
3.5.5 Tests for flavonoids.....	42
3.5.6 Test for saponins	43
3.5.7 Test for alkaloids	43
3.5.8 Test for coumarins	43

3.5.9	Test for Amino acids and Proteins	44
3.5.10	Test for Anthraquinone Glycosides (Borntrager's test)	44
3.5.11	Test for Hydroxyanthraquinone (Borntrager's test)	44
3.5.12	Test for Quinones.....	45
3.5.13	Test for Cardiac glycosides.....	45
3.5.14	Test for Fixed oils and Fats.....	45
3.5.15	Tests for Volatile oils.....	46
3.6	Isolation and identification of saponifiable and unsaponifiable matter of n-hexane extract of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves-----	46
3.6.1	Saponification	46
3.6.2	Methylation.....	47
3.7	Determination of total phenolics and flavonoids of methanol extract of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves-----	48
3.7.1	Estimation of total phenolics	48
3.7.2	Estimation of total flavonoids.....	49
3.8	Isolation and identification of flavonoid and phenolic compounds of <i>Hibiscus rosa sinensis</i> leaves:-----	49
3.8.1	Isolation and identification of flavonoid compound from ethyl acetate extract:	50
3.8.2	Isolation and identification of phenolic compound from butanol extract:	51
3.9	Biological investigation of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves extracts: -----	53
3.9.1	Experimental animals:.....	53
3.9.2	Bioassay study of methanolic extracts:.....	54
3.9.3	Induction of diabetes:	54
3.9.4	Preparation of the extracts:	55
3.9.5	Experimental design:.....	56
3.9.6	Blood samples:	57
3.9.7	Liver samples:.....	57

3.9.8	Biochemical parameters in blood:	58
3.9.9	Hepatic antioxidant activity:	66
3.9.10	Histological studies:	76
3.9.11	Statistical analysis:	79
4	RESULTS AND DISCUSSION	80
4.1	Phytochemical investigation:-----	80
4.1.1	Percentage of methanolic leaves extracts of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i>	80
4.1.2	Phytochemical screening of the methanolic extracts of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves:	80
4.1.3	Fatty acid methyl esters profile	82
4.1.4	Unsaponifiable matter profile.....	89
4.1.5	Investigation of total phenolics and total flavonoids in the extracts: 105	
4.1.6	Isolation and identification of flavonoid and phenolic compounds of <i>Hibiscus rosa sinensis</i> leaves:	106
4.2	Biological investigation of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves extracts: -----	115
4.2.1	Bioassay study of methanolic extracts:.....	115
4.2.2	Effect of methanolic (80%) extract of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves on body weight (g.) of normoglycemic and STZ induced diabetic rats:.....	117
4.2.3	Biochemical parameters:	122
4.2.4	Hepatic antioxidant parameters:	143
4.2.5	Histological results:	150
5	SUMMARY AND CONCLUSION	160
6	REFERENCES	170

LIST OF TABLES

Table (1). Percentage of different extracts of <i>B. vulgaris rubra</i> and <i>H. rosa sinensis</i> leaves	80
Table (2). Phytochemical screening of fractions from total methanolic of <i>H. rosa sinensis</i> and <i>B. vulgaris rubra</i> leaves.	81
Table (3): GC/MS analysis of fatty acid methyl esters of <i>H. rosa-sinensis</i> leaves.	83
Table (4): GC/MS analysis of fatty acid methyl esters of <i>B. vulgaris rubra</i> leaves. .	87
Table (5): GC/MS analysis of unsaponifiable matter of <i>H. rosa sinensis</i> leaves.	90
Table (6): GC/MS analysis of unsaponifiable matter of <i>B. vulgaris rubra</i> leaves: ...	94
Table (7). Percentage of total phenolics and total flavonoids in methanol (80%) extract of <i>H. rosa sinensis</i> and <i>B. vulgaris rubra</i> leaves.....	105
Table (8): NMR of Verbascoside:	109
Table (9): Acute toxicity of methanolic (80%) extract.	117
Table (10): Effect of methanolic (80%) extract of <i>Hibiscus rosa sinensis</i> and <i>Beta vulgaris rubra</i> leaves on body weight (g.) of normoglycemic and STZ induced diabetic rats.	118
Table (11): Effect of methanolic (80%) extract of <i>H. rosa sinensis</i> and <i>B. vulgaris rubra</i> leaves on blood glucose level (g/dL) of normoglycemic and STZ induced diabetic rats.	123
Table (12): Effect of methanolic (80%) extract of <i>H. rosa sinensis</i> and <i>B. vulgaris rubra</i> leaves on levels of blood ALT, AST, uric acid, creatinine, total protein and cholesterol of normoglycemic and STZ induced diabetic rats.....	131
Table (13): Effect of methanolic (80%) extract of <i>H. rosa sinensis</i> and <i>B. vulgaris rubra</i> leaves on hepatic malondialdehyde (MDA), reduced glutathione (GSH), superoxide dismutase (SOD), catalase (CAT) of normoglycemic and STZ induced diabetic rats.	144

LIST OF ABBREVIATIONS

Abbreviation	Complete name
NMR	Nuclear magnetic resonance
¹³ C NMR	Carbon -13 nuclear magnetic resonance
¹ H NMR	Proton nuclear magnetic resonance
ALT	Alanine transferase
ANOVA	Analysis of variance
AST	Aspartate transferase
BVR	<i>Beta vulgaris rubra</i>
CAT	Catalase
Conc.	Concentrated
dl	deciliter
g.	Gram
GC/MS	Gas chromatography/mass spectroscopy
Glib.	Glibenclamide
GSH	Glutathione reduced
HDL	High density lipoprotein
HDL-C	High density lipoprotein -cholesterol
HPLC	High performance liquid chromatography
h.	Hour
HRS	<i>Hibiscus rosa sinenss</i>
L.	Linnaeus
LDL	Low density lipoprotein
LDL-C	Low density lipoprotein -cholesterol
LSD	Least significant difference
MDA	Malondialdehyde
mg/kg bw.	Milligram per kilogram body weight
