**MELANOCYTIC NEVI AND MELANOMAS:
DIAGNOSTIC AND PROGNOSTIC EVALUATION
BY NUCLEOLAR ORGANISER REGIONS AND
IMAGE CYTOMETRY**

Thesis

Submitted to the Faculty of Medicine

University of Alexandria

**In the Partial Fulfilling of the Requirements
of the Doctor Degree of Dermatology and Venereology**

BY

Naglaa Mohamed El Sayed Mohamed

MBBCH Alexandria University

MSDVD

Assistant lecturer in the Department of

Dermatology and Venereology

Alexandria University

 **2001**

SUPERVISORS

Prof. Dr. Adel Hasan El Beheiry

**Professor of Dermatology and Venereology,
Faculty of Medicine,
University of Alexandria.**

Prof. Dr. Mohamed Hami Mostafa Embabi

**Professor of Dermatology and Venereology,
Faculty of Medicine,
University of Alexandria.**

Prof. Dr. Magdy Abd El Aziz Ragab

**Professor of Dermatology and Venereology,
Faculty of Medicine,
University of Alexandria.**

Co-Workers

Prof.Dr. Omayma Mohamed El Saka

**Professor of Pathology,
Faculty of Medicine,
University of Alexandria.**

Prof. Dr. Magdy Mahmoud Degheidy

**Assistant professor of Plastic Surgery
Faculty of Medicine,
University of Alexandria.**

ACKNOWLEDGMENT

Thanks to Allah, that this work has been completed.

I would like to express my deepest gratitude and appreciation to Prof. Dr. Adel El Behairy professor of Dermatology and Andrology, faculty of Medicine, Alexandria University, for his guidance, supervision and kind direction through this work.

I am very grateful to Prof. Dr. Hani Embabi professor of Dermatology and Andrology, faculty of Medicine, Alexandria University, for his helpful comments and supervision.

My sincere gratitude and appreciation to Prof. Dr. Magdy Ragab professor of Dermatology and Andrology, faculty of Medicine, Alexandria University, for his unlimited support, sincere advice and continuous supervision through the whole work.

No words can adequately express my great indebtedness to Prof. Dr. Emayma El Saka Prof. of pathology, faculty of Medicine, Alexandria University, who willingly sacrificed a lot of her time in this thesis. Her generous help and valuable comments are cordially appreciated.

I would like to express my thanks to Dr. Magdy Degheidy Assist Prof. of plastic surgery, for his active participation to complete the practical part of this study.

Finally, I wish to thank all colleagues in the Department of Dermatology and Andrology, faculty of Medicine, Alexandria University and to every body who offered help during this work.

To My Family

Aim of the Work	73
Material and Methods	74
Results	82
Discussion	198
Summary	225
Conclusion	228
References	230

List of Tables

No.		Page
I-	The clinical diagnoses of the studied cases and accuracy in relation to histopathologic diagnoses	83
II-	The dermoscopic diagnoses of the studied cases and accuracy in relation to histopathologic diagnoses	84
III-	Sensitivity, specificity, predictive positive and negative tests of clinical and dermoscopic criteria in benign melanocytic lesions	85
IV-	Sensitivity, specificity, predictive positive and predictive negative tests of clinical and dermoscopic criteria in malignant melanoma	85
V-	The observed dermoscopic criteria in 233 cases of pigmented skin tumors	87
VI-	The frequency of epidermoscopic criteria in selected benign, dysplastic and malignant melanoma cases	88
VII-	Dermoscopic patterns shared in melanocytic nevi and dermoscopically confused pigmented skin lesions	89
VIII-	Dermoscopic patterns shared in malignant melanoma and dermoscopically confused pigmented skin lesions	89
IX-	Patterns of shared dermoscopic criteria of melanocytic and non melanocytic skin lesions	90
X-	Histopathologic diagnoses of the selected melanocytic lesions	92
XI-	Distribution of cases of common acquired nevi in relation to localization	97

List of Tables Con.

No.		Page
XII-	The frequency of epidermoscopic criteria (ELM) in the studied cases of common acquired nevi	98
XIII-	Evaluation of the AgNOR and ploidy parameters in three histologic subtypes of common acquired nevi	99
XIV-	Relation of the different studied parameters to sun exposure	100
XV-	Evaluation of the AgNOR and ploidy parameters in giant and non giant congenital nevi	140
XVI-	Distribution of the 14 studied cases of malignant melanoma according to the site affected	173
XVII-	Histopathologic data of the studied melanoma cases	176
XVIII-	Nucleolar organiser regions (AgNOR) values in different studied melanocytic lesions	193
XIX-	Evaluation of the ploidy parameters in different melanocytic lesions	194
XX-	The relationship between AgNOR and the studied DNA index, proliferative index and aneuploidy%, in all studied cases using spearman correlation coefficient	195
XXI-	Evaluation of the studied parameters in the prognosis of malignant melanoma cases	197
