STUDY OF RISK FACTORS OF OTITIS MEDIA AMONG CHILDREN

Thesis

SUBMITTED FOR PARTIAL FULFILMENT OF M.D. DEGREE
IN COMMUNITY MEDICINE

By

Lamia Ahmed Basiony

M.B., B.Ch., M.Sc.

Supervised By

Prof. Dr.

Taghreed Farahat

Professor and Head of Community, Family
and Occupational Medicine Department
Faculty of Medicine, Menoufiya University

Prof. Dr.

Laila Shehata Dorgham

Professor of Public Health
and Vice Dean for Environmental Affairs
Faculty of Medicine, Menoufiya University

Prof. Dr.

Gaafer Abdel-Rasoul

Professor of Occupational Medicine
Faculty of Medicine, Menoufiya University

Prof. Dr.

Mohamed El-Sharnouby

Professor of ENT
and Dean of Faculty of Medicine
Menoufiya University

Dr. Mabrouk Ghoneim

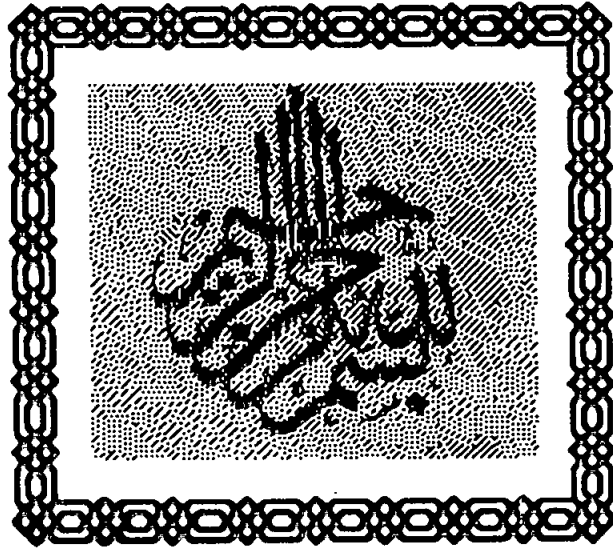

Lecturer of Microbiology
Faculty of Medicine, Menoufiya University

B

1-019

FACULTY OF MEDICINE
MENOUIYA UNIVERSITY

1999

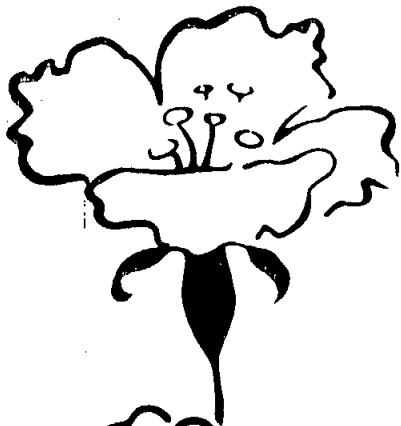

«إِنَّ السَّمْعَ وَالْبَصَرَ وَالْفُؤَادَ كُلُّ أُولَئِكَ كَانَ عَنْهُ مَسْئُولًا»

سورة الإسراء (آية ٣٦)

«فَلَهُوَ الَّذِي أَنْشَأَكُمْ وَجَعَلَ لَكُمُ السَّمْعَ
وَالْأَبْصَارَ وَالْأَفْئِدَةَ قَلِيلًا مَّا تَشْكُرُونَ»

سورة الملك (آية ٢٣)

صدق الله العظيم

To my husband
To my parents

Acknowledgement

First and foremost thanks to God for his help and powerful support to full this work.

I wish to express my sincere appreciation and deep gratitude to my professor and supervisor **Prof. Dr. Taghreed Farahat**, Head of Community, Family and Occupational Medicine Department, Faculty of Medicine, Menoufiya University for her generous help, kind moral support, enthusiastic encouragement, precious comments and suggestions.

My sincere thanks, deep appreciations to **Prof. Dr. Laila Sh. Dorgham**, Professor of Public Health Affairs, Faculty of Medicine, Menoufiya University for her continuous support, fruitful supervision, great cooperation and continuous guidance.

To **Prof. Dr. Gaafar Abdel-Rasoul**, Professor of Occupational Medicine, Faculty of Medicine, Menoufiya University, I owe more than can be expressed for his sincere help, wide guidance, close supervision, and for his great effort and particularly in the statistical analysis of this work and time he freely gave to finish this work.

My profound and deep thanks to **Prof. Dr. Mohamed El-Sharnouby**, Professor of ENT, and Dean of Faculty of Medicine, Menoufiya University for his continuous encouragement, generous help, valuable suggestion and precious advice.

I am deeply indebted to **Dr. Mabrouk Ghoneim** Lecturer of Microbiology, Faculty of Medicine, Menoufiya University for his fidelity, sustained support, unlimited help, generous advice and precious ideas.

I wish to express my sincere appreciation and deep thanks to **Prof. Dr. Mohamed Kamel El-Sobky**, Professor of Occupational Medicine, Faculty of Medicine, Menoufiya University for suggesting the subject of this work and his a lot of illuminating discussions he gave throughout this work.

My sincere prays to God to treat the spirit of **Dr. Yousry Moustafa** with patience and kindness for his help, encouragement, and enthusiastic support at the beginning of this work.

I am deeply indebted to my colleagues in ENT, Audiology and Community Departments for their help and sympathy which will never be forgotten.

Lastly, special warm heartly acknowledgement to my husband and parents and my friends, without their love, tolerance, cooperation and encouragement, this work would never been possible.

LIST OF ABBREVIATIONS

OM	Otitis media
ME	Middle ear
MEE, MEF	Middle ear effusion, middle ear fluid.
OME	Otitis media with effusion
ENT	Ear, nose and throat
OPC	Outpatient clinic
ASM	Acute suppurative otitis media
SOM	Secretory otitis media
CSOM	Chronic suppurative otitis media
HL	Hearing loss
ET	Eustachian tube
SES	Socioeconomic standard
RSF	Respiratory syncytial virus
URTI	Urinary tract infection.
PMEE	Persistent middle ear effusion
ETD	Eustachian tube dysfunction.
NP	Nasopharyngeal
DC	Day care
CHL	Conductive hearing loss
SNHL	Sensorineural hearing loss

CONTENTS

	<i>PAGE</i>
• INTRODUCTION	1
• REVIEW OF LITERATURE	3
- Anatomy of the Ear	3
- Definition, Terminology and Classification	5
- Risk Factors in Otitis Media	15
- Aetiology and Pathogenesis of Otitis Media	32
- Microbial Aspects of Otitis Media	41
- Diagnosis of Otitis Media	56
- Complications and Sequelae of Otitis Media	68
- Prevention of Otitis Media	73
• AIMS OF THE WORK	77
• HYPOTHESES	78
• SUBJECTS AND METHODS	79
• LIMITATIONS OF THE STUDY	97
• RESULTS	98
• DISCUSSION	133
• SUMMARY AND CONCLUSIONS	166
• RECOMMENDATIONS	170
• REFERENCES	172
• APPENDIX	222
• PROTOCOL	
• ARABIC SUMMARY	

LIST OF TABLES

	<i>Page No</i>
(1) : Number and percent distribution of ear diseases among children (aged from birth to 12 years) recorded in ENT, OPC during the academic year 1995-1996.	99
(2) : Number and percent distribution of patients and controls according to sociodemographic characteristics.	103
(3) : Number and percent distribution of patients and controls according to family history of OM, father's smoking and smoking index.	104
(4) : Number and percent distribution of patients and controls according to past history of allergic rhinitis, chronic tonsillitis, adenoid hypertrophy and chronic sinusitis.	105
(5) : Number and percent distribution of patients and controls according to past history of upper and lower respiratory tract infections.	106
(6) : Number and percent distribution of patients and controls according to some health behaviors.	107
(7) : Number and percent distribution of patients and controls according to prematurity, history of antibiotic misuse and previous operations (tonsillectomy and adenoidectomy).	108
(8) : Multiple regression results (full model) of occurrence of OM on some studied variables.	110
(9) : Stepwise regression results for factors significantly affecting the occurrence of OM.	111

- (10) : Number and percent distribution of OM patients according to laterality, affected side, age, sex, season. 114
- (11) : Relation between age at first attack and some studied factors. 117-118
- (12) : Relation between recurrent attacks and some studied factors. 120-121
- (13) : Number and percent distribution of children by ears according to hearing impairment in relation to type of OM. 124
- (14) : Number and percent distribution of culture results in acute and chronic OM. 128
- (15) : Number and percent distribution of bacterial isolates in acute and chronic OM. 129
- (16) : Number and percent distribution of isolated organisms according to age of the children. 130
- (17) : Antimicrobial sensitivity of isolated Gram-positive organisms. 131
- (18) : Antimicrobial sensitivity of isolated Gram-negative organisms. 132

LIST OF FIGURES

	<i>Page No</i>
1) The difference in the angle of the eustachian tube between infants and adults.	4
2) Etiology and pathogenesis of otitis media.	32
3) Eustachian tube dysfunction	33
4) Amploid 720 tympanometer.	85
5) Five typical tympanogram types.	85
6) Interacoustic audiometer AD17	87
7) Studied risk factors according to odds ratio	109
8) Role and share of factors significantly affecting occurrence of otitis media.	112
9) Different types of otitis media patients according to laterality, age, sex and season	115
10) Relation between age at first attack and recurrence rate ($\geq 3/\text{year}$)	122
11) Hearing impairment in different types of otitis media.	125
