

Primary and Permanent Enamel Bond Strength, Water Sorption and Solubility of a Glass Ionomer Cement Containing Cetrimide versus Miswak

Thesis

Submitted to the Department of Pediatric Dentistry and Dental
Public Health
Faculty of Dentistry
Ain Shams University

In

Partial fulfillment of the requirements of the Master Degree in
Pediatric Dentistry

By

Salma Mohamed Amin Ahmed El-Wazeer

Instructor

B.D.S

Faculty of Dentistry
Ain Shams University, 2008

2014

Supervisors

Dr. Nadia Ezz El-Din Mohamed Metwalli

Professor, Pediatric Dentistry and Dental Public Health Department and
Vice Dean for Community and Environmental Affairs
Faculty of Dentistry
Ain Shams University

Dr. Noha Samir Kabil

Associate Professor, Pediatric Dentistry and Dental Public Health
Department
Faculty of Dentistry
Ain Shams University

Dr. Mariem Osama Mohamed Wassel

Lecturer, Pediatric Dentistry and Dental Public Health Department
Faculty of Dentistry
Ain Shams University

Dedicated to

My Father

*Who taught me that Persistence and hard work are the
essentials for a successful life.*

My Mother

*My first word, who always inspires me with her love,
guidance and prayers.*

My Husband

*Without his love, encouragement, patience, tremendous
support and help, this piece of work would have been a
long lonely trip.*

And last, but certainly not least, my beloved son

OMAR

*The joy of my life, whose smile always cheers me up,
and pushes me forward.*

Acknowledgement

First, I would like to express my greatest gratitude to the Almighty **ALLAH**, the one and only who has given me the opportunity, strength, courage and blessing to pursue this work. However, conducting the research and writing this thesis required the patience, persistence and motivation of many people whom I would like to personally acknowledge. First, I would like to extend my deepest thanks to my supervisors:

Dr. Nadia Ezz EL-Din Metwalli, Professor of Pediatric Dentistry and Dental Public Health, Faculty of Dentistry, Ain Shams University, for her continuous guidance, support, unlimited encouragement and love. Her advice added a lot to me not only from a professional level but also from a personal one.

Dr. Noha Samir Kabil, Associate Professor of Pediatric Dentistry and Dental Public Health, Faculty of Dentistry, Ain Shams University, for her assistance and support throughout the course of this research.

Dr. Mariem Osama Mohamed Wassef, Lecturer of Pediatric Dentistry and Dental Public Health, Faculty of Dentistry, Ain Shams University, for her patience, time, continuous education and sincere advice not only throughout the course of this work but ever since the first day I joined the department.

Special acknowledgement of this achievement goes to ***Dr. Osama Mohamed Wassef***, Senior Professor of Plant Physiology,

National Agriculture Research Center, and *Dr. Sherweít Hamed El-Ahmady*, Lecturer of Pharmacognosy, Faculty of Pharmacy, Ain Shams University; for their valuable help in collecting the miswak samples, and preparing the lyophilized aqueous miswak extract.

These acknowledgements would be incomplete without expressing my deepest appreciation to *Dr. Mostafa M. H. Khalíl*, Professor of Inorganic Chemistry and director of the Central Lab. Unit, Faculty of Science, Ain Shams University; and *Dr. Mohamad S. Nassíf*, Associate Professor, Biomaterials Department, Faculty of Dentistry, Ain Shams University; for their time, patience and valuable information.

Last, but certainly not least, to all my department staff, colleagues and friends for their utmost support and encouragement. To all of them, please accept my sincere and profound gratitude.
