

**EFFECT OF TWO DIFFERENT MANDIBULAR
PROSTHETIC DESIGNS ON THE IMPLANT
SUPPORTING STRUCTURES**

Thesis Submitted to the Faculty of Oral and Dental Medicine,
Cairo University in partial fulfillment for the requirement of
Doctor Degree in Prosthodontics

By

Mohamed Mamdouh Mohamed Osman
M.D.S (Cairo University-2010)

Faculty of Oral and Dental Medicine
Cairo University

2013

SUPERVISORS

DR. HAMDY ABU EL-FOTOUH

Professor of Prosthodontics
Faculty of Oral and Dental Medicine
Cairo University

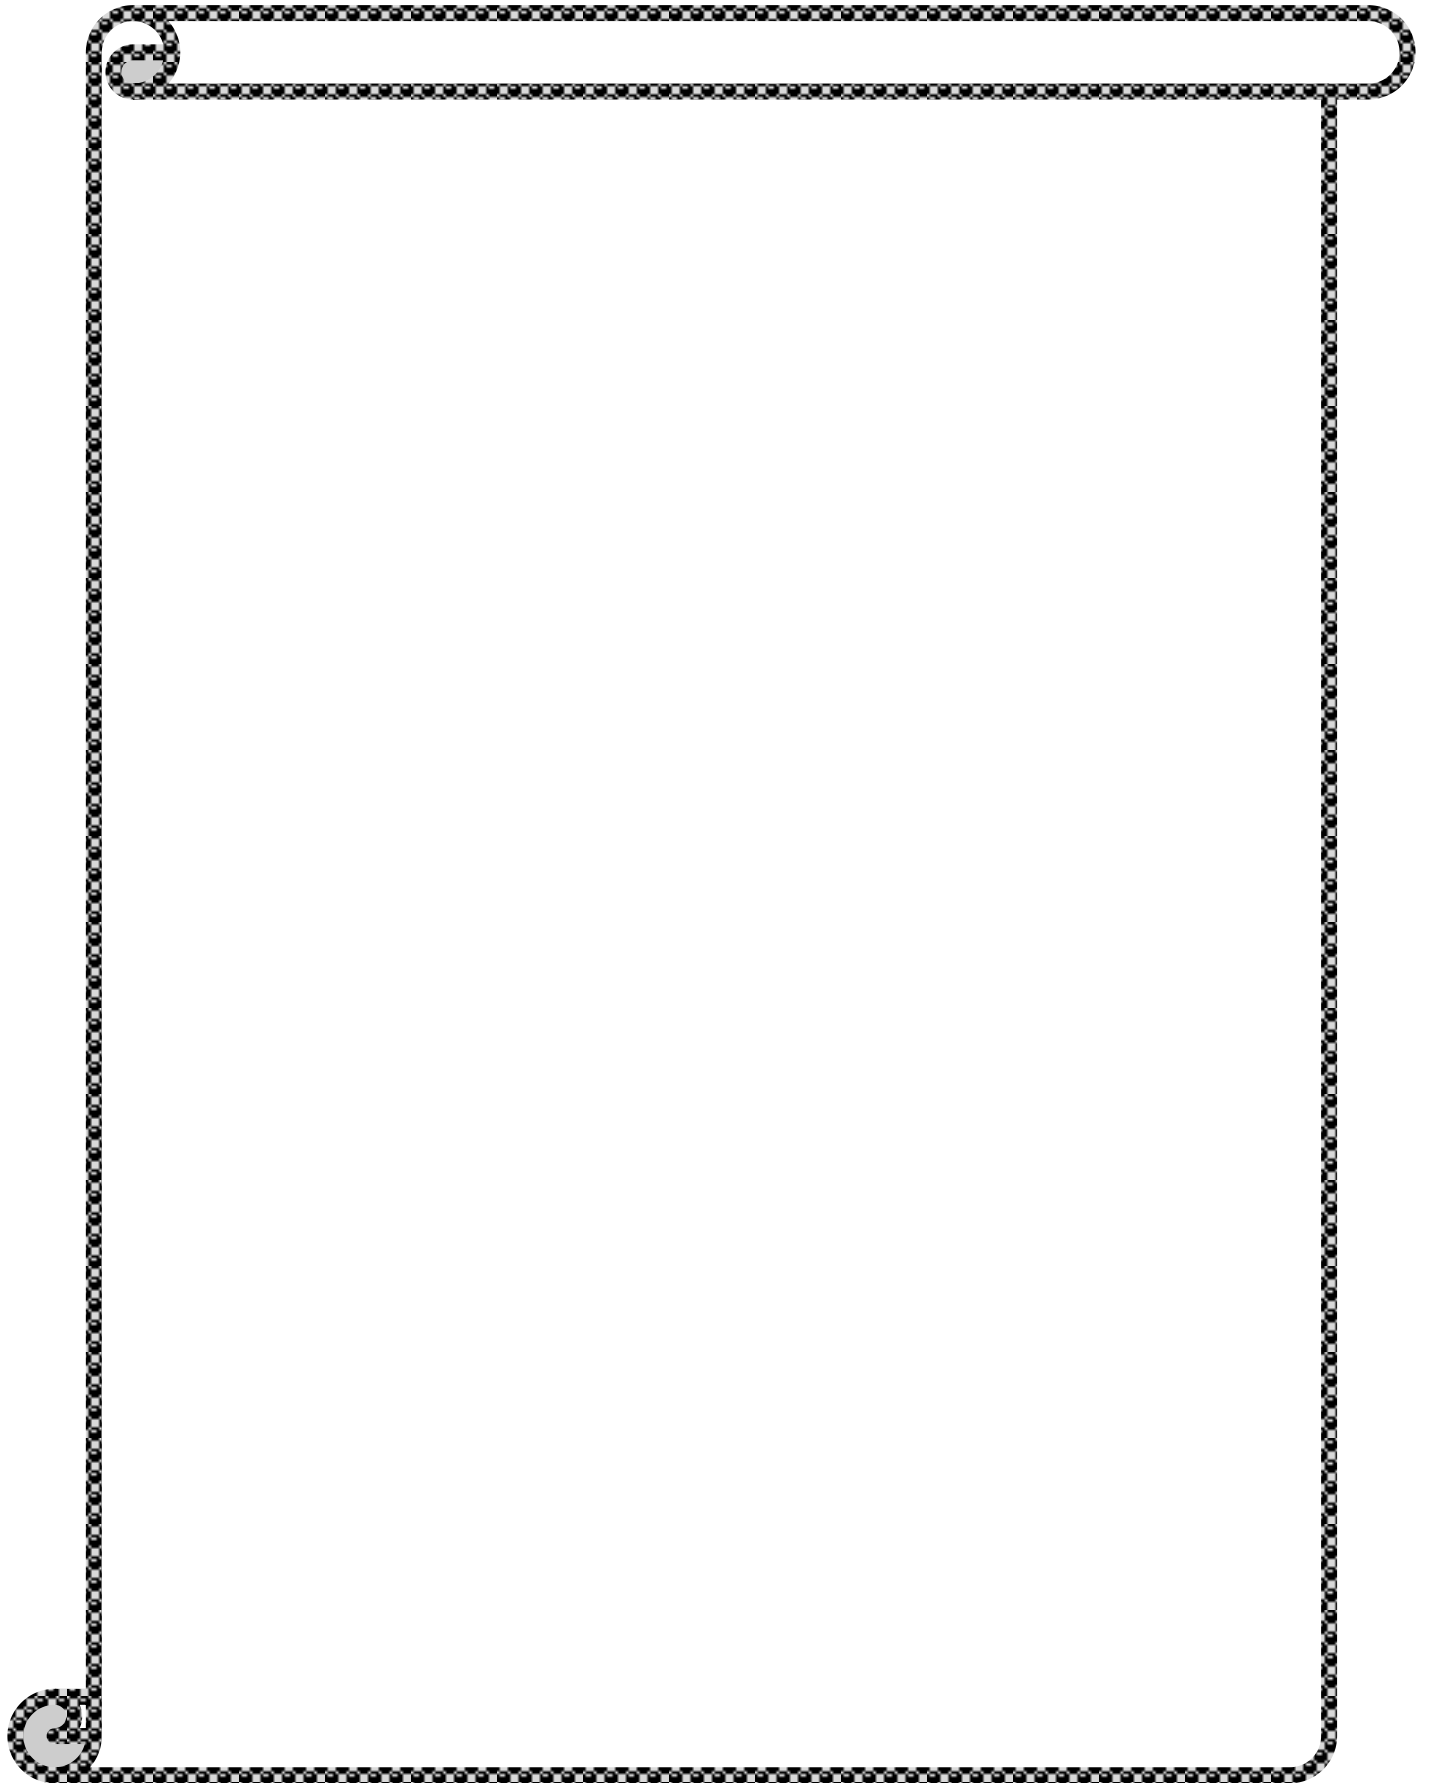

DR. MUSHIRA DAHABA

Professor and chairperson of Oral Radiology
Faculty of Oral and Dental Medicine
Cairo University

DR. MOHAMED FAROUK ABDALLA

Lecturer of Prosthodontics
Faculty of Oral and Dental Medicine
Cairo University

ACKNOWLEDGEMENT

Dedicated to,

My Beloved Mother,

My Brother,

My wife and

My precious son

Omar.

LIST OF CONTENTS

	CONTENT	Page
	INTRODUCTION	1
	REVIEW OF LITERATURE	
	I - Single Complete Denture	4
	➤ Problems of Single denture	4
	➤ Problems of Mandibular Single Complete Dentures	6
	➤ Treatment options of Mandibular Single Denture	
	II- Implant –Supported Prosthesis for Edentulous Patients	11
	➤ Treatment options for single mandibular edentulism	
	III- Implant – Supported Overdentures	15
	➤ Overdentures Treatment Goals	
	➤ Denture Design	
	➤ Indications , recommendations, clinical analysis ,advantages , disadvantages	

	CONTENT	Page
	<ul style="list-style-type: none"> ➤ Types of Implant –Retained Removable Overdentures (IRO) <ul style="list-style-type: none"> - Mucosa – supported ,implant –supported , combined mucosa –implant supported - Tooth supported - implant supported - IRO supported - retained - stabilized 	
	➤ Optimal number of implants to be included	
	➤ No. of implants to be used -----available	
	IV- Implant –Supported Fixed Prostheses	23
	➤ Patient selection i.e Indications & Contraindications	
	➤ Preliminary Prosthodontic Design	
	➤ Number of implants to be used (3,4,5,6,8 and 10)	
	➤ Effect or advantages of fixed prostheses	
	➤ Different materials of framework All Acrylic - Cast Metal - Titanium - Zirconium	
	➤ Screw vs cement fixed prosthesis	
	➤ Compare between different treatment Options according To different parameters ❖ Complete denture vs Implant-supported overdentures vs Implant Fixed prostheses ❖ Implant-supported overdentures vs Implant Fixed prostheses	34

	CONTENT	Page
	Methods for Implant Evaluation	
	V- EVALUATION of implant stability (Resonance frequency analysis – primary stability)	39
	<ul style="list-style-type: none"> ➤ Significance Diagnostic parameters for monitoring peri-implant conditions. The correlation between observed bone level changes with clinical parameters 	
	<ul style="list-style-type: none"> ➤ Alternatives for implant stability assessment 	
	<ul style="list-style-type: none"> ➤ OSSTELL EVALUATION Assessment of implant stability as a prognostic determinant. Influence of osseointegration degree and pattern on resonance frequency in the assessment of dental implant stability 	
	<ul style="list-style-type: none"> ➤ Stability measurements of implants in the edentulous mandible by means of resonance frequency analysis. 	
	<ul style="list-style-type: none"> ➤ Measurement of dental implant stability by resonance frequency analysis and damping capacity assessment: Osstell vs Periotest 	
	VI-Radiographic evaluation	47
	<ul style="list-style-type: none"> ➤ Standardization of radiographs for mandibular implant-supported overdentures 	
	<ul style="list-style-type: none"> ➤ Digital radiology for implant treatment planning and evaluation. 	
	<ul style="list-style-type: none"> ➤ Dental 3D Cone Beam Computed Tomography Systems 	
	<ul style="list-style-type: none"> ➤ Imaging technique selection for the preoperative planning of oral implants
