**EFFECT OF ZINC SUPPLEMENTATION ON
GROWTH VELOCITY IN CHILDREN WITH
SHORT STATURE SECONDARY TO
GROWTH HORMONE DEFICIENCY**

THESIS

Submitted to the faculty of Medicine,
Alexandria University

In partial fulfillment of the
requirements of the degree of

Master of Internal Medicine

By

Tarek El-Sayed Mahmoud Mansour

(MBBCH- Alexandria)

Alexandria University

Faculty of Medicine

2001

SUPERVISORS

Prof. Dr. Soheir Said El-Sayed Kamel

Professor of Internal Medicine,
Endocrinology Unit,
Faculty of Medicine,
University of Alexandria.

Prof. Dr. Magdy Omar Abdou Youssif

Professor of Pediatrics,
Faculty of Medicine,
University of Alexandria

Dr. Mona Abdel-Latif Aboul-Seoud

Lecturer of Internal Medicine,
Endocrinology Unit,
Faculty of Medicine,
University of Alexandria

Co-worker

Dr. Iman Ahmed Shaat

Lecturer of biochemistry,
Faculty of Medicine,
University of Alexandria.

Acknowledgements

I wish to express my deepest gratitude to *Prof. Dr. Soheir Said El-Sayed Kamel*, professor of Internal Medicine, Faculty of Medicine, University of Alexandria for her continuous guidance, encouragement and excellent supervision which made this work possible.

My sincere thanks are due to *Prof. Dr. Magdy Omar Abdou Youssif*, professor of Pediatrics, Faculty of Medicine, University of Alexandria for his continuous guidance, careful reading and precious advice during supervising this work.

My full gratitude to *Dr. Mona Abdel-Latif Aboul-Seoud*, lecturer of Internal Medicine, Faculty of Medicine, University of Alexandria for her guidance, interest, sincere effort and her advice and unlimited support throughout the work.

I wish to acknowledge *Dr. Iman Ahmed Shaat*, lecturer of biochemistry, Faculty of Medicine, University of Alexandria for her continuous help in carrying out the biochemical work.

Limitless thanks and gratitude are due to the patients and staff members of the Endocrinology Unit of the Internal Medicine Department of Alexandria Faculty of Medicine.

List of abbreviations

GH	Growth Hormone
SMC	Somatomedin C
SM-A	Somatomedin-A
IGF-I	Insulin-like Growth Factor-I
ACTH	Adreno Corticotrophic Hormone
TSH	Thyroid Stimulation Hormone
LH	Leutinizing hormone
FSH	Follicle Stimulating Hormone
ELISA	Enzyme Linked Immunosorbent Assay
IUGR	Intrauterine growth retardation
DM	Diabetes mellitus
AIDS	Acquired Immunodeficiency Syndrome
PEM	Protein energy malnutrition
TB	Tuberculosis
MSA	Multiplication stimulating activity
TMB	Tetramethylbenzidine
CPM	Counts per minute
HRP	Horseradish peroxidase
SPSS	Statistical Package for Social Science

List of figures

Figure number		Page
1	Measurement of height.	50
2	Measurement of the span.	51
3	Measuring the lower segment in infants (A) and adults (B).	52
4	Sex distribution among the 30 studied patients	71
5	Sex distribution in each studied group.	71
6	Mean values for age in the 3 studied groups	75
7	The mean height of each of the studied groups before and after treatment	78
8	The mean growth velocity (cm/month) in the 3 studied groups.	80
9	Mean weight among the 3 studied groups before and after treatment.	83
10	Mean span among the 3 studied groups before and after treatment.	86
11	Upper segment means in the 3 studied groups before and after treatment.	89
12	Mean lower segment measurement in the 3 studied groups before and after treatment.	92
13	Mean serum growth hormone in the 3 studied groups before and after treatment.	97
14	Mean serum growth hormone level (ng/ml) before and after exercise of all the studied patients.	101
15	Mean serum growth hormone level (ng/ml) before and after clonidine stimulation of all the studied patients.	102

16	Mean serum zinc level ($\mu\text{g}/\text{dl}$) before and 6 months after treatment.	108
17	Mean hair zinc level ($\mu\text{g}/\text{g}$ dry wt) before and 6 months after treatment.	112
18	Correlation coefficient between serum zinc and height before treatment.	115
19	Correlation coefficient between serum zinc and height 6 months after treatment.	116
20	Correlation coefficient between serum zinc and growth velocity 6 months after treatment in group I.	117
21	Correlation coefficient between serum zinc and growth velocity 6 months after treatment in group II.	118
22	Correlation coefficient between serum zinc and growth velocity 6 months after treatment in group III.	119
23	Correlation coefficient between serum zinc and IGF-I before treatment.	120
24	Correlation coefficient between serum zinc and serum growth hormone before treatment.	121
25	Correlation coefficient between serum zinc and serum growth hormone 6 months after treatment.	122

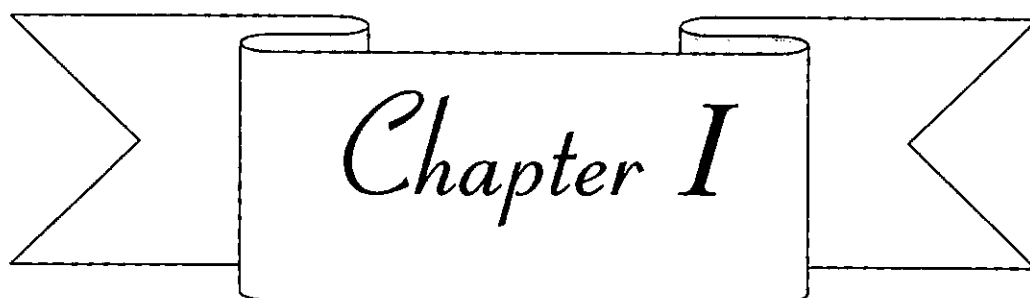

List of tables

Table number		Page
I	GH release modulated by neurotransmitter systems	15
II	Modalities of GH stimulation tests	16
III	Sex distribution and their percentage among the three studied groups.	70
IV	Summary of the clinical data of the three studied groups before treatment.	72
V	Summary of the clinical data of the three studied groups after treatment.	73
VI	Age distribution in years among the three groups under study.	74
VII	Height distribution (in cm) among the 3 studied groups before and after treatment	77
VIII	Test of significance (ANOVA test) between the height of the 3 studied groups 6 months after treatment.	78
IX	Increase in height (in cm) and the growth velocity (cm/month) in the studied groups 6 months after treatment.	79
X	Weight distribution (kg) among the three studied groups before and after treatment.	82
XI	Test of significance (ANOVA test) between the weight of the 3 studied groups 6 months after treatment.	83
XII	Span distribution (cm) among the three studied groups before and after treatment.	85

XIII	Upper segment distribution (cm) among the three studied groups before and after treatment.	88
XIV	Lower segment distribution (cm) among the three studied groups before and after treatment.	91
XV	Summary of the laboratory findings of the three studied groups before treatment.	93
XVI	Summary of the laboratory findings of the three studied groups after treatment.	94
XVII	Statistical analysis of basal serum growth hormone levels (ng/ml) before and after treatment among the 3 studied groups.	96
XVIII	Growth hormone level (basal, after excise and after clonidine stimulation) ng/ml.	100
XIX	Serum IGF-I level (ng/ml) in the 3 studied groups before treatment.	104
XX	Serum zinc levels in the 3 studied groups.	106
XXI	Statistical analysis of serum zinc levels ($\mu\text{g/dl}$) before and after treatment among the 3 studied groups.	107
XXII	Hair zinc levels in the 3 studied groups.	110
XXIII	Statistical analysis of hair zinc level ($\mu\text{g/g dry wt}$) before and after treatment among the 3 studied groups.	111
