

Synthesis and Evaluation of Some Cationic Thiol Surfactants Assembling on Nanoparticles and their Applications

*A Thesis Submitted for Degree of Ph.D. in
Organic Chemistry*

By

Radwa Mohamed Sami Abdelmohsen
(M.Sc. Organic Chemistry)

To

**Chemistry Department
Faculty of Women's for Arts, Science and Education
Ain Shams University
Cairo, Egypt**

Supervised by

Prof.Dr. Nadia G. Kandile

Prof. of Organic Chemistry
Chemistry Dep. Faculty of women For Arts,
Science and Education, Ain Shams University

Prof.Dr. Eid M. Azzam

Prof. of PetroChemicals
Egyptian Petroleum Research Institute

Assoc. Prof.Dr. Mohamed A. Hegazy

Assoc. Prof. of Physical Chemistry
Egyptian Petroleum Research Institute

2016

QUALIFICATION

Name : Radwa Mohamed Sami AbdelMohsen

Science Degree : M.Sc.

Department : Chemistry

College : Faculty of Women for Arts, Science and
Education

University : Ain Shams University

M.Sc : 2010

Acknowledgement

First, I would like to thank “**Allah**” for giving me the opportunity and the strength to accomplish this work.

I would like to express my deepest gratitude, appreciation and respect to:

Prof. Dr. Nadia Gharib Kandile, Professor of Organic Chemistry at the Faculty of women, Ain Shams University. Department of Chemistry, to oversee. Supervision nice, ongoing assistance and value, and cash fruitful and encouragement during the implementation of this work, and thank her very much for her advice me on each of my research as well as my career which priceless.

Prof. Dr. Eid Mahmoud Sayed Azzam, Professor of Petrochemicals, Egyptian Petroleum Research Institute (EPRI), for his guidance in selecting the research point; for his invaluable assistance, guidance in my entire experimental work, in my thesis writes up and reviewing it. I am grateful for the time and efforts taken by him to read and correct the written materials.

Prof. Dr. Abdel Fattah M. Badawi, Professor of Applied Organic Chemistry, Egyptian Petroleum Research Institute, for his valuable advice, talented supervision, and constructive criticism during the progress of the work.

Assoc. Prof. Dr. Mohamed Abd El-azim Hegazy, Association Professor of Petrochemicals, Egyptian Petroleum Research Institute, for his continuous advice, talented supervision and valuable criticism during the progress of the work.

Finally, I would like to thank **my colleagues** and all members of Petrochemicals Department, (EPRI) Egyptian Petroleum Research Institute, especially Surface Active Agents Lab., for providing the facilities to carry out the practical work.

DEDICATION

To My PARENTS

*I have to thank Allah for choosing both of you to be my
parents.*

Thank you for supporting me

TO MY DEAR HUSBAND

And MY DEAR SONS

TO MY FAMILY

Thank you for your supporting and helping me

Topic	Page
<i>Aim of the work</i>	i
<i>Summary and conclusion</i>	iii
Chapter 1: Introduction	
1.1. Surface active agent.....	1
1.1.1. Definition of surfactant.....	1
1.1.2. Classification of surfactants.....	1
1.1.2.1. Cationic surfactants.....	2
1.1.2.2. Anionic Surfactants	3
1.1.2.3. Non-ionic Surfactants.....	3
1.1.2.4. Amphoteric (Zwitterionic) Surfactants.....	3
1.1.3. How surfactants work?.....	3
1.2. Nanotechnology	5
1.2.1. Silver nanoparticles and its application in coating	6
1.2.2. Gold nanoparticles and its application in coating.....	7
1.3. Surfactant role in nanotechnology.....	8
1.4. Thiols surfactants in nanotechnology application.....	9
1.5. General Introduction of Schiff bases.....	11
1.6. Application of nanoparticles in petroleum field.....	13
1.6.1. Application of nanoparticles as corrosion inhibitors.....	13
1.6.2. Application of nanoparticles in coating.....	17
1.7. Corrosion and Corrosion Inhibitors.....	20
1.7.1. Classification of corrosion.....	21
1.7.1.1. Dry corrosion.....	21
1.7.1.2. Wet corrosion.....	21
1.7.2. Forms of corrosion.....	22
1.7.3. Methods of corrosion protection.....	22

Contents

1.7.3.1. Corrosion Inhibitors.....	23
1.7.3.1.1. Classification of inhibitor.....	23
1.7.3.2. Cathodic protection.....	24
1.7.3.3. Anodic Protection.....	25
1.7.3.4. Surface treatments.....	26
Chapter 2: Materials	
2.1. Materials.....	28
2.2. Instruments.....	29
2.2.1. Fourier Transform Infrared Spectrometer (FTIR).....	29
2.2.2. Proton Nuclear Magnetic Resonance (^1H NMR).....	29
2.2.3. Mass Spectra (MS).....	29
2.2.4. UV-VIS optical.....	30
2.3. Surface tension measurements.....	30
2.4. Conductivity measurements.....	30
2.5. Chemical composition and preparation of carbon steel sample.....	30
2.6. Corrosion measurements.....	31
2.6.1. Weight loss measurements.....	31
2.6.2. Electrochemical measurements.....	31
2.6.2.1. Potentiodynamic polarization method.....	31
2.6.2.2. Electrochemical impedance spectroscopy (EIS).....	32
2.7. Transmission electron microscope (TEM).....	32
2.8. Composition of paint.....	32
2.8.1. Preparation of the modified paint.....	32
2.8.2. Preparation of carbon steel for coating test.....	33
2.9. Paint performance.....	33
2.9.1. Salt spray test.....	33
2.10. Synthesis of novel cationic surfactants.....	34
2.10.1. Synthesis of the cationic thiol surfactants.....	34

2.10.2. Synthesis of amphoteric and di-cationic surfactants.....	35
2.11. Preparation of nanoparticles.....	36
2.11.1. Preparation of silver nanoparticles (AgNPs).....	36
2.11.2. Preparation of the cationic thiol surfactants-coated silver nanoparticles.....	36
2.11.3. Preparation of the gold nanoparticles solution.....	36
2.11.4. Preparation of the cationic surfactants-coated Gold nanoparticles.....	37
Chapter 3: Results and discussion	
3.1. Synthesis of the cationic thiol surfactants.....	38
3.2. Prepared surfactants confirmation	39
3.2.1. Fourier Transform Infrared spectra (FTIR).....	39
3.2.2. Proton nuclear magnetic resonance (¹ H-NMR).....	43
3.2.3. Mass Spectra (MS).....	47
3.3. Surface active properties.....	51
3.3.1. Surface tension (γ).....	51
3.3.2. Effectiveness (π_{cmc}).....	53
3.3.3. The surface excess (Γ_{max}).....	53
3.3.4. The area per molecule (A_{min}).....	54
3.3.5. Conductivity measurements.....	55
3.4. Corrosion inhibition evaluation of synthesized cationic thiol surfactant.....	57
3.4.1. Weight loss measurements.....	57
3.4.2. Potentiodynamic polarization measurements.....	64
3.4.3. Electrochemical impedance spectroscopy (EIS).....	70
3.5. Adsorption isotherm and standard adsorption free energy.....	78
3.5.1. The standard free energy of micelle formation (ΔG°_{mic}).....	82
3.6. Activation energy.....	82

Contents

3.7. Inhibition mechanism.....	88
3.8. The relation between corrosion inhibition and surface properties of the prepared cationic surfactants.....	89
3.9. Self-assembling of the synthesized surfactants on the prepared silver and gold nanoparticles (AgNPs & AuNPs).....	90
3.9.1. Fourier transform infrared spectrometer (FTIR).....	90
3.9.2. Ultraviolet absorption of AgNPs, AuNPs capped by the synthesized cationic thiol surfactant.....	93
3.9.3. Transmission electron microscope (TEM).....	98
3.10. Corrosion measurements.....	103
3.10.1. Potentiodynamic polarization measurements.....	103
3.10.2. Electrochemical impedance spectroscopy (EIS).....	108
3.10.3. Salt spray test.....	114
3.11. Chemical structure confirmation of the synthesized amphoteric and di-cationic surfactants.....	116
3.11.1. Preparation of amphoteric and di-cationic surfactants.....	116
3.12. Confirming the chemical structure of the synthesized surfactants using Mass spectra, FTIR and ¹ H NMR.....	121
3.12.1. FTIR spectra.....	121
3.12.2. ¹ H NMR spectra.....	124
3.12.3. Mass Spectra (MS).....	127
3.13. Surface active properties.....	130
3.13.1. Surface tension (γ).....	130
3.13.2. Effectiveness (π_{CMC}).....	130
3.13.3. The surface excess (Γ_{max}).....	131
3.13.4. The area per molecule (A_{min}).....	131
3.13.5. Conductivity measurements.....	132
