For the degree of

MASTER IN ORTHODONTICS

2001

Supervisors

Prof. Dr. Nagwa Mostafa Enany

Professor of Orthodontics

Head of Orthodontics Department

Faculty of Dentistry

University of Alexandria

Dr. Wessam Wagdi Marzouk

Associate Professor of Orthodontics

Faculty of Dentistry

University of Alexandria

To
My lovely parents,
My wife,
and
My guarding angel
Youssef

ACKNOWLEDGMENT

Thanks to god the most kind, the most merciful.

My deepest thanks, sincerest appreciation and feeling of indebtedness is to **Prof. Dr. Nagwa Mostafa Enany**, Professor of Orthodontics, Head of Orthodontic Department, Faculty of Dentistry, Alexandria University, for her valuable suggestions, enthusiastic encouragement and for the great efforts and help in producing this work.

My sincere sense of gratitude is to **Dr. Wessam Wagdi Marzouk**, Associate professor of Orthodontics, Faculty of Dentistry, Alexandria University, for direct contribution, constant concern, continuous motivation and help in producing this work.

My thanks are to **Dr. Hassan Abdel-Latif Moussa** Lecturer of Orthodontics, Faculty of Dentistry, Alexandria University, for helping me to select the subject and producing the protocol of this thesis.

Credit and thanks should be given to **Prof. Dr. Samir Fouad Aboul-Azm, Prof. Dr. Myra Abdel-Salam Fahmy**, Professors of Orthodontics and to **all Faculty and staff** members of the Orthodontic Department, Faculty of Dentistry, Alexandria University, for their direct and indirect contributions.

Finally, my thanks are to **all my colleagues studying** in the Orthodontic Department for their support and motivation.

LIST OF FIGURES

<u>Figure</u>	<u>Page</u>
1 (a) Case classified as group 1 with average facial type (frontal view)	28
1 (b) Case classified as group 1 with average facial type (Lateral view)	28
1 (c) Case classified as group 1 with average facial type (Lateral cephalometric X-ray)	28
1 (d) Case classified as group 1 with average facial type (Tracing of the X-ray)	28
2 (a) Case classified as group 2 with long facial type (frontal view)	29
2 (b) Case classified as group 2 with long facial type (Lateral view)	29
2 (c) Case classified as group 2 with long facial type (Lateral cephalometric X-ray)	29
2 (d) Case classified as group 2 with long facial type (Tracing of the X-ray)	29
3 (a) Case classified as group 3 with short facial type (frontal view)	30
3 (b) Case classified as group 3 with short facial type (Lateral view)	30
3 (c) Case classified as group 3 with short facial type (Lateral cephalometric X-ray)	30

3 (d) Case classified as group 3 with short facial type (Tracing of the X-ray)	30
4 The cephalometric landmarks.	34
5 The lines and planes.	36
6 The linear measurements.	39
7 The angular measurements.	40
8 The indexical measurements.	42

LIST OF TABLES

<u>Table</u>	<u>Page</u>
I The mean age and standard deviation of the three groups.	44
II (a) Paired t - test for means of linear cephalometric measurements (L C M) between sexes within group 1.	46
II (b) Paired t - test for means of angular cephalometric measurements (A C M) between sexes within group 1.	47
II (c) Paired t - test for means of indexical cephalometric measurements (I C M) between sexes within group 1.	47
III (a) Paired t - test for means of linear cephalometric measurements (L C M) between sexes within group 2.	49
III (b) Paired t - test for means of angular cephalometric measurements (A C M) between sexes within group 2.	50
III (c) Paired t- test for means of indexical cephalometric measurements (I C M) between sexes within group 2.	50

IV (a) Paired t - test for means of linear cephalometric measurements (L C M) between sexes within group 3.	52
IV (b) Paired t – test for means of angular cephalometric measurements (A C M) between sexes within group 3.	53
IV (c) Paired t - test for means of indexical cephalometric measurements (I C M) between sexes within group 3.	53
V (a) ANOVA – test for means of linear cephalometric measurements (L C M) group 1,2&3.	57
V (b) ANOVA - test for means of angular cephalometric measurements (A C M) group 1,2&3.	58
V (c) ANOVA - test or means of indexical cephalometric measurements (I C M) group 1,2&3.	59
VI The least significant difference (LSD) test for the significant cephalometric measurements (CM) obtained from the ANOVA test.	60
VII (a) The correlation coefficient (r) test for the significant cephalometric measurements (CM) obtained from the ANOVA test for group 1.	63

VII (b) The correlation coefficient (r) test for the significant cephalometric measurements (CM) obtained from the ANOVA test for group 2. 64

VII (c) The correlation coefficient (r) test for the significant cephalometric measurements (CM) obtained from the ANOVA test for group 3. 65
