

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

( يَرْفَعُ اللَّهُ الَّذِينَ آمَنُوا مِنْكُمْ وَالَّذِينَ  
أُوتُوا الْعِلْمَ دَرَجَاتٍ وَاللَّهُ بِمَا تَعْمَلُونَ  
خَبِيرٌ )

صَدَقَ اللَّهُ الْعَظِيمُ

سورة المجادلة الاية ( ١١ )

## Acknowledgment

*First of all and foremost, thanks are due to Allah the most merciful who gives me every thing I have.*

*I wish to express many sincere thanks and deepest gratitude to Prof. Dr. Rabah Mohammed Shawky, Professor of Pediatrics and genetics, Faculty of Medicine Ain Shams University, She has been kind enough to spare time and effort to orientate, to advise, to teach and to give willingly from her inexhaustible treasures of knowledge.*

*I am also deeply conscious of the help continually and most generously offered to me by Prof. Shahira Reyad Noweir, Professor of clinical genetics, Research institute of ophthalmology, for her kind assistance, advice, encouragement and supervision all over the time. she made the completion of this work possible.*

*Warm gratitude is paid to Prof. Heba Salah Abdel Kalek, lecturer Of clinical genetics, Faculty of Medicine Ain Shams university, for her keen supervision and cooperative guidance. She has kindly and sincerely made to help me throughout the study.*

*I really would to express my thanks and great appreciation to Dr. Solaf Mohammed Elsaid, and Dr. Amira Abd El Azim for their important advices, valuable help, truthful cooperation for this work,*

*✍ Abeer Eid Mohammed Abd El Kader*

## List of Abbreviations

<b>ACC</b>	: Aplastic cutis congenita
<b>ADRP</b>	: Autosomal dominant retinitis pigmentosa
<b>AFP</b>	: Alpha feto protein
<b>AMD</b>	: Age related macular degeneration
<b>AN</b>	: Aniridia
<b>BPES</b>	: Blepharophiamosis, ptosis, epicanthus inversus syndrome
<b>CG</b>	: Congenital glaucoma
<b>CGH</b>	: Comparative genomic hybridization
<b>CHED</b>	: Congenital hereditary endothelial dystrophy
<b>CHSD</b>	: Congenital hereditary stromal dystrophy
<b>CMV</b>	: Cytomegalovirus
<b>CNG</b>	: Cyclic nucleotide gated
<b>CNS</b>	: Central nervous system
<b>COL</b>	: Collagen
<b>CSNB</b>	: Congenital stationary night blindness
<b>CT</b>	: Computed tomography
<b>CVS</b>	: Chorionic villous sampling
<b>DMC</b>	: Dyggve Melchior clausen syndrome
<b>DNA</b>	: Deoxy ribonucleic acid
<b>DOA</b>	: Dominant optic atrophy
<b>EDS</b>	: Ehlar danlos syndrome

<b>ERG</b>	: Electoretinogram
<b>FEVR</b>	: Familial exudative vitroretinopathy
<b>FISH</b>	: Fluorescent in situ hybridization
<b>GALT</b>	: Galactose 1 phosphate uridyl transferase
<b>HIG</b>	: Hyperimmunoglobulins
<b>HIV</b>	: Human immunodeficiency virus
<b>ICD</b>	: Inter canthal distance
<b>IEM</b>	: Inborn errors of metabolism
<b>IP</b>	: Incontinentia pigmenti
<b>IPD</b>	: Inter pupillary distance
<b>LHON</b>	: Leber hereditary optic neuropathy
<b>ND</b>	: Norrie disease
<b>NF</b>	: Neurofibromatosis
<b>OCRL</b>	: Oculocerebrorenal syndrome of lowe
<b>OMIM</b>	: Online mendelian inheritance in man
<b>ONH</b>	: Optic nerve hypoplasia
<b>PACG</b>	: primary angle closure glaucoma
<b>Pax</b>	: Paired box gene
<b>PCR</b>	: Polymerase chain reaction
<b>PFV</b>	: Persistent fetal vasculature
<b>PGD</b>	: Preimplantation genetic diagnosis
<b>PHPV</b>	: Persistent hyperplastic primary vitreous
<b>POAG</b>	: Primary open angle glaucoma
<b>PXS</b>	: Pseudoexfoliation

<b>RGC</b>	: Retinal ganglion cell
<b>RP</b>	: Retinitis pigmentosa
<b>STGD</b>	: Stargardt disease
<b>STK</b>	: Stickler syndrome
<b>TORCH</b>	: Toxoplasmosis, Rubella, Cytomegalovirus, Herpes simplex, Varicella, Syphilis
<b>USH</b>	: Usher syndrome
<b>WAGER</b>	: Wilms tumor, Aniridia, Genitourinary abnormalities and mental retardation
<b>WGN</b>	: Wagner disease
<b>WHO</b>	: World health organization
<b>WT</b>	: Wilms tumor
<b>XFG</b>	: Pseudoexfoliation glaucoma

## List of Tables

Table No	Title	Page
<b>Table (1)</b>	Syndromes associated with anophthalmia.	72
<b>Table (2)</b>	Syndromes associated with microphthalmia.	75
<b>Table (3)</b>	Classification of the patients according to final diagnosis.	97
<b>Table (4)</b>	Clinical and laboratory Data of patients attending the genetics clinic with chromosomal abnormalities (12 patients).	98
<b>Table (5)</b>	Clinical Data of patients attending the genetics clinic with with chromosomal abnormalities.	99
<b>Table (6)</b>	Clinical Data of patients attending the genetic clinic with genetic syndromes (52 patients).	103
<b>Table (7)</b>	Genetic Syndromes.	104
<b>Table (8)</b>	Clinical Data of sequence attending the genetics clinic.	109
<b>Table (9)</b>	Diagnosis of patients with genetic sequences attending the genetics clinic.	109
<b>Table (10)</b>	Clinical Data of patients attending the	110

Table No	Title	Page
	genetic clinic with genetic associations.	
<b>Table (11)</b>	Diagnosis of patients with associations attending the genetics clinic.	110
<b>Table (12)</b>	Clinical Data of patients attending the genetic clinic with other causes of genetic diseases (non syndromic).	112
<b>Table (13)</b>	Diagnosis of patients attending the genetics clinic with metabolic diseases	112
<b>Table (14)</b>	Diagnosis of patients attending the genetics clinic with congenital heart diseases.	113
<b>Table (15)</b>	Diagnosis of patients attending the genetics clinic with CNS anomalies.	114
<b>Table (16)</b>	Diagnosis of patients attending the genetics clinic with skeletal and joint disorders.	114
<b>Table (17)</b>	Diagnosis of patients attending the genetics clinic with skin disorders.	116
<b>Table (18)</b>	Clinical Data of patients attending the genetic clinic with Isolated eye anomalies.	117
<b>Table (19)</b>	Eye anomalies among the studied group.	118
<b>Table (20)</b>	Sex distribution, Consanguinity, Family History and Eye anomalies of the study	119

Table No	Title	Page
	group.	
<b>Table (21)</b>	Relation between sex distribution and presence of eye anomalies.	122
<b>Table (22)</b>	Relation between consanguinity and presence of eye anomalies.	123
<b>Table (23)</b>	Relation between family history and presence of eye anomalies.	124
<b>Table (24)</b>	Relation between each category and presence of eye anomalies.	125

## List of Figures

Figure no.	Title	Page
<b>Figure (1)</b>	A) Dorsal view, showing the formation of the optic vesicle, which grows out as a diverticulum from the lateral aspect of the forebrain.	21
<b>Figure (2)</b>	(a, b, c) Envagination of the primary optic vesicle to form the optic cup. (d) The formation of the lens from the lens vesicle and the development of the cornea, anterior chamber and papillary membrane.	23
<b>Figure (3)</b>	The development of the cornea, anterior chamber and pupillary membrane, the eyelids have fused and remain so until the 7th month.	25
<b>Figure (4)</b>	Axenfeld-Reiger syndrome.	30
<b>Figure (5)</b>	Central corneal opacity in Peters anomaly.	32
<b>Figure (6)</b>	Generalized corneal clouding. An important sign of congenital glaucoma.	33
<b>Figure (7)</b>	Aniridia. Note rudimentary iris rim and anterior polar cataract.	33
