

Formal Concept Analysis in Microbiology with Emphasis on Sterile Area from Design to Operation as Preventative Cost Of Quality

A thesis Submitted In Partial Fulfillment of The Requirement for the
Degree of M.Sc. In Pharmaceutical Sciences
(Microbiology & Immunology)

By

Lamyaa Ahmad Fouad Gebreel

B.Sc. Pharmacy (2000)

Supervisors

Prof. Dr. Abd El-Gawad Hashem

Professor & Head of Microbiology & Immunology Department
Faculty of Pharmacy, Cairo University

Prof.Dr.Hesham Hasan Radwan

Professor & Head of Microbiology & Immunology Department
Faculty of Pharmacy, Helwan University

Dr.Amal Emad El-Deen Ali

Lecturer of Microbiology & Immunology
Faculty of Pharmacy. Cairo University

Department of Microbiology and Immunology
Faculty of Pharmacy
Cairo University
2008

Approval Sheet

Name of student

Lamyaa Ahmad Fouaad Gebreel

Title of thesis

Formal Concept Analysis in Microbiology with
Emphasis on Sterile Area from Design to Operation
as Preventative Cost of Quality

Approved by:

1.

2.

3.

4.

(committee in charge)

Date: / / **2008**

Acknowledgement

Thanks to ***Allah most gracious, most merciful*** to whom I attribute any success in my life.

My profound gratitude and appreciation to ***Prof.Dr.Abdel Gawad Hashem***; professor and Head of Microbiology and Immunology Department, Faculty of Pharmacy, Cairo University, for his generous assistance, encouragement and time spent supervising this work.

My deepest gratitude and thanks to ***Prof.Hesham Hassan Radwan***; Professor and Head of Microbiology and Immunology Department, Faculty of Pharmacy, Helwan University.

I am sincerely thankful to ***Dr.Amal Emad El-Deen***; Lecturer of Microbiology and Immunology, Department of Microbiology and Immunology Faculty of Pharmacy, Cairo University, who devoted great efforts and lots of her time and interest in supervising this work.

My great thanks to my mother and father for their help and support.

Table of contents

No.	Contents	Page
1	Introduction and aim of the work	1
2	Literature review.	5
2.1	Introduction to cleanrooms	5
2.2	Definitions and standards of cleanroom	6
2.3	History & applications of cleanrooms	7
2.3.1	Aerospace industry	7
2.3.2	Medical field	8
2.3.3	Pharmaceutical use	9
2.3.4	Other fields	11
2.4	Design of cleanrooms	11
2.4.1	Design objectives	12
2.4.2	Main features of design	13
2.4.3	Cleanroom parameters	19
2.4.3.1	Temperature and humidity control	19
2.4.3.2	Air born contamination control	21
2.4.3.3	Pressure deferential control	23
2.4.3.4	Constant airflow systems	25
2.4.3.5	Ventilation	26
2.4.4	Cleanroom classes	28
2.4.5	Types of cleanrooms	29

No.	Contents	Page
2.4.5.1	Conventionally ventilated cleanrooms	29
2.4.5.2	Unidirectional airflow cleanrooms	29
2.4.5.3	Mixed flow cleanrooms	30
2.4.5.4	Isolator or barrier technology	30
2.4.6	Cleanroom contamination	32
2.4.6.1	Sources of cleanroom contamination	32
2.4.6.2	Cleanroom contamination control	35
2.5	Aseptic practice in cleanroom	38
2.5.1	Personnel training and qualification	42
2.5.2	Personnel gowning	47
2.5.3	Cleaning and sanitation of work place	54
2.6	Validation of cleanroom and its operations	55
2.6.1	Process Validation (Media Fill)	56
2.7	Microbiological EM and cleanroom	63
2.7.1	Environmental Monitoring Sampling site selection and frequency	66
2.7.2	EM Levels	70
2.7.3	Methods used in microbiological EM sampling	74
2.7.3.1	Air sampling	74
2.7.3.1.1	Passive air sampling	74
2.7.3.1.2	Active air sampling	76

No.	Contents	Page
2.7.3.2	Surface sampling	77
2.7.3.3	Personnel sampling	78
2.7.4.	Microbiological testing of EM samples	79
2.7.5	Characterization of isolates	79
2.7.6	Investigation of out of limits environmental monitoring data	81
2.7.7	Trend analysis of microbial monitoring results	82
2.8	Quality and cost in cleanroom	83
2.8.1	Quality costs starting from design	86
2.8.2	Cost consideration in cleanroom	88
2.8.3	Cleanroom components' cost	90
2.8.4	Example of costs	94
2.8.5	Recall of sterile products	95
3.	Materials and methods	99
3.1	Materials	99
3.1.1	Media	99
3.1.1.1	Solid media	99
3.1.1.2	Liquid media	99
3.1.2	Microorganisms	99
3.1.3	Chemicals	100
3.1.4	Equipment	100

No.	Contents	Page
3.2	Methods	102
3.2.1	Media preparation and handling	102
3.2.1.1	Solid media	102
3.2.1.2	Liquid media	103
3.2.2	Sampling method	104
3.2.2.1	Passive air monitoring using settling plates	104
3.2.2.2	Active air monitoring using STA air sampler	104
3.2.2.3	Surface / personnel sampling using RODAC plates	106
3.2.3	Samples' QC testing	106
3.3	Fumigation validation	107
3.3.1	Preparation of the area for the fumigation	107
3.3.1.1	Cleaning tools	108
3.3.1.2	Cleaning agent used	108
3.3.1.3	Cleaning procedures	108
3.3.1.4	Disinfection procedures	110
3.3.2	Fumigation method	110
3.3.3	Sampling for the fumigation validation	112
3.3.3.1	Sampling process	112
3.4	Aseptic operator qualification	115
3.4.1	Selection criteria	115

No.	Contents	Page
3.4.2	Classroom/ orientation training	117
3.4.2.1	Orientation training	117
3.4.2.2	Gowning and entry to cleanroom training	118
3.4.2.3	Behavior in cleanroom	122
3.4.3	Gowning validation	126
3.4.4	On the job training	128
3.5	Aseptic process validation (media fill)	129
3.5.1	Procedures	129
3.5.2	Media inspection	133
3.5.3	Fill volume	134
3.5.4	Batch size	135
3.5.5	Incubation conditions	135
3.6	Environmental monitoring	135
3.6.1	Passive air monitoring	136
3.6.2	Active air monitoring	139
3.6.3	Surface monitoring	140
3.6.4	Personnel monitoring	143
3.7	Data handling	144
4.	Results	145
4.1	Design of facility X	146
4.2	Fumigation validation	149

No.	Contents	Page
4.3	Gowning validation	162
4.4	Media fill	166
4.4.1	Sterility	166
4.4.2	Growth promotion	166
4.4.3	Environmental monitoring during media fill	166
4.5	Environmental monitoring	167
4.5.1	Environmental monitoring during media fill	168
4.5.1.1	Passive air monitoring using settling plates	168
4.5.1.2	Active air monitoring using STA air sampler	172
4.5.1.3	Surface monitoring using RODAC plates	174
4.5.1.4	Personnel monitoring using RODAC plates	180
4.5.2.	Environmental monitoring during regular production	182
4.5.2.1	Passive air monitoring using settling plates	182
4.5.2.2	Active air monitoring using STA air sampler	188
4.5.2.3	Surface monitoring using RODAC plates	190
4.5.2.4	Personnel monitoring using RODAC plates	193
4.6	Comparison of environmental monitoring results during media fill and regular production days	197
4.6.1	Passive air monitoring	197
4.6.2	Active air monitoring	199

No.	Contents	Page
4.6.3	Surface monitoring	200
4.7	Statistical analysis of the results	201
4.7.1	STA air sampling	202
4.7.2	Surface monitoring	203
4.7.3	Settling plates	204
5.	Discussion	206
5.1	Design verification	206
5.2	Fumigation validation	208
5.2.1	Recommendations	211
5.3	Aseptic operator qualification	212
5.3.1	Recommendations	214
5.4	Media fill	214
5.4.1	Prerequisites	215
5.4.2	Acceptance limits	216
5.4.3	Frequency	216
5.4.4	Investigation and corrective actions in case of failed results	217
5.4.5	Media fill conclusion	218
5.5	Environmental monitoring	218
5.5.1	Passive air monitoring	219
5.5.2	Active air monitoring	220

No.	Contents	Page
5.5.3	Surface monitoring	221
5.5.4	Personnel monitoring	222
5.5.5	Environmental monitoring recommendations	223
5.6	Final conclusion	225
6.	Summery	226
7.	Abstract	232
8.	References	234
9.	Arabic summary	

List of abbreviations

Abbreviation	Meaning
AHU	Air Handling Unit
APA	Aseptic Processing Area
CDER	Centre of Drug Evaluation and Research
cGMP	Current Good Manufacturing Practice
CFR	Code of Federal Regulations
Cfu	colony forming unit.
CBER	Centre for Biologics Evaluation and Research
CIVAS	Central Intravenous Additive Service
CIP	Clean In Place
EC	European Commission.
EM	Environmental Monitoring
FDA	Food Drug Administration
HEPA filters	High Efficiency Particulate Air Filters.
HVAC system	Heating, Ventilation and Air Conditioning system
i.e.	Which means
IENT	Institute of Environmental Sciences and Technology .
I.V product	Intravenous product

Abbreviation	Meaning
IQ	Installation Qualification
GIT	Gastro Intestinal Tract
kWh	kilo watt
LAF	Laminar Air Flow.
LI	Life Islet.
MAL	Material Air lock
NASA	National Aeronautics and Space Administration.
NA	Not Applied
OR	Operation Room
ORA	Office of Regulatory Affairs
OQ	Operational Qualification
Pa	Pascal
PQ	Performance Qualification
PDA	Parenteral Drug Association
PAL	Personnel Air Lock
PPM	Parts Per Million.
RH	Relative Humidity
RODAC plates	Replicate Organism Detection And Counting Plates.
SSI	Surgical Site Infection

Abbreviation	Meaning
STA air sampler	Slit To Agar air sampler.
SIP	Sterilize In Place
TPN	Total Parenteral Nutrition.
TSB	Trypticase Soy Broth
TSA	Tryptic Soy Agar medium
US dollars	United States dollars
WFI	Water For Injection
